

Lincoln College, Oxford, and an authority on Economic Subjects.

Arrangements are in the course of being made for the Jubilee Week, June 23-27.

Some of the Examination Days of the Lent Term the Principal spent in Montreal. He preached at the Cathedral (twice), also at Trinity, St. John's and Grace Church, besides giving several addresses.

Easter Week found him in Toronto, celebrating and preaching once in St. Stephen's Church for the Rev. A. J. Broughall, M.A. On April 17th, Dr. Adams read a paper before the Dominion Educational Association, of which body he was elected a Director. The Principal also visited Hamilton, being the guest of the Bishop of Niagara. Here he met very happily Bishop Dunn and party.

A Week in Lent by our Bishop.

On Thursday, March 7th, after giving an instruction to a crowded gathering in the little Domestic Chapel, at Bishopsthorpe, Quebec, I crossed the St. Lawrence late in the afternoon and waited at Levis for the departure of the evening train, which landed me at midnight at Danville. Here I was met at the depot by the Rev. T. Blaylock, and after a little refreshment at the Rectory, we were soon all at rest.

The next morning was spent in examining and comparing the several sites prepared for the erection of the new Danville Church; and after dinner at the Rectory, on a most lovely afternoon, I was driven by Major Bernard, in his double seated sleigh, with the Rev. James Hepburn and several ladies, about ten miles through a grand country, abounding in glorious views, from Danville to Richmond. Here the ladies of St. Anne's Church had arranged a quiet parish tea, after which I gave a long promised Lecture on the Reformation period of the History of our dear English Church, shewing towards the close for the sake of a large number of patient young friends a goodly number of beautiful pictures and views.

On Saturday morning, after spending the night at the Honorable C. A. Aylmer's, leaving Richmond by the morning train, I spent a few pleasant hours at the ever welcoming home of

Dr. and Mrs. Heneker and then proceeded by the C. P. R. afternoon train to Agnes, Lake Megantic, where I was most kindly received, as I had been two years ago, by Mr. and Mrs. Stearn.

Sunday morning was alas! dark with snow storm, and it looked as if we were to have a hard day. But it was not so, for before Church time the storm, although it had somewhat drifted the roads, was over, and we had a large and attentive Congregation at the pretty little Agnes Church, where after baptizing a dear little child, I was permitted to confirm four Adults presented by Mr. Almond, the Bishop's College Lay Reader in charge, under the direction of the Rev. H. A. Brooke of Scotstown. After the Confirmation there was a celebration of the Holy Communion, at which thirty received the Lord's Supper, the largest number since we began our work there. After dinner, with Mr. Stearn's good horse and sleigh it was no hard matter to drive eight miles out to Ditchfield, where, "away in the bush," I found another large Congregation gathering from the ranges far and near. We had a most earnest Confirmation, with five confirmed; and after Service a short conference of the leading men, at which they agreed to do more to support the Church than heretofore.

In the evening the Church at Agnes was again well filled, and after Service we had a really warm and interesting Parish meeting, at which the leaders of the place agreed, that if the Bishop would send them a resident Minister, they would meet the \$300 a year, which the Bishop is now spending upon the Agnes work by sending a Lay Reader week by week from Bishop's College, by themselves raising \$300 a year in order to make up the Clergyman's stipend.

With this glad fact in my mind, after paying one or two friendly visits, before and after service, and then getting a good night's rest, I bade adieu to my host and hostess and was early on Monday morning on the train to stop off at Scotstown and to drive with the Rev. H. A. Brooke to Lingwick. The road was greatly drifted and there were evidences of more than one upset on the previous day; but the snow plough had done its work early in the morning, and so we were able
