THE RAINBOW. TRIUMPHANT arch, that fill'st the sky When s or as prepare to part, I ask not proud philosophy

To teach me what thou art. Still seem as to my childhood's sight. A midway station given, For happy spirits to alight Betwixt the earth and heaven,

Can all that optics teach unfold Thy form to please me so, As when I dreamt of gems and gold Hid in thy radiant bow ?

When science from creation's face Enchantment's veil withdraws, What lovely visions yield their place To cold material laws!

But words of the Most High, Have told why first thy robe of beams When o'er the green undeluged earth Heaven's covenant thou didst shine,

How came the world's grey fathers forth

And yet, fair bow, no fabling dreams,

To watch thy sacred sign! And when its yellow lastre smil'd, O'er mountains yet untrid, Each mother held aloft her child,

To bless the bow of God. Methinks thy jubilee to keep, The first-made anthem rang On earth delivered from the deep,

How glorious is thy girdle cast O'er mountain, tower and town, Or mirror'd in the ocean vast, A thousand fathoms down.

And the first paet sang.

As fresh in you horizon dark. As young thy beauties seem, As when the eagle from the ark First sported in thy beam.

For, faithful to its sacred page, Heaven stil rebuilds thy span, Nor lets the type grow pale with age, That first si oke peace to man.
