HE MIXES WITH THE MOB

PERSONALITY OF THE PREMIER OF THE NORTHWEST TERRITORIES.

-Ne Pyrotechnics About His Orstor; But He Is a Master of Cold Logic and Bound Reasoning—It Is His Personally Democratic Attitude That Makes Him

The first time I met Premier Haultain, writes John P. McConnell, in Toronto Star, was in the smekeladen atmosphere of a Whitewood hotel, Moose Jaw, during the recent campaign. The place was crowded with men, who had listened to his address in the Town Hall earlier in the evening. In a quiet and unassuming way he was quite as much "one of the boys" as any man in the room.

There are no pyrotechnics about the Premier of the Territories. As an orator he cannot be said to be brilliant or showy. He is not given to flights of flowery eloquence, nor does he speak with the measured resonance of one who studies forensic effects in gesture, intonation, and choice of words. He is not a magnetic speaker. In his three-hour address

ic speaker. In his three-hour address

there was not the slightest appeal to any scntiment or prejudice. There was no show of swaying his audience with anything but cold logic and sound reasoning. Of this form of oratory, if such it may be called, he is a master, But when he scores most convincingly the full force of his argument is often not appreciated by his audience, because outside of his words there is nothing in his manner or expression to indicate that he is saying or is about to say more than a commonplace. He is most courte-ous in debate and never in the PREMIER MAULTAIN. ous in debate and never in the slightest degree uses the weapon of

abuse.

As he leaned against the counter he As he leaned against the counter he, smoked a veteran little crocked stemmed briar pipe and conversed with those about him in a perfectly offhand and democratic way, albeit his speech betrays a strong English accent. He is a man of medium height, with a lean, long head, a square jaw, and a fighter's chin. His hair and moustache are cropped short and plantifully sprinkled with grey.

grey.

He shook hands cordially when I was introduced to him, and chatted freely about election matters and Territorial affairs, and I made an appointment to meet him later in Revina.

Regina.

Afterwards I remarked to a friend

Afterwards I remarked to a friend of mine what a democratic sort of a chap he was.

"Well, why shouldn't he be. That's one reason why he is so popular," said my friend.

"Yes, quite so," I replied, "but I'm trying to imagine our Premier Ross in a country hotel, and the boys calling him "Ross," and elbowing him about, and the bartender slapping him on the shoulder and saying. Ross, here's your drink on that last round."

last round."

The next time I met the Premier

The next time of Attorney-General The next time I met the Premier was in his office of Attorney-General in Regina. He smoked the same pipe, was just as cordial, just as courtpous, and ready to talk as he was in the country hotel. In the Territories I find it is not so much a question "Why should we have autonomy?" as "Why should we not have it?" It is pointed out that British Columbia was taken into Confederation when her population was one-twentieth that of the Territories to day. It is estimated that the Territories of Alberta and Assinihoia are now populated with 500,000 to 600,000 people, that the population has doubled in the last three years, and that it is bound to increase very rapidly from now on.

The problems of Territorial administration are daily becoming more complicated. The demands for roads, for public works of all kinds, the administration of justice, the problems of Government finance, all conspire to make the powers of provincies status necessary for efficient and economical administration of public business.

In the elections both parties were

In the elections both parties w In the elections both parties were committed to the principle, and the people of the Territories now look forward to the creation of a new province composed of Alberta and Assinibola before the term of the present Legislature expires, two years hence.

Fit for the Post. Two little girls and a little boy were playing in a London garden and the conversation followed in this fashion: "Let's play at chapel," said one girl. "All right," said the other. "How shall we play?" "I know, you be a singer, and I'll be a singer," "And what about Tomny?" "Oh, Tonnny shall be a minister—he's so silly."

DUG THEIR OWN GRAVES.

How Kitchener Discovered and Exe-cuted Two Spies.

Lord Kitchener, who is now comhas a remarkable knack of picking up foreign languages and native dialects. foreign languages and native dialects. In Egypt be proved himself able to learn the local dialects of the fellahin within a few months. He was fond of disguising himself in native costume and mixing with the people, much as Kipling's Strickland Sahib did in India.

Veterans of the Suakin campaign tell of an incident which illustrates this

of an incident which illustrates this rare gift of Kitchener's and also his

unrelenting discipline.

The British were throwing up earthworks, on which many of the natives were employed. One day two strange fellahin came into camp and offered their services. This was considered universely the suspicious, but in answer to all inquiries they protested their loyalty to the British cause. They were set to work with shovels. Presently they were joined by another native, with whom they became intimate during the day. Toward evening the third native

disappeared. Soon afterward the two strangers were summoned to headquarters, where

General Kitchener received them.
"You are spies," he said briefly.
They were about to deny the accusation, but they looked at him and gasped. The British general was the native trench digger with whom they had been plotting treason during the day.
"Take them out," said Kitchener t the guards, "and set them to work to dig a hole big enough for two.

This was done. When they had completed their work the two spies were shot and buried in the grave they had selves dug.

Down With the Dust! Doctors all over the world are recognizing dust as the conveying medium of all sorts of diseases. Not only consumption, but lots of milder diseases all the way down to "just a heavy cold," are put to the blame of the dust. American Medicine says that dust free pavements are needed, dust free nethods of cleaning streets must be devised, street sprinkling must be more devised, street sprinking must be more thorough, and improved methods of sweeping public meeting places are urgently necessary. A sterilizing and dust free plan of sweeping theaters, churches, etc., should be enforced. Streets should frequently be flushed. The dwellers in cities who are sus-ceptible to dust infection cannot all reove to the country to be free from

their disagreeable and dangerous idiosyncrasy; they are too many, and new means of gaining a livelihood are not readily found. New means of prevention and cure while in the midst of in-

for and cure while in the midst of infection must be devised.

Merely substituting asphalt pavement for cobblestones and granite blocks is saving in New York many thousands of lives every year. Dr. Woodbury's cleaning of the streets has had a live result. had a like result.

The Indians In Politics.
In the Indian nations the tribes make In the Indian nations the tribes make some semblance of an approach to the ways of the white men. It is possible that they may become wholly civilized and so survive because it is quite true that they take to the great American institution, politics, as naturally as a fish takes to water.

The Choctaws are the best politicians. They have a compaign commit.

cians. They have a campaign commit-tee and a campaign fund, and they snow how to spend the latter where it will do the most good. They print and distribute literature among the voters, this literature being printed both in English and in Choctaw. The party lefeat the party adhering to the old Indian fashion of feasts and speech as campaign methods.—Field and Stream.

High Priced Land. The highest priced real estate in London is near the Bank of England. Land sells there at the rate of \$875 a square foot—\$16,250,000 an acre. From this center the price diminishes in a receding tide, rising again in the Strand to a price of from \$60 to \$100 a square foot. In Bond street, in the west end, a still higher price of \$175 a square foot, or more than \$7,500,000 an acre,

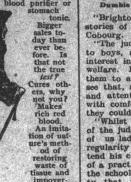

The Wounded In Naval Battles.
Dr. Suzuki, surgeon in chief of the Japanese navy, declares that his experience in the present war proves that the wounded should be laid on the firing, not the nonfiring, side of the vessels, for it is not the side exposed to the enemy which is the most dangerous, but the other, "the fragments of bursting shells dispersing in a radiating manner."

A Ningara Made to Order. Two Swiss engineers have worked out plans for tapping the lake of Sils, in the Engadine, and letting the water drep down the mountains and creating a waterfall which, it is said, would develop 50,000 horsepower. During the tourist season the lake would resume its normal look in spite of the drainage, as it would be necessary to store the water for a time.

Woolleas Sheep.

The department of agriculture has recently imported five woolless sheep, four ewes and a buck, for use in the extreme southern states. A heavy crop of wool is a burden in hot, dry listricts, resulting in a direct ill effect on the quality of the mutton. The animals were brought from the Barbados

ten Old Boy'' and Police Magistre mble of Peterboro Recollections.

ishment of the blood and nervous force is used when you take an alterative extract of herbs and roots, without the use of alcohol, like Dr. Pierce's Golden Medical Discovery. This vegetable medicine coaxes the digestive functions and helps in the assimilation of food, or ather takes from the food just the nutriment the blood requires.

Dr. Pierce's Golden Medical Discovery purifies the blood and entirely eradicates the poisons that breed and feed disease. It thus cures scrofula excema, crysipelas, boils, pimples, and other cruptions that mar and scar the skin. Pure blood is essential to good health. The weak, rundown, debilitated condition which so many people experience is commonly the effect of impure blood. Dr. Pierce's Golden Medical Discovery not only cleanses the activity of the blood-making glands, and it enriches the body with an abundant supply of pure, rich blood.

No matter how powerful the intellect or the resources of intellectual power, it must be backed up by physical force. Every day the youth or man must manufacture a pint of rich, arterial blood, that is pure, stimulating to the brain, and that can rebuild the tissues that were destroyed in yesterday's work.

Dr. Pierce's Pellets cure biliousness.

Dr. Pierce's Pellets cure biliousness.

AMERICAN SONGSTRESSES.

Women Singers Who Have Won Fame Both at Home and Abroad.

The list of women born in the United States who have become successful and distinguished singers in opera and and distinguished singers in opera and concert is as noteworthy as that of any country in the world. Anna Louise Cary, in her time one of the great contraltos of both Europe and America, was born in the little Maine town of Durbam. Emma Nevada's assumed name (she was a Miss Wixon) reveals her native State. Minnie Hauk, once the best-known Carmen on the American stage, was a New Orleans girl, while Suzanne Adams was born in Cambridge, Mass.; Sybil Sanderson in San Francisco, Mrs. Genevieve Clark Wilson in Chicago, Gertrude Rennyson in Norristown, Pa.; Pauline Waltman in Rock Island, Ill., and Lucille Hill, Florence Island, Ill., and Lucille Hill, Florence

Island, Ill., and Lucille Hill, Florence Finlayson, Maud Reess-Davis and Anna Hickish were all born somewhere in the United States.

Emma Eames is an American and passed her early years in Bath, Me. though she was born in Shanghai, China, where her father was a lawyer. Mme. Albani, a Canadian by birth. spent her girthood in Albany, N. Y., and took her stage name from that of her adopted city, her name in private life being Lajeunesse. Mrs. Homer of the Metropolitan Opera House Company, who came originally from Pennsylvania, has also been a prominent figure at Viciny and Brussels and in London. Perhaps the best known and the most popular of all the great sopranos of the Metropolitan Opera Company is Lillian Nordica, and Mme. Nordica is an American. She was born in Farmington,

Nordica, and Mme. Nordica is an American. She was born in Farmington, Me, her parents of the good old name of Norton. After her graduation from the New England Conservatory of Music in Hoston, where Mrs. Homer also graduated, she went to Milan and very soon appeared at Brescia, then in London, Paris, St. Petersburg and other European capitals, and now she is probably the best known Wagnerian singer in the world.

Among the American women singers who have made their reputation in Europe and have never been heard in this country is Geraldine Farrar, daughter of Farrar, the old baseball player, and Miss Marguerite Norti of Tennessee.

Some good people are spoiled for want of good works.

Character is the only permanent sapital in business.

Men like to regard themselves a liberal even if they are otherwise. Keep your troubles to yourself and they won't be magnified.

STORIES OF JUDGE CLARK

Dumble of Petr-Proc Recollections.

"Brighton Old Boy" relates some stories of the late Judge Clark of Cobourg. He writes:

"The judge was extremely partial to boys, and always took a deep interest in whatever tended to their welfare. He would not only allow them to attend his court, but would see that, so long as they were quiet and attentive, they were provided with comfortable seats from which they could follow the proceedings.

"Whilst this partiality on the part of the judge was the cause of many of us lads being flogged with due regularity for playing truant to attend his court, it was also the cause of a practice becoming general among the schools of Northumberhand County, that, in my many years' experience as teacher. I never lound prevailing elsewhere, the practice among the pupils themselves of "Trial by Jury," not only for the purpose of trying offenders against the great unwritten laws of the playground, but also ef offenders against the more clearly defined laws of the class-room.

"The youth who could the more

clearly defined laws of the room.

"The youth who could the more fluently deliver the latest of the judge's charges to a jury or quote his most scathing remarks to an unwilling witness was sure to be elected a Q. C. to conduct the criminal docket at the next school assize."

A Lesson in Law.

"On one occasion," continues the narrator, "at the close of court held at Brighton, the late judge expressed a desire to be driven to Cobourg as quickly as possible. Several lads offered their services as coachman, but the judge thought they were rather small, until one remarked that we small, until one remarked that we had been making muscle since the day he knocked out Tim Gourley, the horse-trader, when he thereupon entrusted the reins to me. As there were several toil-gates to be negotiated with, Hewitt, the liveryman, gave me a dollar for expenses. When we reached the first gate the judge forestalled me in paying toll, and did more than I would have done by paying double fare, remarking that I would be returning later. This he did at each gate, and when we arrived at Cobourg he paid for my dinner and the care of the horse. I then offered him the dollar that had been given me, when the following dialogue took place:

Judge—Why do you give me this dollar?

A.-Because it was given me for expenses, and you have paid them

for me.

Jud.e—Did you ask me to pay those expenses for you?

A.—No, sir.

Judge—Why do you give me this dollar? Should anyone pay your debts or advance money on your behalf without your request, you are under no legal obligations to make good the amount. This dollar is yours; not mine nor Hewitt's. Goodbye.

bye. The above legal opinion was given me gratis by the late judge forty years ago, and while I believed it to be "good law," yet unfortunately I have never been given an opportunity of testing it.

Police Magistrate Dumble of Peters been fells this one:

boro tells this one: Judge vs. George Clark. boro tells this one:

Judge vs. George Clark.

The late Judge Clark was a man of splendid physique, tall, sim; lithe, and active. In his younger days he was regarded as one whom it was safer to let alone than offer any violence. On one occasion I remember while he was holding court at Campbellford a local bully undertook to address him in very insulting and improper language in the court. This the judge endured with astonishing patience, but after court he met the bully at the door of his hotel and said to him; "In the court I was Judge Clark, but here I am George Clark. If you have anything to say, now is your time." The bully opened on him with abuse, but he did not get out a second sentence, for a straight one from the shoulder of the judge left him sprawling on the ground and as modest as possible.

indge left him sprawling on the ground and as modest as possible.

He was is a Burry.

The judge was active and quick on his feet, and one day, wanting to reach his home, about a mile below the town, he employed one of the cabs to which was hitched very heavy fat horses and slow. The cabby promised to pick him up in a minute, and the judge started for home. Looking over his shoulder several times there was no sign of the conveyance. Finally whear has was about half-way home the creaking cab came up, and the cabby asked him if he would drive home. "No, I am in a hurry," the judge answered promptive.

'No more painstaking or careful judge ever sat upon the bench. He got at the root of the matter, and gave judgments that were almost universally accepted as correct. He served the judgeship for 35 years, and withdrew on full pension. The C.P.R. then retained him as their counsel for many years. He was a prudent man in financial matters, and leaves a large estate."

Cravate of Wood Falp.

A syndicate of English capitalists is engaged in an endeavor to promote a market for the silks made chiefly from wood pulp. This product is principally obtained in South America. Paraguay furnishing a large supply. The vegetable silk has its origin in trees and is readily adaptable to native looms. The woven threads are supercalendered, which process presents a silky finish resembling mercerized goods. For several years past this glossy material has been sold in piece lengths to the upholstery trade, by which it is utilized for filling purposes. The solling test of artificial silk for cravats is anxiously awaited by manufacturers.

The Bitterness of Is.

Wife of His Bosom—"Socration dearest, what is the matter?"

Mr. S. Welled Hedd (a literary collebrity)—"At last it has come at last! Not a single paragraph about me in any of the papers this morning!"

Backache, "The Blues

Both Symptoms of Organic Derangement in

Canada, writes:

Dear Mrs. Pinkham:—
"Ates what your Vegetable Compound did for me, I am a firm believer that it is a wonderful medicine, and that any woman who is troubled with any of the ills we suffer from should try it and she will soon be convinced of its worth. Six bottles changed me from a peevish despondent, sickly, alling woman to a sweet tempered, healthy one, who rarely ever has a pain now, and who before was rarely without one. As a regulator, strengthener and a tonic, I think it has no superior and I certainly endorse it."

How often do we hear women say: "It seems as though my back would break," or "Don't speak to me, I am all out of sorts?" These significant remarks prove that the system requires attention.

Backache and "the blues" are direct symptoms of an inward trouble which will sooner or later declare itself. It may be caused by diseased kidneys or some uterine derangement. Nature requires assistance and at once, and Lydia E. Pinkham's Vegetable Compound instantly asserts its curative powers in all those peculiar allments of women. It has been the standby of intelligent American women for twenty years, and the ablest specialists agree that it is the most universally successful remedy for woman's ills known to medicine.

The following letters from Mrs. Oakes and Mrs. MacNamee are among the many thousands which Mrs. Pinkham has received this year from those whom she has relieved.

Surely such testimony is convincing.

Mrs. J. P. Oakes of Prince of Wales Hotel, Head of St. Margaret's Bay, near Hallfax, Halifax County, Nova Scotia, Canada, writes:

Dear Mrs. Pinkham:—

"After what your Vegetable Compound did for me, I am a firm believer that it is a wonderful medicine, and that any woman who is troubled with any of the ills we suffer from should try it and she will soon be convinced of its worth. Six bottles changed me from a peerish, despondent, sickly, alling woman to a sweet tempered, healthy one,

Ask Mrs. Pinkham's Advice—A Woman Best Understands a Woman's Mis.

A Pleasing Invitation. Two passengers traveling north, according to The London Globe, got into-conversation, and one was most at-tentive to the other, pressing clears, tentive to the other, pressing clears, papers and refreshments upon him. Their destination was the same town, and No. 1 asked where his traveling companion intended to put up. The latter replied, "The George." He said: "Oh, don't bother about a hotel. Come to my place for the "night." This completed No. 2's astonishment at such extraordinary gushing kindness, and he felt compelled to ask the reason of such unlooked for hospitality, but was uncomfortably enlightened by his would-be host replying: "My wife says I am the ugliest man in the world, and I just want her to have a look at you"

Canada's Chanee. It is true that Great Britain only takes a general census every ten years, but the big cities and other parts of the country are counted or closely ap-proximated much more frequently. The proximated much more frequently. The United States, too, only take a general census once in ten years, but a quinquennial census has been influentially urged in both countries. It would be a feather in our cap it, in this and in the adoption of the metric system of
