

FLASHES OF FUN.

Mrs. Brown moved away because her neighborhood watched everything she did. Well, if Mrs. Jones moved away because she didn't get attention enough.

He-O! you. I have heard him sing. I admire him very much. She-Really, you don't mind it? Why, his voice is awful. He-it isn't his singing I admire it's his nerve.

I love the man who always late. Although he makes me late to wait; Yes, though he costs me time and pain.

"Are you the nephew of that same Mr. Dorman?" asked Lord St. Just. "Will you wait, sir, one moment?"

"What picture?" he asked, wondering. "A picture of a broad stone terrace, with roses and passion flowers climbing the balustrade, and a dark wood in the far distance. I have dreamed it-I have such strange dreams. I cannot tell you if my uncle ever lived at Lancelwood-I never heard speak of England at all."

"That is the doctor," said the boy. "It is his ring. Shall I fetch him in here?" He will tell you directly who I am.

"No," replied Lord St. Just, quickly. "Let the mystery-the secret-be what it might, he would have no use for his latest breath even. 'No, it is not needed,' he continued. 'I called to see the doctor and to take this lady home, I will come again-it is growing late.'"

"Will you come again," said the boy appealing to Vivian. "Yes," she replied, faintly. "I will always be your friend. I shall come again."

Lord St. Just saw the boy hold up his face, as though Vivian were in the habit of embracing him. He could not help but smile at her. "What am I to do," she cried, with clenched hands and trembling lips. "What can I do? I will die rather than yield."

Through Storm and Sunshine

CHAPTER XLVII.—Continued.

"What name was that you used, sir?" "Lancelwood," repeated the peer. "Lancelwood!" said the boy eagerly. "I come to think of it, there is a novel of such a name-I believe I have-or I have heard it somewhere? Lancelwood-Lancelwood-how familiar it sounds!"

"Are you the nephew of that same Mr. Dorman?" asked Lord St. Just. "Will you wait, sir, one moment?" "What picture?" he asked, wondering.

"That is the doctor," said the boy. "It is his ring. Shall I fetch him in here?" He will tell you directly who I am.

"No," replied Lord St. Just, quickly. "Let the mystery-the secret-be what it might, he would have no use for his latest breath even. 'No, it is not needed,' he continued. 'I called to see the doctor and to take this lady home, I will come again-it is growing late.'"

"Will you come again," said the boy appealing to Vivian. "Yes," she replied, faintly. "I will always be your friend. I shall come again."

Lord St. Just saw the boy hold up his face, as though Vivian were in the habit of embracing him. He could not help but smile at her. "What am I to do," she cried, with clenched hands and trembling lips. "What can I do? I will die rather than yield."

"He went up to her and took both her hands in his. 'Vivian, my beloved,' he said, 'this is the first cloud that has become between us-the first shadow that has arisen. Darling, it must not continue-we must end it.'"

"I am quite willing," he said, touched by his tenderness. "It would be easier for flowers to live without sunshine and dew, than for me to live at variance with my wife," he remarked gravely.

"Then we will not be at variance," she said. "Yes, my darling, I must say what I think. Ah, Vivian, there has always been a sealed sinner in your heart, a secret kept from me. I can trace it through your life. It was that which, prying on your mind, has lately changed your whole character-it is that secret you whisper in your sleep, and over which you brood continually in your waking hours. What the time has come when I must know what it means-what it is."

What Will Paint Do? A little paint properly placed will make a fine house out of an old one. It will take away the dingy, tumble-down appearance, and make it look fresh and new.

RAMSAY'S PAINTS Will add to the value of the house and to the pleasure of living there. They are pure paints and will wear longer than any other. Ask your dealer.

A. RAMSAY & SON, 1845 1846. MONTREAL, Paint Makers.

STATISTICS OF NEWSPAPERS. The total number of copies of newspapers printed throughout the world in one year is 12,000,000,000. To print these requires 781,340 tons of paper, of 1,749,977,000 pounds, while it would take the fastest press 333 years to print a single year's edition of which would produce a stack of papers nearly 50 miles high.

STEEEL PENS. More steel is used in the manufacture of pens than in all the sword and gun factories in the world. A ton of steel produces about 10,000 gross of pens.

FOR OVER FIFTY YEARS. MR. WINDLOW'S SOOTHING STRENGTH has been used by mothers for their children's teething troubles. It soothes the pain, calms the nerves, and until the last few years was supposed to be a most valuable and successful remedy. It is now a most valuable and successful remedy. It is now a most valuable and successful remedy.

VENTILATING GONDOLAS. Ventilating gondolas are now driven by electric motors.

W.P.C. 1041. CALVERT'S Carbolic Acid Disinfectant. It is a most valuable and successful remedy. It is now a most valuable and successful remedy.

POULTRY, BUTTER, EGGS, APPLES. The Dawson Commission Co., Limited. Brass Band. Every Town can have a Band. Dyeing! Cleaning! GERMANY'S RICHEST TOWNS. PACKARD'S Shoe Dressing. ENGLISH TEETHING SYRUP. Largest Sale IN THE WORLD.

The Best of Advice

TO THOSE WHO'RE SICK, WEAK OR DEPRESSED.

Miss Belle Gibson, of White Rock Mills, N.S., tells how she regained her health and Advice Others to Follow Her Example.

From the Acadian Wolfville, N.S. At White Rock Mills, the pleasant sound of the noisy spring of the Gaspereau river, is a pretty little cottage.

In this cottage there dwells with her parents, Miss Belle Gibson, a very bright and attractive young lady who takes a lively interest in all the church and society work of the little village. A short time ago an Acadian representative called upon Miss Gibson for the purpose of ascertaining her opinion of Dr. Williams' Pink Pills.

Miss Gibson's story is a most interesting one. It is a story of a young lady who was suffering from a most distressing illness, and who was advised to take Dr. Williams' Pink Pills.

A MINISTER'S EXPERIENCE.

Suffered Terribly with a Violent Form of Itching, Protruding Piles—

Escaped a Dangerous and Painful Operation, and Was

Thoroughly Cured by

Dr. Chase's Ointment.

While scores of thousands of people in all walks of life are being cured of the miserable and discomfiting itching piles by using Dr. Chase's Ointment, comparatively few are so fortunate as to be cured of their suffering by the use of this wonderful preparation.

Rev. S. A. Dupray, Methodist minister, Compton, Prince Edward Island, writes: "I was afflicted with itching piles for many years, and was advised to have them cut out, but I refused to do so. I used Dr. Chase's Ointment, and after a few minutes the doctor bowed his head, and the carriage rolled away."

HOW KNIGHTS ARE MADE.

The ceremonies at the creation of a knight have been various; the principal were a box on the ear and a slap on the face.

Prof. Engels has shown that the exact position of the sword was in his hands. A red sand flew slowly into the "mouth" of the river, showing in bars and banks half way down or more, indicating exactly where the river was at any given time, adding land. A little later, blue sand used in the same way might show the formation of still other bars, and the removal of the red sand bars previously produced. Controlling the water as he does, Prof. Engels can have a freer at any time he sees fit, can initiate the sluggish flow of a river, or if his river is exceedingly crooked he can produce a new channel artificially as it might be produced by a sudden great rushing of water, and he can build dams, breakwaters, piers, docks, bridges, and so on, and note in each case, the exact effect which these produce on the river, whether they tend to deepen or to obstruct the channel, the influence of such as regards the formation of bars and banks and so on, and how deep piling must be driven to escape under-washing by a narrowing river—all facts of the utmost importance to engineers.

Many of the rivers of Germany have been plotted with great accuracy not only as to their shore lines, but with regard to the contour of their beds. With these maps and contours in hand, Prof. Engels is now engaged in laying out to an exact scale various sections of the more important German rivers. He duplicates exactly every curve, inside in every

"Society is particularly due to all women," said Cressfield. "If you wish to be popular as well as civil, give your friends Blue Ribbon Ceylon Tea."
