

NEW MASSEY-HARRIS COMBINED HOE DRILL AND BROADCAST SPRING TOOTH SEEDER.

POSITIVELY THE LIGHTEST, THE STRONGEST, AND THE BEST COMBINED MACHINE YET PRODUCED.

All Steel. * Neat in Appearance. * Mechanical Principles Unexcelled.

It represents the best features of the "Wisner," the "Goldfinder," and the "Superior," together with some valuable new features.

CONSOLIDATED IN ONE MACHINE.

The perfecting of this tool has taken two years of arduous labor on the part of our inventive staff.

IT IS ANOTHER ILLUSTRATION of the advantage of the organization of Massey-Harris Co., Ltd., for otherwise the construction of this admirable implement would have been impossible.

It is but the work of a few moments to replace the hoes with spring teeth, or *vice versa*.

The machine can be instantly changed from "drill" to "broadcast," or *vice versa*.

Hoes or Teeth can be instantly set zig-zag or straight, as needed.

The method of applying the pressure for regulating depth of sowing is simply perfection.

Reversing the pressure lever throws the machine out of gear and lifts the hoes for transportation.

The self-adjusting sowing feed run will sow all kinds of seed without clogging, and will sow accurately, as to quantity, with the index finger, in any desired amount.

Patents for this machine are held by Massey-Harris Co., Ltd., in connection with their other inventions, and any unauthorized use or imitation will be vigorously prosecuted.
