LONDON MONEY MARKET.

London, Feb. 28.—The market for American securities ruled irregular, and without decided features, and with very little doing. The closing was dull. Spanish fours closed at 67%. The amount of bullion taken into the Bank of England on balance to-day was £16,000.

Rand mines, 37%; Grand Trunk, 8½; Anaconda, 8¾.

The markets here opened very quiet to-day. They were also dull but improved on the news of Buller's progress. No public business realized, however; none is expected until Ladysmith is relieved. Paris and Earlin were idle. Americans were good throughout the session. A blind tip on Atchison issues, particularly common, was current. New York sold early, but turned buyer on Southern Railway, lifting the market to the best points. The bank bought £15,000 gold in bars. The week's influx was £362,000. Money was in demand. A small sum due the bank was repaid this morning, but in the afternoon there was heavy fresh borrowing, estimated at £1,500,000. Continental exchanges were unaltered. LONDON MONEY MARKET.

## Dr. Sanden's Electric Belts

Give electricity, galvanic currents and magnetism combined, and supply an element in the treatment of nervous diseases, loss of vigor, rheumatism, etc., which cannot be obtained by taking Drugs and Medicines. Electricity is like oil, which lubricates the wornout machinery of the body, and without which there is no progress. Like oil, it costs very little compared with the good that it does. Electricity is the only means by which strength can be attained. A pocket edition of the celebrated electro-medical work, entitled
