The Board of Trade Protests Against the Daily Delays.

### WANTS A BETTER SERVICE

A Resolution Adopted Unanimously Petitioning the Dominion Government to Erect a Public Building Here Worthy of the City.

At a meeting of the board of trade held last night in the city hall, a vigorous report was adopted, condemning the action of the railway companies in permitting the passenger trains into the WAS city to be regularly delayed almost every day from one to five hours. The board decided to forward copies of the French Ambassador to Ask Lord resolution to the officials of the Canadain Pacific railway and the Spokane Falls & Northern railway and to the The Papers Denounce the Ambassador's the duly authorized agents of the presiminister of railways at Ottawa.

A resolution was also passed petitioning the government of the Dominion to erect in Rossland a public building for the transaction of the postal, customs and revenue business carried on here. It was identical in form with the resolution already published in THE MINER. The board is now considering the matter of forwarding a deputation to Otation of it to Hewitt Bostock, the representative of this constituency in

the Dominion house. present, and they expressed the opinion that the board as reorganised was in a position to do immense good for the city. They promised to use their influcies. The officials here are intensely ence in securing new members among surprised, and express a certain disthe business men. The matter of reducing the annual fee from \$10 to \$5 per annum, payable in half yearly installments, was also considered, but no ment. definite action was taken.

The report regarding the delays in the arrival of the trains into the city was presented by a special committee, including F. W. Rolt, chairman; John M. Smith, and W. T. Oliver. It was as follows:

To the President of the Rossland Board of Trade-Sir: The question of the unsatisfactory arrangements now pending deputies, announcing his resignation. in connection with the train service foreshadowed on December 6, was read, in and out of Rossland and with the de- and Dr. Llang, one of the vice-presilivery of the mails, having been referred dents, whose determination to resign to the railway sub-committee, we beg to was announced at the same time, per-

exist both with regard to the outgoing posed that no cognizance be taken of and incoming trains. Not only is there Dr. Szilagyi's resignation, whereupon connection with the train which is timed | reply. to leave Rossland at 6 p.m. daily, but it | For a time his remarks were inaudible is impossible to obtain any information owing to the great uproar prevailing, on such occasions as to the actual hour of but finally the premier denied that the departure of this train, so that intending government desires Dr. Szilagyi to make passengers are kept hanging about in ill use of the rules of the house and what would seem to be an unnecessary employ force. Finally a resolution was manner at the depot. We should ven- adopted requesting Dr. Szilagvi to withture to suggest that a great deal of in- draw his resignation. The reference to convenience might be avoided by a the employment of force in the remarks whether the train is on time or not, as | Banffy to carry on the government next is done at nearly all important railway year by decrees, owing to the failure of centers. With further reference to the Austro-Hungary to come to a satisfacmovements of the outgoing 6 o'clock p. tory arrangement for the government of m. train, we may point out that on ar- the dual monarchy. rival at Robson a long and tedious interval almost always intervenes before passengers are transferred across the river. | BOODLE Inasmuch as the delay at this point almost invariably takes place, except on such occasions as the train is either much delayed in leaving Rossland or meets with some other hindrance en route, it would seem that the proper remedy to apply would be to start the train from Rossland at a later hour than its present scheduled time.

Turning to the incoming night train we regret to say that matters in this connection seem, during the last year, to have been going from bad to worse, so that the regular, customary hour for ar street railway franchise ordinance, in- Moyelle and Moyie City, both at the rival in Rossland is now anywhere from 1 o'clock a. m. to 6 o'clock a. m., to the great inconvenience and discomfort of the citizens of Rossland and the traveling public at large. The difficulties existing in connection with this night service are, of course, well known to all, but without in the least losing sight of this important side of the question we believe that methods of expediting the service could be found. The remedy must, of course, rest with the railway authorities, but we would venture in particular to draw their attention once more to the very long delays that occur in the transfer of baggage and passengers at Robson, at which point, if nowhere else, an economy of time might be effected. We also fail to see why it has been found advisable to resume the street railway companies' intention to were 3,000 more emigrants to Canada here that the liberal candidate will be practice of running the passenger train town of Trail, thereby wasting much valuable time.

2. With regard to the train service of the Red Mountain railway, the principal cause of complaint is that none of the trains either depart or arrive on time, so that here again our recommendation as the posting of notices may be brought forward. It is in connection with the unpunctual service of this road that cause for complaint as to the delivery of the mails has arisen, the 3:15 p. m. mail train having frequently failed to arrive until two hours after time. For this Comparison of American and Foreign there would seem to be no valid excuse as the Spokane train almost invariably reaches Northport punctually. Upon the attention of the railroad authorities being drawn to this matter we have no doubt that an improvement will take of unning mixed freight and passenger foreign competition, the tonnage of the on board the Admiral Sampson and trains on the branch between Rossland vessels entered and cleared at seven sea- started for home today. # MAP

...OF THE...

## Rossland Camp

THE ROSSLAND MINER'S map has arrived, and is now on sale. It is the most complete and elaborate map of Rossland and the surrounding country that has been published.

It is finely lithographed in several colors on the finest and most durable paper, and the first edition will consist of

## Complete

Every building, street and alley in the city of Rossland are plainly outlined.

The mines and mining claims of the Rossland camp, and their building, such as shaft houses, compressor plants ore houses, boarding houses, etc., are all on the map.

All physical features of the surrounding country, such as mountains, hills, valleys, plateaux are shown just as they The winding of railways, wagon roads and trails are correctly represented.

## Accurate

The map is almost a photographic picture of the Rossland camp, with the exception that it is produced in colers and shows the country as it is in the early summer.

No expense has been spared to make this map a really first-class production of artists, engineers and engravers. Two skilled, active and experienced men have been constantly employed on the work for three months.
