

## HUN A BLUBBERER WHEN CORNERED

SAYS A WRITER IN THE LONDON  
DAILY MAIL

But We Must Be Careful Not To  
Allow Their Capacity for Weep-  
ing to Excite Our Sympathy.

Under the heading "The Hun as a  
Blubberer," R. E. L. writes in the  
London Daily Mail:

"The influence which, in the end,  
makes a nation great or small is its  
temperament. Either it can bear it—  
in a period of adversity or it cannot.  
"How will the German tempera-  
ment disclose itself when the pinch  
comes? Never yet has it been seri-  
ously tested. In previous wars it has  
known only success; in trade it has  
been flattered by constant prosperity,  
and in the present war it has had the  
"map" to soothe it.

"So far, then, the inwardness of the  
German temperament is an unknown  
quantity. But I have come into con-  
tact with a good deal of it as a result  
of having to call upon, and put some  
pertinent questions to, an interesting  
variety of uninitiated Huns in our  
midst, and this much I am prepared to  
say: Just as the Hun is the worst  
tyrant, bully and rascal in the world  
when he has the power to exercise  
his instinct, so he is the most cringing  
and cowardly known to humanity when  
he is cornered.

Some Specific Examples.  
"My experience with our Huns is  
that they always begin to weep when  
the inquiries become searching. At  
first it is rather embarrassing to see a  
big, fat, healthy German blubbering  
like a baby.

"There was the rich German whom  
I visited at his luxurious house in the  
South of London to ask how he came  
to get petrol every month for his  
motor car at a time of acute shortage.  
When he was pressed for an answer  
he burst into tears and said that he  
could cry no more he said that he only got  
two gallons a month to give the car a  
run and keep it in order. With a  
sob, he added the justification: 'It's  
a very beautiful car.'

"After a while you realize that this  
capacity to cry is part of the nature  
of the German. There was a Hun  
manufacturer who had contracted with  
the War Office early in the war and  
who, when I asked him a few points  
about his business, wept so copiously  
as to suggest that he would never be  
able to answer. And the German  
householder who, having given per-  
emptory notice to a British family to  
clear out of a house, cried like a  
child on being asked about it.

"The German women cry less than  
the men.  
"A woman I saw at Highbury re-  
presented her cult. 'What right has  
anybody in England to say a word  
against our own dear Kaiser?' she  
demanded fiercely.

"But when the Huns have been  
conquered we shall have to be careful  
of their capacity to weep. They will  
use it for all they are worth to excite  
sympathy."

### USING PALACE OF KAISER

Australian Soldier Tells of Life in  
the Holy Land.

Description of Palestine, and par-  
ticularly of Jerusalem, is contained in  
a letter sent by W. A. Walker, of the  
Australian Light Horse, to a relative in  
Toronto. Trooper Walker has been in  
Palestine for the past 12 months,  
having previously gone through the  
Gallipoli campaign. He says:

"Jerusalem is in no way a modern  
city. It is about the dirtiest place I  
have ever been in. Its streets are  
narrow, especially in the old city,  
which is built within the walls. You  
know Jerusalem is divided into two  
parts. That which is outside the  
walls is built more or less on the  
European style, but with very narrow  
streets. Some of the streets in the  
old part are not more than six feet  
wide, and there are thousands of  
steps, as the ground is so rugged, and  
I tell you that by the time you have  
climbed these steps for a while you  
want to rest.

"The population of the city is com-  
posed mostly of Jews, but there are  
Greeks, Armenians, Bedouins, Arabs,  
French, Russians, Assyrians and  
Turks, of which last there is a good  
number.

"I do not know how many gates  
there are in the wall, but they are all  
very narrow, so narrow, indeed, that  
the Kaiser, when he visited Jerusalem,  
had 22 feet cut away near the Jaffa  
gate so that he could get his proces-  
sion through. The castle the Kaiser  
had built for himself is at present  
being used by one of the units here  
for quarters."

Keep the garden clean from end  
to end.

"A man may, if he knows not how  
to save as he gets, keep his nose to  
the grindstone and die nor worth a  
groat at last."—Benjamin Franklin.

In using corn syrup as a substitute  
for sugar in jelly-making use three-  
quarters of a cupful of fruit juice. In  
preserving use equal weight of syrup  
and fruit.

## Are You Exhibiting This Year?

A MAN may well feel proud to have raised  
stock, grain, fruit or vegetables that will stand  
comparison with the best his neighbour can  
produce.

The exhibition gives you an opportunity  
to show your best work, and to see what  
others have been producing.

It is natural to want to win a prize or a ribbon. The  
desire puts you on your mettle, and even though you may  
not win the coveted prize, the effort you make will mean  
an improvement in your whole year's production.

It is this constant striving that keeps all live people up to the  
mark. We, as manufacturers, have a tremendous responsibility to  
spur us on. We know our success depends on the perfect satis-  
faction of the millions of Gillette Razor users who daily enjoy the  
real luxury of a faultless shave.

The every-day shaver has put the "blue ribbon" on the Gillette  
Razor. His hearty commendation makes his friends want to buy  
the famous safety razor. It would do you good to hear him.

At the Exhibition, you will see thousands of men who owe their  
clean, fresh appearance largely to the Gillette. Suppose you step  
into a jewelry, drug, or hardware store, and look over the assort-  
ment of Gillette sets.

Your year's work has entitled you to "treat" yourself to a  
Gillette, and you will say, as the years go by, that it was the  
best five dollars you ever invested.

### Britain's Power Output.

The coal used in Great Britain  
could be made to do three times its  
present work if converted into elec-  
tricity at large central power plants,  
according to the report of the British  
Coal Conservation Sub-committee to  
the Ministry of Reconstruction. There  
are now about six hundred power  
stations, generating an average  
of 5,000 h.p. each, scattered  
throughout Great Britain, and it is  
recommended that these be replaced  
by sixteen "super-power" stations  
from which transmission lines would  
radiate to all parts of the country.  
The generators in these would pro-  
duce from 20,000 to 50,000 h.p. each.

LEMONS WHITEN AND  
BEAUTIFY THE SKIN

Make this beauty lotion cheaply for  
your face, neck, arms and hands.

At the cost of a small jar of ordinary  
cold cream one can prepare a full  
quarter pint of the most wonderful  
beautifier, by squeezing the juice of  
two fresh lemons into a bottle contain-  
ing three ounces of orchard white.  
Care should be taken to strain the  
juice through a fine cloth so no lemon  
pulp gets in, then this lotion will keep  
fresh for months. Every woman  
knows that lemon juice is used to  
bleach and remove such blemishes as  
freckles, sallowness and tan and is the  
ideal skin softener, whitener and  
beautifier.

Just try it! Get three ounces of  
orchard white at any drug store and  
two lemons from the grocer and make  
up a quarter pint of this sweetly frag-  
rant lemon lotion and massage it daily  
into the face, neck, arms and hands.  
It is marvelous to smoothen rough,  
red hands.

### DON'TS FOR GUNNERS

Words of Wisdom for the Guidance  
of Hunters.

Every year the hunting season  
brings with it its spoils in the form  
of human sacrifices. For the benefit  
of gunners who are going after game  
this fall the following list of don'ts  
is given:

Don't take any chances. The func-  
tion of a shotgun is to scatter shot,  
but be careful where you scatter it.

Don't blize away in haste and don't  
get excited. Many a shooter has filled  
his favorite dog full of lead just be-  
cause he was over-anxious.

Don't point a gun at any person in  
jest. It is always the gun that "we  
didn't know was loaded" that goes off  
and does the damage. The only time  
to point a gun is when you intend to  
kill.

Don't take every rustle of a bush  
or a bough as a sure indication of  
game. Remember sometimes an in-  
quisitive person has a penchant for  
being in strange places.

Don't carry a loaded gun through  
the street or on cars, trains, automob-  
iles or any other kind of vehicle.

Don't get excited and shoot without  
making sure your object is game.  
Don't shoot until you see the rabbit,  
and then be sure that he is clear of  
both man and dog.

Don't drag a gun under a fence with  
the muzzle pointed toward you.  
Don't climb over fences with your  
gun or lean it against a tree until  
you get over. Put it through the  
fence and on the ground, business end  
before.

Don't hunt with anyone you know  
to be careless. Carelessness with a  
three and a quarter drams of powder  
behind and one and one-eighth ounces  
of shot is inviting "sure death."

Don't load your guns until you are  
actually ready for business. At all  
other times it should be empty. Keep  
your finger off the trigger until you  
are looking down the barrel at your  
game.

Don't rest on the muzzle of your  
gun.  
Don't violate the game laws. It is  
not criminal, but sometimes very  
costly.

Don't "hog" all the game. Leave  
some for the next fellow.  
Don't rest the muzzle of your gun  
on the ground. A gun muzzle clog-  
ged with dirt or mud is a dangerous  
proposition.

When a man wants your best calves  
or lambs, and you need them at home,  
do not hem and haw about it. Just  
say, "No thank you! Those are just  
about right for me!" And stick to it.  
It is the way to top-notch farming.

The war gardens of Canada this  
year have produced anywhere from  
\$40,000,000 to \$90,000,000 worth of  
fruit and vegetables. This produc-  
tion should be worth about \$50,000,-  
000.

### Distillation of Wood.

The destructive distillation of hard-  
woods is the only important distilla-  
tion industry in Canada where wood  
is used as raw material. There are  
now 11 plants in Ontario and Quebec,  
and the industry is well organized. It  
is gratifying to note that manufac-  
ture is carried beyond the stage of  
the crude products, where so many of  
Canada's industrial activities cease,  
and that the specially refined and de-  
rived products are produced in Canada  
for local and export trade. In the  
limited list of chemicals which are  
regularly exported from Canada there  
are only three of much importance,  
namely, calcium carbide, acetate of  
lime and methyl alcohol, the last two  
of which are entirely produced by  
hardwood distillation. It is impor-  
tant to remember that practically all  
the wood alcohol and acetic acid  
which are so essential to modern  
civilization are produced by the de-  
structive distillation of hardwoods.  
The plants in Canada consume, in  
the aggregate, over 500 cords of  
wood per day. Maple, beech and  
birch are the principal species used,  
although oak, hickory and other hard-  
woods are suitable if obtainable.

YES! LIFT A CORN  
OFF WITHOUT PAIN

Cincinnati man tells how to dry  
up a corn or callus so it lifts  
off with fingers.

You corn-pestered men and women  
need suffer no longer. Wear the shoes  
that nearly killed you before, says this  
Cincinnati authority, because a few  
drops of freezone applied directly on a  
tender, aching corn or callus, stops  
soreness at once and soon the corn or  
hardened callus loosens so it can be  
lifted off, root and all, without pain.

A small bottle of freezone costs very  
little at any drug store, but will posi-  
tively take off every hard or soft corn  
or callus. This should be tried, as it  
is inexpensive and is said not to irri-  
tate the surrounding skin.

If your druggist hasn't any freezone  
tell him to get a small bottle for you  
from his wholesale drug house. It is  
fine stuff and acts like a charm every  
time.

### Patriotic Jack.

"Dear me," sighed Jack Pumpkin,  
"I wish I were red,  
White and blue, 'stead of harrowing  
yellow!"

Why, with colors like these  
They will think I'm Chinese.  
Or some sort of a queer foreign fel-  
low!"

That night as a lantern  
Jack Pumpkin hung high  
And grinned at each person who came,  
For a candle of white  
Filled his heart with delight  
And the red and blue danced in the  
flame.

### Navy Blue.

The blue color so prominent in the  
uniforms of almost all marines is of  
hoary origin. Vegetius, in his fifth  
book on the military affairs of the  
Romans, traces the origin of this  
color to the Veneti, an ancient people  
dwelling near the coast of Biscay,  
and well versed in seamanship. It  
was customary among them to paint  
their outgoing ships, as well as their  
masts and sails with a blue color;  
also their soldiers and sailors wore  
blue uniforms. According to our  
author, the Latin word "Venetus,"  
which was both the name of the color  
and that of the people, points to its  
origin. From the Veneti the custom  
was adopted by the Romans. Thus  
the son of Pompeius, after defeating  
Caesar's fleet in a naval battle, wore  
the navy blue, although entitled to  
the purple. The Veneti were subdued  
by Caesar after a severe maritime  
war in 56 B. C.
