

I held the series of football lectures during the month of February, that I might have all my work cleared up before leaving.

If you will look up all my previous notices of appointment previous to the one I received for the past year you will find that my appointment was as Football and Hockey Coach. These were the conditions under which I originally agreed to enter Department of Physical Education. I know that you have tried to place a different interpretation on my duties but I can assure you that I can verify my statement that I was originally engaged as Hockey and Football Coach only, and as such you will find my name set down on the calendar of the University.

If I had had any idea that there would be a misunderstanding I certainly would have taken up the matter with you before leaving and could have brought evidence before you showing that my position in this matter is correct, but I thought that our conference last Spring had settled this matter as I was sure you knew of my appointment of Manager of the Syracuse Club as there certainly was no secret about it and I had taken up the matter with the Student-Members of the Football Club, including the Captain, and also the Secretary of the Students' Council.

I hope this letter will clear the situation as it would grieve me very much to do anything that would cause the Principal and yourself to think that I deliberately did anything that was not right.

Sincerely yours,

Frank Shaughnessy.
