

REOPENS MINES IN BRUCE COUNTY

Zinc Properties Again Producing High-Grade Ore.

WAR IS REAL REASON

Increase in the Metal Prices Makes Possible Resumption of Operations.

One effect of the war has been an unprecedented increase in the price of metals. This has meant much to Canadian miners, and those interested in the production of minerals. Not only is this true of the bigger mining districts of Canada, but it is being brought home close to London, in the Western Ontario peninsula.

Up in Albenaria Township, Bruce County, at the very bottom of the Bruce Peninsula, the Albenaria Zinc Company has reopened its zinc mine, and is again shipping ore to the states to be smelted. Three years ago, Dr. S. Woolverton, geologist and dentist, of this city prospected the entire peninsula and located the Albenaria mine. Some little ore was dug out then and shipped away, but the prevailing low prices for zinc (only seven cents a pound) made it unprofitable to work the property. Now the price has advanced to 30 and 35 cents a pound, and shipping has again commenced. Last week two and a half tons of ore were shipped to a Chicago smelter, and \$40 a ton for the raw ore was paid on delivery. Under W. H. Walker, a British Columbia mining man, the work is progressing, and more ore will be sent out at once.

WANTED ASSISTANCE; GOT SUMMONED

Londoners are interested in the Albenaria Company, and in the syndicate, which owns 50 acres adjoining the company's 50. Lack of extensive working capital prohibits any great amount of mining, and the ore is simply being taken from the surface. From present indications, Dr. Woolverton believes the zinc vein to be a large one, and he is optimistic as to the success of the mining possibilities of this section of Western Ontario.

The rock formation, in which the Albenaria zinc is found, is magnesium limestone, of the same type as every other zinc mine in the world. However, unlike the other Canadian zinc fields, the product is zinc sulphide, known as zinc "blend," and is free from iron ore lead.

According to the locator of the mine, there are no other traces of zinc in the entire peninsula. The territory is located in what is known as the Niagara escarpment, and is the same as that in which the zinc mines of Wisconsin, Illinois, Iowa and the lower Mississippi district are found. Unlike these others, however, the zinc ore is found on the surface in Bruce. In the other districts it is covered by many feet of "drift."

Construction of a zinc smelter at Weiland, which is to open this fall, increases the possibilities of the Western Ontario field. From the assay tests that are expected, it is believed that a much higher price than \$40 per ton will be paid, and if such is the case, general development throughout the district is expected.

ENGINEERS TO RECRUIT UNIT

Pioneer Company From 1st Division To Be Raised Through 7th Field Co.

RECRUITING CAMPAIGN

Special Sergeants Will Be On Duty to Look After Men.

Recruiting for the company of the 2nd Pioneer Battalion, which is to be raised in Militia District No. 1, will start at once through the 7th Field Company, Canadian Engineers. One of the officers of the company has transferred to the new overseas unit, and will be in charge of the 1st Division Company recruits.

Special arrangements are now being made for a recruiting campaign for pioneers. Handy men generally are wanted for this unit, which will act as general constructors for the armies in the field. Each army division of the Canadian forces will have a battalion of pioneers attached to it. The duties of these special battalions will be many. They will repair telephone lines, construct trenches, roads, earthworks, and so on. Mechanics of all kinds are desired to enlist in the unit.

Special recruiting sergeants from the Engineers' Company will be appointed at once to look after recruits to the new battalion.

The case against Albert Bayless, charged with driving an overcrowded jitney, was dismissed without costs in police court today, although Chief of Police Williams pressed for judgment against Bayless.

The head of the police department declared he had seen Bayless on Richmond street with eight passengers in his seven-passenger car. Bayless, speaking in his own defence, admitted to the court that there were more than the regulation number of passengers in his car, but that he had asked several to get out and that they had refused. He had then driven his motor toward the traffic officer on the corner, thinking he would order the men to leave the machine. It was then, he stated, that his number was taken, which resulted in his appearance in court.

CARRANZA VICTORIES

Washington, Sept. 14.—Carranza forces have defeated bandits in three battles in the last three days between Orizaba and Vera Cruz. The isthmian railroad at Orizaba, state department reports, is being guarded by 5,000 troops.

NORMAL REOPENS; CLASSES START

Pupils Down To Grind of the Year's Work Already.

NUMBER IS UNKNOWN YET

Full List of Pupils Is Not Yet Known—The Rush Is Still On.

After having been closed during the summer holidays, the Normal School reopened for the fall term this morning. While no attendance figures had been compiled at noon, Principal Radcliffe declared that the number enrolled for the ensuing year would greatly exceed last year's aggregate.

All classes were launched into the term's work this morning, no time being lost in grasping the preliminaries. The teachers are all in their places, and indications point to a successful year. Only one addition has been made to the teaching staff. Mr. Hoffer of Toronto will act as science master and will also take several classes in geography.

Although the term is now under way, prospective pupils are still registering for the year's work. The preparing of registration papers is providing unlimited work for the office staff, and until there is a noticeable falling off in the string of applicants for entrance to the school it will be impossible to form more than an estimate of the number whose names will appear on the roll. "Everything is running smoothly," declared Principal Radcliffe. "We are handicapped through the absence of our secretary because of illness, and for that reason will not be able to compile attendance figures for a few days. The classes are well filled and work is well under way."

GERMAN SUBMARINE HALTS NORWEGIAN SHIP AND TAKES ENGLISHMAN

Christiania, Sept. 14.—Via London, 12:08 p.m.—The latest exploit of a German submarine is the halting of a Norwegian vessel and the seizure by a boarding party of a British subject, who was carried off a prisoner. This incident is reported by the captain of the steamer Besheim, from whose ship the Englishman was taken. The Norwegian legation at Berlin has been instructed to lodge a protest.

Exhibition Ladies' Ready-To-Wear Garments This Week

In the creation of fashions, as in everything else, there is "class" distinction—the good, better and best. Styles that we know to be superlative, laid out by master designers, and fashioned by the most skilled hands, have arrived just in time for Exhibition week, and are in the departments today for your inspection. Big as is the task of gathering such a vast amount of new apparel every season, this is a matter, after all, of organization, of output, of our power to absorb quantities. More important still is the problem of so knowing the style situation from every end—that we may justify your confidence as being unerringly correct and instantaneous with the vital style changes. This week the fashion sections of the store are loaded with the best and newest, each section being nothing less than a separate, complete exposition of authentic new fashions for the wear and adornment of a style-particular clientele. We mention briefly today in this space a few of the new exhibits:

Hosiery Is Much in Evidence

Therefore it must be considered as an important detail of dress. These days Milady's stockings most nearly always are silken, or silk lisle, resembling silk, must very often match her footwear or dress, but strange caprice of fashion, need not match both, and most always are of superior quality, both because of appearance and serviceability.

At Less Cost---

There's more nutritive value that the system will absorb in Grape-Nuts than in either meat or bread.

A remarkable fact. Weight for weight, a package of Grape-Nuts supplies one-third more nourishment than a roast of beef and at about half the cost. A roast of beef is about twenty per cent waste and there is a shrinkage in cooking. Grape-Nuts comes ready cooked—and not a crumb need be wasted.

Think it over! Then there's bread—white bread lacks certain elements essential to building brain and body. Why? Because in milling white flour, four-fifths of the precious mineral content (all important for health and life) is thrown out with the brancoat of wheat, to make the flour look white and pretty.

Grape-Nuts FOOD

not only supplies all the brain and bone building, nerve and muscle making phosphates of the wheat, but all the rich nutriment of roasted barley.

Besides, Grape-Nuts is easily digested—generally in about an hour—white bread and beef require about 2 1/2 hours.

Grape-Nuts comes in germ-proof, moisture-proof packages—ready to serve with cream or milk—a delicious ration, economical and highly nourishing.
