It is well to have a clear unfer standing, so Sir Albert Smith says, about surpluses and deficits; where upon he gives some instructive definitions. We quote from his special manner of the people, by the Government, than is taken out of the people, by the Government, than is taken out of the people, by the Government, than is taken out of the people.

OR SELF FEEDER. I HAVE much pleasure in calling the attention of the public to this most remarkable STOVE, which by its extraordinary QUALITIES effects a complete REVOLUTION in the method of burning SOFT COAL—a matter of great consideration in this country, where we have abundance of soft coal at our very doors. The perfection of COMEUSTION and ILLUMINATION far surpasses any stove ever before invented. There is no possible escape of gas into the room as it is completely consumed while passing through the flame. It is also a

and can be readily controlled. The lack of this feature has been one of the chief faults with all Soft Coal Stoves, and is completely overcome in the DENMARK. A fire can be kept in it for TWENTY-FOUR HOURS without replenishing. I have now one in operation in my shop, and ask for it a thorough inspection. I sm satisfied it only requires to be seen to be admired by all.

I have arranged with E. Cooswell & Co., the Manufacturers in the Maritime Provinces, for the exclusive sale of this Stove (in two sizes) for the Parishes of Sackville, Derchester, Westmorland and Botsford. I have also a full line of
