

"My Heart Would Palpitate, I Had Weak Spells"

Mrs. L. Whiting, 202 King St. West, Brockville, Ont., writes:

"I took very sick with my nerves and stomach, and seemed to be all run down. At times my heart would flutter and palpitate and I would take such weak spells in the pit of my stomach that I sometimes thought I would never get better. I had almost given up hope when a friend advised the use of Dr. Chase's Nerve Food. I did not stop until I had taken twenty-five boxes. It has done wonders for me and I want to recommend it to everyone."

Quebec Premier Warns Public Against Buying Stock in Labrador or Mining Companies

Have Labrador Mining Companies Good Title?

Under the above caption a Montreal newspaper in its financial column states Quebec Province is not going to give up its claim to Labrador without a fight, according to a statement credited to Premier Taschereau. The Premier warned the public against buying stock in companies claiming to have mining concessions on the Labrador coast. These concessions have been given by the

Newfoundland Government. Quebec claims ownership of Labrador for Canada. Newfoundland at present exercises jurisdiction on the coast. How far back the coast line goes is a question for the Privy Council to decide this summer, and the inference of the Quebec Premier's remarks, is that the concessions granted by Newfoundland will be affected by the Privy Council's judgment.

Canada to Test Out Gold Fields of Labrador.

MINING DEPARTMENT OF MINES ARRANGES TO SEND EXPEDITION.

MONTREAL—The question of ownership and the gold possibilities of the Labrador coast has been the subject of the decision, understood to have been reached by the Department of the Interior, to send a party of exploration into the country this season.

Under a recent issue of The Montreal Post, Quebec and Newfoundland are playing the leading roles in the drama of Labrador ownership. The province, because it has sovereignty over the Labrador coast, has a very precarious title to the land.

Grand Falls Catholic Cadet Corps.

The public of Newfoundland may be interested in the Brigade movements that are now maturing in Grand Falls. There is a branch of the C.C.B. which has been growing steadily in size and numbers during the past eighteen months; the Methodist Church has a troop of Boy Scouts, and the Catholic Cadet Corps has just made its first official appearance in a church parade on Sunday last, May 27th.

Rumour has it that there is a possibility of still another Brigade being established here, and that, between them all there will be ample opportunity for widespread physical development of the boys and young men. Last winter the hockey schedule was composed of Brigade teams, and for the football and baseball fixtures for the coming summer the greater number of teams are Brigades; we are looking forward to a very successful season, and feel confident that a two-fold benefit will be felt. There will be greater interest in athletics, keener competition and rivalry with a better understanding of sportsmanship, and the various Brigade movements will undoubtedly derive more encouragement, even now there is certainly evident a note of enthusiasm, which if maintained, will have lasting effect.

The Catholic Cadet Corps was organized last August and immediately evoked a response that was most gratifying to its spontaneity. Almost at once there were enlistments in excess of what could be handled with the means prepared, and a generous proportion of ex-service men and officers were amongst the first-comers. The C.C. is Lt. M. Nugent, of "Ours," his Adj. is Capt. P. A. Edwards, who will no doubt be recognized as an old Cadet of St. John's, where he held the rank of Bat. Sergt. Major. The other officers are Lieutenants, P. Connors, Jas. Delaney, D. Baird, S. Foran and A. Crawley, all of whom are from the Newfoundland Regt. In addition there is Sergt. Major M. Foran and Sergt. T. Griffin.

The governing body is Rev. W. Finn, Chairman, Major G. M. Emerson, Secretary, and Messrs. Jas. H. Judge and Jos. Edwards.

Sunday, May 27th, was set for the first Church Parade, and although a little cool, was a good day for marching. Everyone was prepared for a good showing but it was beyond doubt that a feeling of surprise was general. For not only did the Brigade acquit themselves well as a boys' brigade, but their soldierly bearing and excellent discipline would have been a credit to professionals, while their marching was perfect. The impression created at the time was really too deep to be fully realized at once, and, contrary to the usual way of these things, waxed stronger on further consideration.

Public appreciation seemed to grow and grow with each commendation until at last it reached a point when it was apparently beyond the power of mere words.

A standard has been set. The Brigade has already justified its formation. Judicious encouragement will lead to still greater things, the difficulties are still with us, but the ideal is nearer. This splendid exhibition was not done with enthusiasm alone, it meant hard work, and a lot of hard work. Credit cannot be too generous to those who give so freely and so devotedly. The officers and non-commissioned officers deserve the highest praise for their success, the boys have earned a reputation that will be hard to beat, and Major Emerson, to whose efforts the organization and financial launching of the Brigade are mainly due, has achieved a success that will not be soon forgotten.

After this parade the following promotions were read:—Pte. J. Winslow, to be Drum Sergeant; Lance Corporal, Jas. Nugent, P. Mulvey, A. Shallow, P. Byrne, to be Corporals; acting Lance Corporal, Jas. Ryan and John McCormack, to be acting Corporals; and Ptes. G. Byrne, T. Blackmore and Jas. Hannaford to be Lance Corporals.

The following Good Conduct Stripes were awarded: Pte. Jno. Stapleton and Drummer Jno. Kelly. The uniforms were made by the Nfld. Clothing Factory and are smart and effective looking. The number of rifles at present is thirty and one hundred and twenty are expected on the first boat from England. It goes to show that the future of the Catholic Cadet Corps in Grand Falls, but whatever success crowns their efforts, it will not be greater than we wish them.

Exposes False Statement About Labrador Gold.

A. R. Ledoux, President of Ledoux & Co., the well known mineralogist, has addressed the following letter to the editor of the "Canadian Mining Journal":

"Mr. Lloyd Roberts, under the date of Ottawa, May 26th, has sent to the New York World a communication about Labrador gold which appeared on the front page of the World news section. There are several columns about this alleged discovery of gold

Whenever you buy roofing felt you should also buy Simplex Roofing Nails.

Simplex Roofing Nails are better than nails and tins.

The head of a Simplex Roofing Nail is as large as a 20-cent piece and three times as thick as a roofing tin.

Simplex Roofing Nails are all solid iron and will last as long as your roof—they won't rust out.

When you use Simplex Roofing Nails you may be certain the felt won't blow off your roof.

Simplex Roofing Nails are sold everywhere. Ask to see them.

may lead it

to certify that we extracted 5 ozs. of gold from 25 lbs. of Labrador gravel; that we gave to Mr. Bellow or Mr. Edwards \$75 in payment for the gold after deducting our charges.

"I write to say that Ledoux & Co. never made this assay nor did we ever receive any such sample from Mr. Edwards or Mr. Bellow or anyone else, and that, in so far as concerning our name and a certificate alleged to be signed by us with this assay is concerned, the statements are untrue. We have been besieged by people from Canada and the United States with inquiries as to the correctness of this statement and in each case have told the facts, but this does not overtake the advertisements circulated by the promoters and others, as evidenced by Mr. Roberts' repeating the erroneous statement in the Sunday World.

"We have seen both Mr. Bellow and Mr. Edwards and they have admitted to us that neither of them ever received such an assay from Ledoux & Co. They claim that the sample was assayed for them by somebody else

and that it was 'an error' to couple our name with it. We have asked the company promoting the chief enterprise in that section to cease using this false report, but apparently it is difficult to bring about.

"We do not know whether there is any gold in that section or not, and would not intimate that there is no gold there, but feel that it should be publicly known that, in so far as investments and the rash of prospectors have been influenced or may be influenced by a statement that Ledoux & Co. have assayed such a sample, the truth should be known."

A Delight

That millions have discovered
Whiter, cleaner, safer teeth

Look about you—note the prettiest teeth you see. Note how people smile to show them.

Think what added beauty those lovely teeth have brought.

And now you can clean teeth in a new way. You will use it when you smile. This is to offer a ten-day test so you may find it out.

That dingy film

Teeth are coated with a dingy film—that vicious coat you feel. It clings to teeth, enters crevices and stays.

Stains, etc., discolor it, but it forms cloudy coats. Tarter is based on film. That's why teeth lose lustre.

Film also holds food substance which ferments and forms acid.

It holds the acid in contact with the teeth to cause decay. That's why tooth troubles were almost universal.

Germs breed by millions on film. They, with tartar, are the chief cause of pyorrhea, now so alarmingly common.

Film coats left

Old brushing methods left much film intact. No ordinary tooth paste effectively combats it.

So dental science sought for film combatants, and eventually found two. One acts to curdle film, one to remove it, and without any harmful scouring.

ABLE authorities proved these methods effective. Thus a new type tooth paste was created, based

No Cost
This test is free
See coupon

Avoid Harmful Grit
Pepsodent curdles the film and removes it without harmful scouring. Its polishing agent is far softer than enamel. Never use a film combant which contains harsh grit.

on modern research. Those two great film destroyers were embodied in it.

That tooth paste is called Pepsodent. Now it has come into world-wide use, largely by dental advice.

Other effects

Pepsodent also multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

Those are vital tooth protectors. Soapy tooth pastes weaken them. That's one reason why they failed. Pepsodent multiplies their power.

Watch the change

The way to know is to make this test. Judge by what you see and feel. It will be a revelation.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the vicious film. See how teeth, whitened as the film-coats disappear.

Then you will realize how important this is to the people in your home. Cut out coupon now.
