cut up into the required size for the squares.

Leather Gifts.

It is nearly always a man's fate to receive an abundance of unnecessary leather articles at Yuletide. There are men who never fail to get at least six leather mounted desk calendars and as many stamps and elastic bandboxes Of course these are needfuls, but the man who possesses a desk generally has all such articles. Wallets and cardcases are always

usable, and a man is pleased if he get them in the latest styles every Christ mas.

stee tails, made in new mits from larger ingots, with the cones of im-putity cast entirely aside and the com-pact residue kneaded into a proper con-sistency by an entirely new system of rolls. There are other things that need to be done—the establishment of perfect block systems, of automatic brakes and other accident preventing devices and the abolition of grade crossings—but the main matter of devices and the abolition of grade crossings—but the main matter of public safety rests in perfect rails. Ten years ago i tried to fight this avopasition, and i nearly succeeded. The Tallahassee Iron and Coal com-pany offered to make open bearth rails to my specifications. The Unified Steel corporation found that to control the side of a Tallahassee Iron and the stock of the Tailabassee Iron and Coal company was much cheaper and more profitable than to spand the seeded millions in re-equipping their place. "Your first step, then, I suppose, would be to begin a fight on the Uni-fiel Steel corporation." observed Breed. "That, in a nutshell, is our problem," declared Rollins. "Your problem is stready solved. Mr. Rollins," said Kelvin, with a smile. "Mr. Breed's control of the railroads ins left the Unified Steel corporation bich and dry. Moreover, we have so high and dry. Moreover, we have se-cured entire control of the irequois iron range, and, no matter what the Unified Steel corporation does, we shall set up our own rolling mills and make, talls by our own process from our own ore ". owu ore." "But the program will be left entire is to your own discretion." interrupted Breed "You shall have a contract Breed. "You shall have a contract for one year, repersable for ten years if your preliminary steps meet with my autoval." "Allow me to understand," said kou-lins, "In that year I am to be abso-lutely without interference in any way?" "With two exceptions." replied Breed. "I want a private rebate on all shipments of bread or cereal stuffs. Next, here is a list of names. These men are not to be employed in any capacity nor benefited in any way." Rollins looked over the list and smiled. "There isn't a man here whom I would lift a funger to save. There is not a man in that list but has had an interest in car company, a locomotive tire company or some other manufacturing concern which furnish-ed supplies to his own railroad at enormous prices. There is to be no graft in the new construction." "Certainly not," agreed Breed. "These roads must be conducted for legitimate profit and public safety. If there is any graft I want if myself, and I am content to take dividends for mine. For one year you are the absolute dictator of the largest em-
