

\$201.00 in Prizes and 2 Silver Medals

WON ON BUTTER MADE FROM

GATHERED CREAM

SEPARATED BY

U. S. CREAM SEPARATORS

"RICHMOND, QUEBEC, Sept. 28, 1905.

I am pleased to advise you that my butter which was made from gathered cream at the Kingsey Creamery, of which I am proprietor, was awarded \$201.00 in Prizes at the different Expositions of this season.

The first of these was the Sherbrooke Exposition, where I received the Eastern Townships Bank Prize of \$75.00 for the best exhibition of creamery butter, and also the Medal for the highest score in points.

At the Toronto Exposition I received Two First Prizes and One Second Prize, and tied with another Quebec Creamery for the Silver Cup offered for the highest score in points, with the result that we were both awarded a Silver Medal, also a Diploma, for the highest score instead of the Cup.

At the Ottawa Exhibition I received One First Prize and One Second Prize.

I also took the First Prize at both the Richmond and Drummond County Fairs.

Last year I was awarded \$112.00 in Prizes and a Gold Medal. I believe this record cannot be equalled by any other Creamery in this Province or in the Dominion of Canada, and think this speaks well for the quality of butter made from gathered cream, 90 per cent of which was separated by the farm sizes of United States Cream Separators.

E. W. EVANS."

Our free Catalogue tells why it will pay every farmer to skim his milk with a U. S. Separator. Write for a copy now.

BELL'S FEED CUTTERS

Save Work and Save Money.

Bell's Feed Cutters are fitted with the La Marshe Knife. They cut cleaner, quicker, and hold their edge longer, than any other. They cut full mouth or a few straws equally well.

All the way through—Bell's Feed Cutters are made of such sturdy material, that there can be no question as to their superior wear and service.

We make all kinds and sizes. Tell us your needs and perhaps our advice will help you.

Anyway, write for our illustrated catalogue. It's free

QUESTIONS AND ANSWERS. Veterinary.

ABORTION.

Cow aborted in the 5th month of gestation. Will she be liable to abort again? Should the supply of milk increase by reason of the abortion?

A. E. G.

Ans.—It is probable abortion was caused by some unknown accident, and while cows easily acquire the habit of aborting, I think I would breed here again, and keep her in the stable, feed lightly, and avoid all excitement during her 5th and 6th months of gestation. This will probably carry her safely through the dangerous period. This precaution may not be necessary, but is wise when there are any grounds to suspect a tendency to abort. It is not probable the supply of milk will be influenced by abortion at such an early period.

MARE OUT OF CONDITION.

Pregnant mare was worked all summer. She is three years old. She got thin, but is gaining flesh lately. Her hair is dry, and stands on end, and her legs swell some every night. She gets a little exercise every day. Would either of the following prescriptions be safe and good for her:

1. Equal parts nitrate of soda, nuxvomica, gentian and sulphate of iron. Dose, a teaspoonful night and morning.
2. Five pounds each ground corn, oats and bran, 5 ounces oil meal, dessert-spoonful gentian, teaspoonful sulphate of iron, 1 pound salt. Dose, 1 pound.

N. A. M.

Ans.—The first prescription is a fair tonic. The second has practically no medicinal properties, but, of course, contains nutriment. Take equal parts nitrate of potash, sulphate of iron, gentian, ginger, nuxvomica, and bicarbonate of soda; mix, and give a tablespoonful twice daily. Give regular exercise, and do not be alarmed if the legs continue to swell, as some mares, when pregnant, have this predisposition.

Miscellaneous.

AN EARLY PEACH.

A lady wishes to know what would be the best early peach to plant on a lot she owns down at Port Stanley, Ont., on Lake Erie. She wants some variety hardy in that locality, and something that will fruit early in August.

Ans.—The earliest good peach is the Yellow St. John. It is about equal to Early Crawford, and about ten days earlier. The Sneed is the very earliest peach—a white flesh—ripening the end of July; the Alexander follows early in August, and the Greensboro comes next, then the Yellow St. John.

L. WOOLVERTON.

Mr. Alex. Colquhoun, of the well-known firm of McMillan, Colquhoun & Beattie, importers of Clydesdales and Hackney horses, located at Brandon, Man., was a recent visitor to London, Ont., and vicinity, with an eye to the purchase of high-grade stock. Accompanied by Dr. J. D. O'Neil, V. S., Mr. Colquhoun secured a carload of very highly-bred mares, part of which were the produce of some of the most renowned Clydesdale stallions in America, the balance of the shipment being imported stock. The very fact of Mr. Colquhoun's search for high-grade stock should in itself prove a powerful incentive to the farmers of Ontario as to the necessity for continued improvement in the breeding of horses, and not alone in quality either, but quantity as well, for in the near future the requirements of our great Western provinces in this regard will be vastly increased.

TALKING OF MANURE SPREADERS, a labor-saving device which the farmers are now very generally making use of, the Appleton Mfg. Co., of Batavia, Ill., state in their handsome new catalogue that one of their spreaders in any neighborhood is one of the strongest advertisements they can have. It makes other people want 'em bad. Everyone interested in this subject should send a letter or post card at once to the Appleton Co., asking for one of their catalogues, which they will, no doubt, be pleased to send free. Their spreader appears to have some remarkably strong features.

Sharple's TUBULAR CREAM SEPARATORS

21 POUNDS MORE BUTTER PER WEEK

Barnesville, Ohio, June 20, 1905: We were milking ten cows May 19. That day we took a Tubular separator for trial. We used it one week and got 86 pounds of butter that week. The week before we used it, we got only 65 pounds. The week after the agent took it away we got only 64 pounds. We felt we ought to have it. Later we arranged to buy it. We recommend the Tubular to anyone interested in cows. It surely will pay any one to buy a Tubular. (Signed) LONA and C. W. ACORN. Write for catalog Y-193. It explains fully.

TORONTO, CAN. CHICAGO, ILL.

DEHORNING STOPS LOSS.

Cattle with horns are dangerous and a constant menace to persons and other cattle. Dehorn them quickly and with slight pain with a KEYSTONE DEMORNER. All over in 2 minutes. Not a harsh method. Leaves a clear, clean cut. Cows give more milk; steers make better beef. Send for free booklet. B. H. McKenna, Picton, Ontario, Can.

SHROPSHIRE.

We are offering 15 shearing ewes, full of quality, sired by Marauder (Imp.). He won 2nd at Chicago, 1903. Also a limited number of ram and ewe lambs by same sire, and 30 useful breeding ewes, which we intend to mate with our Chicago winner of 1904, Prolife (Imp.).

W. R. BOWMAN, Mt. Forest.
