

- in gonorrhoeal ophthalmia, 686, 695.
 in Morax-Axenfeld conjunctivitis,
 almost a specific, 582.
 formula for, 681.
 paste of, 52.
 solubility of, 582.
 substitute, nizin, 511.
 double salt of dimethyl-toluthionine,
 572.
 diiodopara-phrenolsulphonate, 558.
 iodide, in ophthalmia neonatorum, with
 marked edema, formula for,
 582.
 solubility of, 582.
 oxide, in eczema, 583.
 a useful protective, 583.
 with ichthyol, 583.
 compound, in ulcerative blepharitis,
 formula for, 583.
 permanganate, 44.
 in collyria, etc., 583.
 solution for home irrigations, 44.
 peroxide, in ulcer or wound of cornea,
 754.
 phenosulphonate, 585.
 pyroborate, 582.
 salicylate, in chronic catarrhal conjunc-
 tivitis, 584.
 in place of cautery in hypopyon ul-
 cer, 722.
 in purulent ophthalmia, 584.
 solubility of, 583.
 salts, in blepharitis, squamous margi-
 nal, 681.
 in diplobacillus conjunctivitis, 46,
 584.
 in general, 584.
 smarting from, to relieve, 584.
 soziodolate, 558.
 in corneal ulcer, 716.
 sulphamide, 511.
 sulphate, collyria containing formulæ
 for, 659.
 in catarrhal conjunctivitis, formulæ
 for, 656.
 in conjunctival irritation, 652.
 in dacryocystitis, 585.
 in Morax-Axenfeld conjunctivitis,
 585.
 in corneal ulcer, formula for, 717.
 in ulcer of the cornea, diplobacil-
 lary, 726.
 solubility of, 584.
 with adjuvants, formula for, 585.
 with boric acid, 585.
 sulphocarbonate, in simple catarrhal
 conjunctivitis, formula by L. D.
 Brose, 585.
 solubility of, 585.
 sulphophenate, 585.
 tetraborate, 582.
 Zinc-ichthyol ointment, in diplobacillary
 conjunctivitis, formula for, 657.
 Zincum aceticum, P. G., 581.
 chloratum, P. G., 582.
 iodatum, P. G., 582.
 sulphuricum, P. G., 584.
 Zinol, composition of, 581.
