The LUNKENHEIMER

Suitable for all movable bearings, is simple and practical in construction and can be filled without detaching plug. Glass sides show stage of oil. Attach cup so that the glass sides are parallel with the rod. When cup is in motion the oil begins to travel in a body within the cup, and at each revolution is thrown against the feed tube and flows down through it to the bearing. The centrifugal force, com-

bined with the shape of the body, carries the oil to the holes in the feed tube. A trial solicited and satisfaction guaranteed. Write for catalogue of superior brass and iron steam specialties. Specify "Lunkenheimer" make and order from your dealer.
