CLOSING STOCK LETTER.

By Direct Private Wires to J. C. MacKintosh & Co.

New York, March 11.—In the absence of stimulating news today, the stock market reflected in some degree the impairment of technical conditions occasioned by last week's advance. There were attempts at bull manipulation in special stocks, but these were not convincing to the rank and file who pointed to the activity of such specialties as the Am. Can. issues as an instance of misplaced leadership. The standard shares rather than the special stocks, ruling quiet and fairly steady in the forenoon, the general list reacted rather sharply in the closing hours carrying the much bulled specialties referred to with it. Lehigh Valley had been the leader of strength early but as there were no specific developments to account for the activity the movement was attributed to manipulation. Stocks enjoyed a fair amount of strength on a revival of the rumor that a plan to disintegrate had been effected which would be entirely satisfactory to the government and at the same time preserve the company's earnings power, this could not be confirmed. Considering the sharp advance last week and the general absence of stimulating news today's reaction is not unnatural. The most discouraging feature of the situation is the continued lack of outside interest in the market. Prices, nevertheless, rule at an equitable investment basis and the market is in position to respond to any good news that should develop.

Laidlaw & Co.

CLOSING COTTON LETTER.

By Direct Private Wires to J. C. MacKintosh & Co.

New York, March 11.—Our market opened firm and from 8 to 12 points higher on the better cables and unfavorable weather reports from the South. Later in the day very strong spot advices from the South were added to the budget of bull news. There was a smart covering movement by Saturday's sellers who had gambled upon a change of weather conditions over the week-end and while profit-taking occurred also in considerable volume from time to time the market showed ample power of absorption. While we believe that too much emphasis is being placed upon backward crop preparations, the market seems to be well under control of the strong bull forces who will utilize the backward season to the limit. We therefore advise against selling the market except on sharp bulges until there are more assuring signs of unsettled weather conditions at the South.

Judson & Co.

Canada Machinery Corporation

6% Bonds

Earnings—Five times the bond interest.

Security—Plant value alone over three dollars for every dollar of bonds issued.
