Department of Marine and Fisheries	Printing and Stationery	950.00	Total Contingencies Acct. Public Buildings	\$43,215.00

Government members had to pay these amounts out of their own pockets would they be generous to heeled and loafers? Every Department of the Civil Service is over crowded with clerks, messengers, assistants and inspectors. The Postal Service is a good example of how Morris runs the Civil Service to-day.

In the Department of the Government Engineer we find Mr. T. A. Hall—a gentleman imported to fill the job—drawing a snug little sum of \$3,163.33. In order to help Mr. Hall draw his salary an assistant—also an imported gent—had to be provided at a salary of \$700.00; a typist gets \$300.00, and a man to inspect the whole outfit gets a flea bite, as Morris would say, \$900.00. Who is the Inspector and what are his duties? When does he inspect anything? We fear the only thing he inspects is his cheque every month. \$5,063.33 goes out for this Department, when a live man would be well paid for all the work done by these four at a salary of \$2500.00 per year.

For stationery at Government House we find the enormous amount of \$3000.00 is voted; \$500.00 for telegrams, \$200.00 for sundry expenses, and \$2500.00 for travelling expenses for the Governor. This \$2500.00 was paid the Governor last year by Morris **altho the Governor was not entitled to it.** We would like to know where \$3000.00 goes for stationery? \$3000.00 is far more than all the stationery used by the Union Trading Co. in all its branches for one year. Government House is an expensive resort for the fishermen of this country to keep up.

The Col. Secretary's Office costs the country \$20,500 to run; \$2400.00 is fired out for printing and stationery, \$2000.00 for telegrams and messages, cab hire etc. \$800.00. This Department could at least be cut down one-fifth and the money saved given to Old Age Pensions.

In the Department of Justice \$100.00 is voted for stationery. If \$100.00 is enough to do this Department for twelve months where does \$8000.00 go to at Government House?

Another six thousand dollars is voted for the Government Engineer's office. Out of this six thousand \$4000 is for Survey Branch Railways and \$886.67 for travelling expenses. Where is the travelling done and who does it? How often has the Government Engineer inspected the railway line. Where is his report? This second vote of \$6000.00 is a pure waste and not one cent of which brings any returns whatever to the Colony.

Under the heading of fuel and light we find another \$3800.00 voted for Government House. Out of this Crosbie gets a snug little haul for coal. Johnnie is not in politics for the love of his country. Every change he gets he will dig into the chest and have his fill.

\$2200.00 is voted for Light and Fuel for the Customs House and \$11,500 for similar purposes for the Postal Dept. The Postal Telegraph Dept. for Light and Fuel is costing the taxpayers of this Colony about \$1000.00 per month. Half this amount is sufficient for this Department. Year after year the cost of heating and lighting the Government offices in St. John's is increasing and it is out of the pockets of the fishermen and labourers that this money is wrung to make "warm" quarters for heeled and loafers whilst many a poor family must go hungry and cold during the long winter months.

\$21,750.00 for Fuel and Light for Departmental Buildings is a crying waste. No business concern in the Island to-day would permit such a waste of money; but the Government led by Sir Tax Morris must spend all they can in order to give their heeled and supporters all the pickings they can. Isn't it high time to end this kind of thing?

Under the heading of Insurance we find \$6000.00 voted for insurance on Public Buildings. Of course Crosbie gets nothing out of this? We wonder will he tell the fishermen of Bay de Verde how much his firm got for insurance on the Dredge Priestman since the Morris Government came into power, and how much his firm has made from contracts for coal and insurance on public buildings the past six years. Talk about selling spurs at fancy prices. The fancy prices Johnnie got for them spurs are only flea bites to the other grabs he has made and is making. He never opened his mouth once during the present session. Last session he did so on many occasions, but on the last outbreak he received such a dressing

down from Mr. Coaker that he hasn't been heard from since.

\$10,100.00 is voted for repairs to Government building for the next year. If the money spent by the Morris Government on repairs to Government building during the past six years were now available we would be able to have roads all over the Island telephone communication established all along our coast line which would be of vast importance to the fishermen at this season of the year. But no, grabs and boddle must be found for Morris heeled here in St. John's, and the fishermen as far as Morris is concerned can be damned. You will hear Sir Tax Morris when next election time comes round promising roads, bridges, telephones, wharfs, ferry boats and everything he can think of in order to try and fool the "illiterate cullage" into again giving him and his pawns another lease of office.

Over four million of dollars will be spent by Morris during the next twelve months and every cent of this comes out of the pockets of the fishermen and labourers of this country. Four million of dollars wrung from you boys by excessive taxation by a spendthrift government. Isn't it time to end this kind of thing. Watch this paper day by day. You will learn something new every day. We will show you where your money is wasted.
