

SCIENTIFIC TRUTH

REGARDING THE FUNCTIONS OF AN IMPORTANT ORGAN.

Of Which the Public Knows But Little, Worthy Careful Consideration.

To the Editor of the Scientific American: Will you permit me to make known to the public the facts we have learned during the past 3 years, concerning disorders of the human kidneys and the organs which diseased kidneys so easily break down? You are conducting a Scientific paper, and are unprejudiced except in favor of TRUTH. It is needless to say, no medical Journal of "Cade" standing would admit these facts, for very obvious reasons.

H. H. WARNER & CO., Proprietors of "Warner's Safe Cure."

That we may emphasize and clearly explain the relation the kidneys sustain to the general health, and how much is dependent upon them, we propose, metaphorically speaking, to take one from the human body, place it in the wash-bowl before us, and examine it for the public benefit.

You will imagine that we have before us a body shaped like a bean, smooth and glistening, about four inches in length, two in width, and one in thickness. It ordinarily weighs, in the adult male, about five ounces, but is somewhat lighter in the female. A small organ, you say. But, understand, the body of the average size man contains about ten quarts of blood, of which every drop passes through these filters or sieves, as they may be called, many times a day, as often as through the heart, making a complete revolution in three minutes. From the blood they separate the waste material, working away steadily night and day, sleeping or waking, tirelessly at the heart itself, and fully of as much vital importance; removing impurities from sixty-five gallons of blood each hour, or about forty-nine barrels each day, or 3,125 hogshead a year! What a wonder that the kidneys can last any length of time under this prodigious strain, treated and neglected as they are!

We slice this delicate organ open lengthwise with our knife, and will roughly describe its interior.

"We find it to be of a reddish-brown color, soft and easily torn; filled with hundreds of little tubes, short and thread-like, starting from the arteries, ending in a little tuft about midway from the outside opening into a cavity of considerable size, which is called the pelvis or, roughly speaking, a sac, which is for the purpose of holding the water to further undergo purification before it passes down from here into the ureters, and so on to the outside of the body. These little tubes are the filters which do their work automatically, and right here is where the disease of the kidney first begins.

Doing the vast amount of work which they are obliged to, from the slightest irregularity in our habits, from cold, from high living, from stimulants or a thousand and one other causes which occur every day, they become somewhat weakened in their nerve force.

What is the result? Contention in stoppage of the current of blood in the small blood vessels surrounding them, which become blocked; these delicate membranes are irritated; inflammation is set up, then pus is formed, which collects in the pelvis or sac; the tubes are at first partially, and soon are totally unable to do their work. The pelvic sac goes on distending with this corruption, pressing upon the blood vessels. All this time, remember, the blood, which is entering the kidneys to be filtered, is passing through this terrible, disgusting pus, for it cannot take any other route!

Stop and think of it for a moment. Do you realize the importance, say the vital necessity, of having the kidneys in order? Can you expect when they are diseased or obstructed, no matter how little, that you can have pure blood and clean disease? It would be just as reasonable to expect, if a post-house were set across Broadway and countless thousands were compelled to go through its pestiferous doors, an escape from contagion and disease, and for one to expect the blood to escape pollution when constantly running through a diseased kidney.

Now what is the result? Why, that the blood takes up and deposits this poison as it sweeps along into every organ, into every inch of muscle, tissue, flesh and bone, from your head to your feet. And whenever, from hereditary influence or otherwise, some part of the body is weaker than another, a countless train of diseases is established, such as consumption in weak lungs, dyspepsia, where there is a delicate stomach; nervousness, insanity, paralysis or heart disease in those who have weak nerves.

The heart must soon feel the effects of the poison, as it requires pure blood to keep it in right action. It increases its stroke in number and force to compensate for the natural stimulus wanting in its endeavor to crowd the impure blood through this obstruction, causing pain, palpitation, or an out-of-breath feeling. Unnatural as this forced labor is, the heart must soon falter, becoming weaker and weaker until one day it suddenly stops, and death from apparent "heart disease" is the result.

But the medical profession, learned and dignified, call these diseases by high sounding names, treat them alone, and patients die, for the arteries are carrying slow death to the affected part, constantly adding fuel brought from these suppurating, pus-laden kidneys which here in our wash-bowl are very putrefaction itself, and which should have been cured first.

But this is not all the kidneys have to do; for you must remember that each adult takes about seven pounds of nourishment every twenty-four hours to supply the waste of the body, which is constantly going on, a waste equal to the quantity taken. This, too, the kidneys have to separate from the blood with all other decomposing matter.

But you say, "My kidneys are all right. I have no pain in the back." Mistaken man! People die of kidney disease of so bad a character that the organs are rotten, and yet they have never had a pain nor an ache!

Why? Because the disease begins, as we have shown, in the interior of the kidneys, where there are few nerves of feeling to convey the sensation of pain. Why this is so we may never know.

When you consider their great work, the delicacy of their structure, the ease with which they are deranged, can you wonder at the ill-health of our men and women? Health and long life cannot be expected when so vital an organ is impaired. No wonder some writers say we are degenerating. Don't you see the great, the extreme importance of keeping this machinery in working order? Could the finest engine do even a fractional part of this work, without attention from the engineer? Don't you see how dangerous this hidden disease is? It is lurking about us constantly, without giving any indication of its presence.

The most skillful physicians cannot detect it at times; for the kidneys themselves cannot be examined by any means which we have at our command. Even an analysis of the water, chemically and microscopically

reveals nothing definite in many cases, even when the kidneys are fairly broken down. Then look out for them, as disease, no matter where situated, to 93 per cent., as shown by after-death examinations, has its origin in the breaking down of these secretory tubes in the interior of the kidney.

As you value health, as you desire long life free from sickness and suffering, give these organs some attention! Keep them in good condition and thus prevent (as is really done) all disease. Warner's Safe Cure, as I have shown year after year better known for its wonderful cures and its power over the kidneys, has done and is doing more to increase the average vitality of life than all the physicians and medicines known; Warner's Safe Cure is a true specific, mild but certain, harmless but energetic and agreeable to taste.

Take it when sick as a cure, and never let a month go by if you need it, without taking a few bottles as a preventive, that the kidneys may be kept in proper order, the blood pure, that health and long life may be your blessing.

H. H. WARNER & CO.

THE NOVEMBER ELECTIONS.

Hewitt Elected in New York City by 59,000 Plurality - George Fellows an Immense Vote - First Returns from the Various States - The Gains About Evenly Divided.

NEW YORK, Nov. 2.—Probably no election that ever took place in this city has equalled in interest and magnitude the November elections throughout the city the election was the one topic of interest. The newspaper bulletins were watched by large crowds until the result of the votes for mayor were known. With one precinct missing Roosevelt, Republican, has 50,332; Hewitt, Democrat, 49,235; George, Labor, 67,639; and Wardell, prohibition, 574. Heavy crowds accompanied by a mass of friends, went to the twenty-third assembly district to cast his vote. He walked up to the man who was peddling labor tickets and after getting his ballots went up to vote. He was challenged by the Tammany "heeler" on the ground that he was not registered and had not resided in his district long enough to vote. George swore his vote in. It was claimed that he had been to Europe and thereby lost his residence. He swore that his family had resided in the state during his absence. It was discovered that inspectors had changed both his son's name and his own from George to Gorge, without authority, to defeat his voting.

RESULTS OF THE SEVERAL CONTESTS SO FAR REPORTED. BUFFALO, N.Y., Nov. 2.—Appended are the results of the voting in the several states yesterday, so far as heard from. Seventeen states elected governors, and seven other states officers of no importance. ALABAMA.—There was but little or no interest in the Alabama elections. The Democrats had but little opposition, and the state went almost by default.

CALIFORNIA.—Partial returns from California favor the election of Swift, Republican, as governor. FLORIDA.—The state, by returns to midnight, shows large Democratic gains. INDIANA.—Major reports received up to midnight show slight Republican gains.

IOWA.—Returns from Iowa are coming in slowly and scattered. They generally show slight Republican gains. ILLINOIS.—Scattered returns throughout Illinois indicate that the proposed amendments to the constitution, making it unlawful to let by contract the labor by convicts, has been carried by a large majority.

KENTUCKY.—Kentucky returns report the reelection of Speaker Carlisle and six others of eleven congressional delegates.

LOUISIANA.—All reports so far received show there was only a light vote, the Democrats having little or no opposition.

MINNESOTA.—Minnesota reports that the election has been the liveliest known in the state, an unusually large vote being polled. Indications are that Ames for governor and the entire Democratic state ticket are elected.

MASSACHUSETTS.—Massachusetts returns indicate the Republicans elect their governor by about 2,000 plurality. The Democrats gain two congressmen.

NEW YORK.—Republicans gain four Congressmen and lose one in New York State. The Legislature will be Republican. On the head of the ticket, for Supreme Court judge it is thought Daniels is elected over Peckham, Fenwick, but the contest is close, and no definite statement can be furnished on the matter returns at hand. "Richelieu" Robinson contested as an independent candidate for Congress and was hardly recognized in the voting.

NEW HAMPSHIRE.—Present indications are that no choice is made for Governor in New Hampshire, the popular vote, no candidate having a majority. The election will devolve on the Legislature where Republican gains give the Republicans a majority of 24 on a joint ballot.

NEW JERSEY.—New Jersey reports tend to show that Green (Dem.) is elected Governor, and the Legislature in doubt.

NORTH CAROLINA.—All reports from the State show large Democratic gains.

OHIO.—Minor State officers and twenty-one Congressmen.—For Secretary of State, John McBride, Dem.; James S. Robinson, Rep. The State shows considerable gains for Republicans over 1884, when Foraker was elected Governor by 18,000. Frank Hurd, Democrat, the free trade candidate for congress from Toledo district, is again defeated. Hovers carrying the seat by a large majority than at last election.

PENNSYLVANIA.—State officers, legislature, and twenty-eight congressmen, one on the general ticket. For governor, Channey F. Black, Dem.; James A. Beaver, Rep. Beaver carries the state for the Republicans for governor over 18,000.

SOUTH CAROLINA.—For governor, J. R. Richardson, Dem.; no Republican nominated. South Carolina elects the Democratic state ticket. The legislature will probably be, Democrats, 148; Republicans, 8, on a joint ballot.

TENNESSEE.—Returns to midnight are that the Democrats have carried everything. Nashville, Tenn., Nov. 2.—"Bob" Taylor, Democrat, is elected Governor by from 20,000 to 25,000 majority. There was a light vote throughout the state, but it showed Democratic gains in all districts.

WISCONSIN.—The reports up to midnight show small Republican gains. Governor Hank had been re-elected by about 18,000 plurality.

more, all the Congressional districts, and the Legislature. The report of the returns indicates "Bob" Taylor's majority for governor will reach 25,000. The legislature will be Democratic.

CHICAGO, Nov. 3.—From the incomplete reports outside of Chicago the Republicans appear to have an advantage, but the possibility of the election of two Socialist senators and several members of the House in Chicago placed the political complexion of the new assembly in doubt.

In Dakota Gifford (Republican) delegate to Congress, was re-elected by 3,000 majority. While the Republicans have lost votes on the delegates they have made gains in the Legislature.

CAPITAL GOSSIP. A YOUNG GIRL'S SUICIDAL TENDENCY—EXPERIMENTAL FARMS—REGINA AND LONG LAKE RR.—BREKIDING STATIONS IN THE N.W.

OTTAWA, Nov. 3.—The police have had placed in their hands a letter from a young girl named Agnes Saunders, up to the present employed in the coffee house here, which she wrote to a girl friend here, stating her intention of committing suicide by drowning in the Ottawa. She wills all her possessions to the girl friend. She says she suicides on account of misfortune which has come upon her and to save herself from incest, and she expressed bitter regret at having run away from her home and friends.

Ploughing on the central experimental farm, near this city, will likely be commenced shortly. Prof. Saunders proposes visiting Manitoba, the North-West and British Columbia this fall in order to select the sites of the other proposed experimental farms.

Mr. C. Fongles, president of the Regina, Long Lake & Saskatchewan railway, is in regard to matters affecting the road. There are already 25 miles of the railway built. It is the intention of the company to extend it to Prince Albert and Battleford.

Mr. John Lesser Key, who is at present in the city on his way home to England after a trip to the North-West, reports having been inspecting lands along the line of the Canadian Pacific Railway as the representative of a syndicate that intends to purchase different tracts of land along the railway with the intention of making them breeding stations for Clydesdale draught horses, sheep and cattle. The stations, it is proposed, shall be on the main line, he concluded on the principle of an English estate. He is satisfied with his visit, and thinks that for the above purposes the soil, grasses and water are excellent. The district where it is proposed to set up these stations is between Moosejaw and Calgary.

OTTAWA, Ont., Nov. 3.—It is reported that Desros, a Montreal man who was recently sentenced to be hanged at Lyton, British Columbia, with two other transients for the murder of a Minneapolis man named Dittman is insane. His sister-in-law has gone up to Lyton from San Francisco, to endeavor to secure a respite until his case can fully be gone into by the Dominion Government. She represents that Desros was for two years confined in Beacon Hill Asylum, Province of Quebec, where he was placed by his mother when he was seven years of age. He then wandered away from his home, and for eighteen years his friends heard nothing of him.

COMSUMPTION CURED. An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy cure of consumption, Bronchitis, Catarrh, Asthma and all the kindred Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. NOXES, 130 Power's Block, Rochester, N. Y. [11-100w]

A VOICE FROM CANADA. TO THE EDITOR OF THE NATION.

DEAR SIR,—I was very much pleased in reading the criticism in the Nation of the 25th ult. on Sir G. Gavan Duffy's last work. "The League of the North and South," and wish to compliment your reviewer on his courage in condemning the distinguished author's egotism and his consideration he has shown to those who may be differed from him. Some of these men were sagable and fully as honest patriots as himself, men who had terrible odds to contend against with very inadequate weapons, and no one knew this better than Sir Gavan himself; but ego, ego, ego, appears to be his motto.

I had seen a few chapters of that work in odd numbers of the Freeman's Journal sent me by friends, and was often indignant at the tone of some passages in them, and the sneers he so frequently indulged in towards many of the great and good men of the present, who are so ably, disinterestedly, and so far, so successfully working for poor Ireland. I hope he will profit by the lesson which your review has so ably and kindly given him. While on this subject, please let me say that I always read with great interest, and I hope with profit, the able reviews given every week in the Nation.

We have done a little here this summer for the Irish Parliamentary Fund. I was named general treasurer by the societies of Ontario, and remitted in July last over 3,000 dollars, and in a day or two will take a small remittance, amount since received in aid of the same fund.

Fellow as my voice is I gladly raise it in union with all my fellow-countrymen in the United States and Canada, in praise of the gallant band of Home Rule men who have so nobly "stood in the breach" against the charges of the enemies of the Irish people; they are deserving of all praise, and will occupy that bright page in Irish history which they so well deserve. Excuse this long letter, and believe me to be, dear sir, yours very sincerely,

EDWARD MURPHY.

Montreal, 8th October, 1886.

NERVOUS DEBILITATED MEN. You are allowed a free trial of thirty days of the use of Dr. Dye's Celebrated Voltaic Belt with Electric Suspensory Appliances, for the speedy relief and permanent cure of Nervous Debility, loss of Vitality and Menstruation, and all kindred troubles. Also, for many other diseases. Complete restoration to health, vigor and manhood guaranteed. No risk is incurred. Illustrated pamphlet, with full information, etc., mailed free by addressing Voltaic Belt Co., Marshall, Mich.

THE VATICAN AND ENGLAND. LONDON, Nov. 3.—Lord Denbigh, in a speech at Rugby yesterday, said that in a recent interview he had with the Pope the latter expressed his appreciation of the justice and toleration of the English Government, and said he would be glad to help England in Ireland, or wherever his influence extended, but he was unable to act because England had no representative at the Vatican to tell him her desires. Lord Denbigh said he thought the Government would do well to imitate Prince Bismarck in sending an ambassador to Rome, as the Pope could give material help in Ireland.

THE PACIFIC CABLE. THE TELEGRAPHIC PROJECT FROM ENGLAND TO AUSTRALIA VIA CANADA. LONDON, Nov. 1.—The draft of the proposals of the proposed Pacific Australian cable shows that the promoters contemplate asking for two million sterling, \$10,000,000, and expect to get a 6 penny rate across the Atlantic, and a 25 penny rate across Canada to Vancouver Island, and intend charging the public 4 shillings per word from England to Australia, and the press a shilling. They purpose raising one million in £10 shares and one million in 4 per cent. stock, secured on an expected Imperial-Canadian guarantee of £100,000. It is hoped that Canada will contribute £12,000, Australia £38,000, and the Imperial exchequer £50,000. The promoters talk of earning a net profit straightway of £150,000. The project is generally regarded as much too sanguine. The only actual promise yet made comes from Hawaii, of \$20,000 annually. Canada may offer a subsidy, but neither the Imperial nor Australian Governments exhibit much eagerness.

TRY IT. Two of the most troublesome complaints to relieve are asthma and whooping cough, but Haggard's Pectoral Balm seldom fails, either in those or other prevailing throat and lung troubles. All dealers in medicine have this remedy for sale.

A SPEEDY ARREST. AN ALLEGED ENGLISH DEFAULTER TAKEN INTO CUSTODY AT QUEBEC.

QUEBEC, Nov. 2.—Chief Sherwood, of the Dominion police force, and Sergeant Harpe, of the provincial police, succeeded in arresting an Englishman named Lyndon, who was wanted on the other side of the Atlantic, and who was a passenger from Liverpool by the last mail steamer. The prisoner is accused of having attempted to defraud his creditors by selling his property in England and leaving for Canada with the proceeds. Lyndon had taken passage on board the steamer under the name of King, and was accompanied by his wife and two children. It was principally this latter fact that enabled the police officers to identify him. Lyndon takes his arrest quite calmly and says that he is guilty of no offence for which he can be held in this country. The prisoner's personal effects were searched for money, but only nine pounds sterling was found on him. In his baggage, however, was discovered a quantity of dutiable goods which had not been entered at the customs, and which were, therefore, seized by the customs officers. The prisoner was lodged in Quebec jail.

A WIDE RANGE. A wide range of painful affections may be met with Haggard's Yellow Oil. James M. Lawson, of Woodville, Ont., speaks of it in high terms for rheumatism, lame back, sprains and many painful complaints too numerous to mention. It is used internally or externally.

A CURIOUS CASE. A WALKERSON JURY DECLARE THAT BEE KEEPING IS A PUBLIC NUISANCE.

WALKERTON, Nov. 2.—An exceedingly interesting case was tried here at the Assizes to-day before Judge O'Connor. One McIntosh, of Southampton, applied for an injunction to restrain his neighbor, Harrison, from keeping bees. It appears that Harrison has about eighty hives of bees, which were flying over the neighborhood and were a great nuisance, especially to the plaintiff who is a blacksmith, they flying about his shop and stinging customers' horses. They were also very troublesome when making preserves, swarming around McIntosh's kitchen in large numbers. The jury brought in a verdict that they were a nuisance and that the plaintiff was entitled to an injunction. Judge O'Connor said it was a novel case, and he would not grant the injunction, but reserved it for argument in the full court. The case was keenly contested and lasted from 1 o'clock yesterday till 3 this afternoon. A very large number of witnesses were examined, many of whom were brought from a distance by the defence.

A RADICAL CHANGE. Daniel Sullivan, of Malcolm, Ont., takes pleasure in recommending Bardon's Blood Bitters for dyspepsia. It cured him after years of suffering. From being a sceptic he is now a confirmed believer in that medicine.

CHOOSING CANDIDATES. PREPARATIONS FOR THE COMING BATTLE ON DOMINION ISSUES—HON. MR. BOWELL RENOMINATED.

MADOC, Nov. 2.—About one hundred delegates were at the Conservative convention here to-day, there being a full representation from all parts of the riding of North Hastings. Mr. Bowell for the Commons and Mr. A. F. Wood for the Legislature were nominated by acclamation. Hon. Geo. Foster, minister of marine and fisheries, and Hon. Mr. Bowell delivered addresses in the Masonic hall to a large audience.

Holloway's Ointment and Pills.—Colds, Coughs, Shortness of Breath.—These maladies require early and unremitting attention, for if neglected they often end in asthma, bronchitis, or consumption. The Ointment well rubbed upon the chest and back, penetrating the skin, is absorbed and carried directly to the lungs, whence it expels impurities. All the blood in the body is perpetually passing through the lungs, and there all noxious particles tending to disease can be quickly, thoroughly and permanently neutralized, rendered harmless, or ejected from the system. Holloway's Ointment and Pills perfectly accomplish this purification; and through the blood thus cleansed, the influence of these wonderful medicaments reaches the remotest parts of the human body, and thus cures all diseased action, whether internal or external.

A PECULIAR CASE. ONSET BAR, Mass., Nov. 2.—Commander B. F. Chandler, retired officer of the United States Navy, on Wednesday last was prostrated by a stroke, and after suffering great pain for five days he relapsed into coma and appeared dead on Sunday. He was laid out as dead and the undertaker was sent for, and as he was preparing to embalm the body of the old sailor the supposed corpse exclaimed: "What's all this fuss? opening his eyes and sitting up." The undertaker dropped his instruments and chemical, "I want something to eat," was the next exclamation of the old officer. An oyster stew was provided and the Captain ate heartily. That night he slept well, and his physician, who, it is said, pronounced him dead, was sanguine of his recovery. Yesterday afternoon, however, the ex-commander was prostrated again by a shock more severe, from which he was unable to rally. His heart became still, and the physician and his friends now are satisfied that the old sailor officer is dead.

There is no one article in the line of medicines that gives so large a return for the money as a good purgative. Haggard's Pectoral Balm, such as Haggard's Sore Wood and Hollidowne Balm, etc.

BRITISH TRADE IMPROVING. MIDDLEBOROUGH, Nov. 2.—The returns for October show the largest shipment of iron and steel since September, 1885. The shipments of pig iron amounted to 84,322 tons, of which 46,000 tons went abroad. The shipments of manufactured iron amounted to 41,717 tons, of which 29,000 tons went abroad. Germany and Russia each took 13,000 tons of pig iron. The customs receipts for the year ended March 31 show a decrease of £806,323. The receipts from coffee imports decreased £1,975. The commission on coffee that the falling off in the coffee receipts is due to the notorious adulteration of this article. The receipts from tea, rum and brandy also show a large reduction.

Amos Hudgn, of Toronto, writes: "I have been a sufferer from dyspepsia for the past six years. All the remedies I tried proved useless until Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure was brought under my notice. I have used two bottles with the best results, and only with confidence recommend it to those afflicted in like manner."

"This but a faded flower," sang Mrs. Jones at luncheon, when Jones complained that the b'auvets were stale.

N. McRae, of Wyebridge, writes: "I have sold large quantities of Dr. Thomas' Electric Oil. It is used for colds, sore throat, croup, etc., and, in fact, for any affection of the throat it works like magic. It is a sure cure for burns, wounds, and bruises."

An Irishman, writing a sketch of his life, says that he ran away early from his father because he discovered he was only his uncle.

Mrs. O'Hara, of River street, Toronto, uses Dr. Thomas' Electric Oil for her cows for cracked and sore teats. She thinks there is nothing like it. She also used it when her horses had the Epizootic with the very best results.

The most modest man ever heard of was in a rowboat in a storm. He got swamped and drowned because he refused to hug the shore.

GO AS YOU PLEASE. but if you are constipated, or have sick headache, bad taste in the mouth, rush of blood to the head, bilious complaint, or any similar difficulty, you should go at once to your druggist for Dr. Pierce's "Pleasant Purgative Pellets," the most efficient means for eradicating it, by correcting all disorders of the liver, stomach and bowels. Small, sugar-coated, agreeable to take, and cause no pain or griping. By druggists.

"We want a circus, and we want it bad," sighs a Western paper. We would suggest that the editor call the owner of the opposition sheet a horse thief.

A Most Liberal Offer. THE VOLCANO BEER CO., Marshall, Mich., offer to send their Celebrated Voltaic Beers and Electric Appliances to thirty days' trial to any man afflicted with Nervous Debility, Loss of Vitality, Manhood, etc. Illustrated pamphlet in sealed envelope with full particulars mailed free. Write them at once.

Butcher (to young housekeeper)—"I have nothing left, mum, but a hind quarter of lamb, and liver." Young housekeeper—"Very well, you may send me a hind quarter of liver."

Mother Graves' Worm Extirminator is pleasant to take. Sure and effectual in destroying worms. Many have tried it with the best results.

The superiority of nature to nature is continually illustrated. Nature needs an immense quantity of quills to make a goose with; but a man can make a goose of himself with one.

Why go limping and whining about your corns when a 25-cent bottle of Holloway's Corn Cure will remove them? Give it a trial and you will not regret it.

Free and easy expectation immediately relieves and frees the throat and lungs from viscous phlegm, and a medicine that promotes this is the best medicine to use for coughs, colds, inflammation of the lungs, and all affections of the throat and chest. This is precisely what Dickie's anti-Consumptive Syrup is a specific for, and wherever used it has given unbounded satisfaction. Children like it because it is pleasant. Adults like it because it relieves and cures the disease.

BIRTH. GALLAGHER.—At 40 Alexander street, on October 29, Mrs. James Gallagher, of a son.

MARRIED. MULDOON-NEVILLE.—At Ottawa, on the 2nd inst., by the Rev. James Whelan, M. H. Muldoon, of Montreal, to Annie T. Neville, of Ottawa. 107 1

LANE-EVOY.—At St. Patrick's Church, Quebec, on the 25th inst., by the Rev. Father McNamee, C.S.R., Patrick E. Lane to Margaret Ann Evoy, both of that city.

DIED. HAMILTON.—In this city, on the 30th ult., John Hamilton, aged 87 years.

O'BRIEN.—At 435 Wellington street, on Oct. 31st, Daniel, aged 23 years and 8 days, son of the late P. O'Brien, of H. M. S.

BOYLE.—In this city, on the 14th inst., of inflammation of the lungs, Michael Boyle, aged 27 years, son of Henry Boyle, late of Quebec.

WALSH.—In this city, on the 4th inst., Catherine Walsh, aged 44 years, a native of County Kerry, Ireland.

MOONEY.—On Sunday, Oct. 31st, "Little May," aged 5 months and 23 days, infant daughter of H. Mooney.

SWEET.—In this city on the 30th inst., Marie Louise, aged 3 years and 4 months, beloved and only daughter of R. G. Sweet.

HARKIN.—In this city, on October 31st, Michael Harkin, a native of the County Leitrim, Ireland, aged 72 years and 1 month.

QUINN.—This morning, at the residence of her aunt, Miss S. A. Patterson, Maund, aged 10 years, daughter of the late J. Quinn, of Quebec.

FLYNN.—In this city, on Wednesday, 27th inst., Edith Jane, aged 7 years and 11 months, beloved daughter of J. P. Flynn, Road Inspector.

CUMMINS.—On Tuesday morning, 2nd November, Margaret McAnnany, aged 62 years, relict of the late Redmond Cummins, a native of Baron's Court, County Tyrone, Ireland.

MCINERNEY.—In this city on the 3rd inst., Elizabeth O'Rourke, aged 66 years, beloved wife of James McInerney, a native of King's County, Ireland.

MOHAHON.—In this city, on the 1st of November, John McMahon, aged 70 years, brother of Michael and Edward McMahon, of St. Maurice street.

HAGAN.—On the 3rd November, 1886, Rose Hagan, aged 24 years and 4 months, daughter of the late Patrick Hagan, of the County of Armagh, Ireland.

TURNER.—At St. Gabriel's Village, October 29th, Susan Cook, aged 75 years and 3 months, relict of George Turner, and mother of Elizabeth and John Turner, grocers, St. Gabriel's Village.

HOGAN.—On the 26th inst., at 9 St. John's street, St. Julia street, Quebec, Catherine Devney, beloved wife of John Hogan, of H. M. Customs.

ROYAL BAKING POWDER Absolutely Pure. This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the adulterated. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall St., N.Y.

JOHNSTON'S FLUID BEEF! The only preparation of the kind containing entire nutritious constituents of the Beef. ASK YOUR GROCER OR DRUGGIST FOR Johnston's Fluid Beef. And don't let extracts of meat, which have no nutrition, be palmed off on you.

CURE FITS! When I say cure I do not mean merely to stop the pain for a time and then have them return again. I mean a radical cure of FALLING SICKNESS—a life-long cure. Remedy to cure the worst cases. Because others have failed, I have tried many other remedies, but I have found only one for a certain and a Free Bottle of my Infants' Remedy. Give it a trial, and I will cure you. Address Dr. H. G. Root.

\$5 TO \$8 A DAY. Samples and full terms sent under the horses' feet. W. BARNWELL'S HARRY RAIN HOLDS OF HOLLY, Mich.

BABY'S BIRTHDAY. A Beautiful Imported Birthday Card sent to any baby whose mother will send the name of the baby and the date of the birth. Also a beautiful portrait of the baby. Write to W. B. Barnwell, 4-G.

Illustrative Sample Free SELF-PRESERVATION

HEAL THYSELF! Do not expend hundreds of dollars for advertised patent medicines, as a dollar's bottle and French your system with dangerous poisons the blood, but purchase the Great and Standard Medical Work entitled SELF-PRESERVATION. Three hundred pages, substantial binding. Contains more than one hundred invaluable prescriptions, embracing all the vegetable remedies in the Pharmacopoeia, for all forms of chronic and acute diseases, beside being a Standard Scientific and Popular Medical Treatise, a Household Pharmacy in plain wrapper.
