A Dog's Affection Mistaken for Madness-How Snakes Planned the Robbery of a Nest - A Wild Hog Which Never Turns Out for Man or Beast.

Snakes Plan a Robbery. The Baltimore Sun says: Messrs. rattlesnakes keep out of their path. Frank Hooper, James Ogier, Percy Blogg, and Wilbur Rose, of Baltimore, had an unique experience the other day while on an ornithological excursion. They were searching for

the pier where the excursion boats The nests of bank swallows are built The nests of bank swallows are bank in holes in perpendicular banks, generally in colonies, dozens of holes being only a few inches apart. The bank the young men were exploring was about 30 feet in height, with the nests averaging seven feet from the ton. The bank was almost perpentop. The bank was almost perpendicular and the nests were reached by means of ladders constructed of and chestnut trees.

One of the naturalists, after working for some time at one of the nests, felt his hand come in contact with something unusual. Drawing out his hand and looking into the hole he was surprised to find, coiled down at the bottom a huge blacksnake, which, after being gotten out and killed, proved to be nearly seven feet in

Afterward two other snakes, equally as long, were found in different holes. The surface of the bank was perfectly smooth, so the only possible way for the snakes to have reached the nests was to have let themselves down from ort overhanging roots at the

The snakes seemed to have worked along the bank from nest to nest, as several nests were found in which were eggs that had been emptied of their contents. In the nest with one of the snakes was a bird which had been lately killed, and which the snake evidently was about to devour when its own end came.

The naturalists said they had been collecting eggs for many years, but a well-planned attack of snakes upon birds' eggs. had never before seen anything so like ****

A scientist has been patiently watching the snails in one of the large London gardens, and has discovered the reason by which they show their affection for each other.

How Snails Make Love.

"The snail," says this scientist, "carries its eyes in telescopic watch- ones.-New Work Sun. towers. They are in the extreme tips of its horns, and as soon as another snall approaches these horns are drawn the little animal awaits for its lady love to get close by before

surprising her.
"The emotional natures of snails, so they show plainly by their actions when courting the tenderness they feel for one another. If another snail comes along they immediately retire to the shelter of a dead leaf or hide a love-sick snail fetching dainty bits of green for his sweetheart from dif-ferent parts of the garden."

but the head remains steady, thus enabling the bird, even at top speed, to look around with unshaken glance in sides about on a level with, or a little higher than, the back, and are held loosely just free of the plunging "thigh." There is no attempt to hold them extended or to derive any assistance from them as organs of flight. ostrich, after a long run, is very tired its wings sometimes droop; this is due to exhaustion; they are never, by a running bird exerting itself to the utmost, held out away from the sides to lighten its weight or to increase its pace. But the wings appear to be of great service in turning, enabling the double abruptly even when going at top speed.

Mexico's Fearless Wild Hog.

The St. Louis Republic says: "The lost vicious and fearless of the brute creation is the peccary, or wild hog of Mexico," said C. W. Bartlett, of Laredo, Tax., who is at the Planters'. "This animal seems utterly devoid of the emotion of fear. I have never seen at turn a hair's breadth out of its path for any living thing. Man is its special bete noire. It displays an intelligence in fighting the human strangely at variance with its apto seent men is particularly marked. I have known a drove of them to seent a man a mile off, and strike as straight for him as the crow flies. There is no use to try to frighten them with guns. The cannonading of a full battery would have no more effect on them than the popping of a firecrack-er. The only thing to do when they get after you is to run away from them as fast as a horse can carry you. And then there is no certainty that they won't catch you. They are near-Iv as swift as a horse, and their endurance is as great as their vicious-

A friend of mine encountered a drove of them in a wild part of Mexi-co a few years ago, and his escape was miraculous. He very foolishly shot and wounded a number of them. Then he took refuge in a tree. The peccaries kept him in the tree all that day and through the night. They circled around the tree grunting and squealing their delight at the prospect of a feast. He soon exhausted his ammunition, and brought down a peccary at each fire. But this had no terror for the beasts. Along towards morning the brutes beone of his most distinguished followers," but whose name he does not give and trotted off. If they had not had some of their own number to devour they would have guarded that tree until my friend, through sheer exhaustion, dropped from his perch and allowed them to make a meal of him. The wild cats and tigers that infest one of his most distinguished followers," but whose name he does not give and to does not give "I am aware of your intention not to touch upon this delicate subject. I only allude to it in order to assure you from my personal knowledge, in a long and intimate acquaintance, that Lady Nelson's conduct was not only lowed them to make a meal of him. The wild cats and tigers that infest one of his most distinguished followers, "but whose name he does not give "I am aware of your intention not to touch upon this delicate subject. I only allude to it in order to assure you from my personal knowledge, in a long and intimate acquaintance, that Lady Nelson's conduct was not only in boxes the weeks without any good results. I owe my complete cure entirely to Paine's Celery Compound.

The wild cats and tigers that infest one of his most distinguished followers," but whose name he does not give as the only salvation from misery, suffering and death. Mr. Sicard says:

"I hereby certify that I was cured by Paine's Celery Compound. I had been treated by eminent physicians at my home and was in hospital for eight weeks without any good results. I owe my complete cure entirely to Paine's Celery Compound.

The wild cats and tigers that infest of the blood with its life and health-giving disease from the system. There are numerous by Paine's Celery Compound. I had been treated by eminent physicians at my home and was in hospital for eight weeks without any good results. I owe my complete cure entirely to prove the point to Paine's Celery Compound.

and that she had not a single reproach to make herself.

"I say not this to cast unnecessary blame upon one whose memory I delight to honor, but only in justice to that truly good and amiable woman.

If mildness, forbearance and indulgence to the weaknesses of human nature could have availed, her fate would have here very different. fate would have been very different. No reproach ever passed her lips; and when she parted from her lord, on his hoisting his flag again, it was without the most distant suspicion that he meant it to be final, and that in this

the Mexican wilds flee from the pec-caries with instinctive fear, and eve **** Dinner for a Snake.

It is not often that one has an op portunity of watching a snake swallowing his live prey when the snake Tolchester Beach, about a mile from is free and on his native soil. A summer idler near the Newman Springs tridge, on the Shrewsbury River the other day stopped for a rest at the site of the old rustic summer house. A spring there was dammed up years ago and the summer house built over the pond so that wanderers could sit and refresh themselves there. summer house rotted and fell, and the pond filled with many seasons' fall en heart." This triffling incident, trans-

in length was suddenly projected from among the leaves. At first the idler was puzzled to know how it managed to stand in the air in such a manner, but soon he saw that it was held in the jaws of a snake. The snake was less than two feet long, and was what is known locally as a water moccasin. His head was about half an inch broad and his neck small-er in size than an ordinary lead pencil. The frog, in the thickest part, was about two inches across. The snake's jaws were closed just over the end of one of the frog's hind legs, and even that was such a mouthful that it seemed as if the jaws were stretched to their utmost.

In and out among the leaves the snake slowly twisted and turned, working his jaws all the time, till he had worked the smaller end of the frog's leg down his throat. Then he became more quiet. Now he began a of the frog gradually disappeared, aided by an occasional strained contortion of the snake's neck. Soon the frog was but a mere lump in the snake's throat, and finally it passed slowly downward. Then the snake raised its head and neck in a graceful curve, and his little nervous forked tongue shot out at intervals. Then, spying his observer for the first time, he slid quickly under the leaves just in time to escape a blow with a light stick. It took the snake about fifteen minutes to swallow that frog, and no doubt he had swallowed many larger

Affection of Dogs. The mad dog scares have already begun in the large cities, and policemen are shooting down the animals far as love and affection are concerned, seem to be highly developed, and a great deal of nonsense about hydrophobia and hundreds of innocent ani-mals are killed on the supposition that they are mad, when, as a matter of fact, they are simply in distress as light meats, refreshing fruits and to the shelter of a dead leaf or hide behind a paling. I have noticed, too, a love-sick snail fetching dainty bits of green for his sweetheart from different parts of the garden."

This scientist also declares that snails have a manner of putting their heads together that is not unlike the heads together that is not unlike the general mode of kissing.

How the Ostrich Runs.

Considerable misconception prevails as to the manner in which the ostrich runs, says the Zoologist. It seems to be still generally held that when running it spreads out its wings, and, aided by them, skims lightly over the ground. This is not correct. When a bird really settles itself to run, it holds its head lower than usual, and a little forward, with a deep loop in the loop dand imagined that it was a curious and frightened curious and formad curious and frightened crowd. A neighbor explained. An objection so often wanting in hot weather. Ice cream and all delicate desserts that are properly served cold are heads together that is not unlike the this be imagined? Is there anything more touching than this in Dr.

A Pathetic Story of Her Old Age Broken Heart.

In the recently published life of Nelson, by Capt. Mahan, the story of the separation of him and his wife consequent upon his infatuation for Lady Hamilton is thus told: After his return from Fonthill, Lady

Nelson and himself lived together for a time in their London lodgings, in Arlington street, and there, according to the story told 45 years afterwards by Mr. Wm. Haslewood, Nelson's solicitor, the crisis of their troubles was reached. "In the winter of 1800-01, I was breakfasting with Lord and Lady Nelson, at their lodgings, Arlington street, and a cheerful conversation was passing on different subjects, when Lord Nelson spoke of something which had been done or said by "dear Lady Hamilton," upon which Lady Nelson rose from her chair and exclaimed, with much vehemence, "I am sick of hearing of dear Lady Hamilton, and I parently complete lack of any mema-parently complete lack of any mema-either her or me." Lord Nelson, with perfect calmness, said: "Take care, Fanny, what you say; I love you sin-but I cannot forget my obligacerely; but I cannot forget my obliga-tion to Lady Hamilton, or speak of her otherwise than with affection and admiration." Without one soothing He Says: I Owe My Complete Cure word or gesture, but muttering something about her mind being made up, Lady Nelson left the room, and short-ly after drove from the house. They never lived together afterwards." Though committed to paper so many years later, the incident is just one of those that sticks to the memory, probably occurred substantially as told. Lady Nelson's ultimatum will probably be differently regarded by different persons: it shows that she was at least human flesh and blood. In later life, we are told by Hotham, who was in the habit of frequently seeing her, up to her death, in 1831, "she continually talked of him, and always attempted to palliate his conduct toward her, was warm and enthusiastic in her praise of his public achievements, and bowed down with dignified submission to the errors of his domestic life." same testimony is borne by a lady, of whom Nicholas speaks as "the personal and intimate friend both of pound. Hardy, the popular leader of St. Andrew's Church choir, Fergus. Our re-porter called upon Mr. McHardy a

his home in Upper Nichol recently and from him and his estimable wif

ceptionally strong and healthy child

out on her back another doctor was

consulted, who said she was in a very

bad state of health. Her constitution

appeared to be completely undermined, and her appetite had completely failed. The last doctor called in gave some outward applications, and lanced the gathering, but it did not give the pa-

gathering, but it did not give the patient any benefit. Nine such gatherings have appeared since that time, but each broke and disappeared of its own accord, only however, to be followed by another. The child became very puny, and little or no food would remain on her stomach.

remain on her stomach. At night she would fairly rave with the pain in her arm and back, and consequently

her trouble was aggravated by a loss of sleep. She had the best of attend-

ance but to no avail, and she was slowly but surely sinking. Friends

advised a treatment with Dr. Williams'
Pink Pills and as a last resort they
were tried. To the surprise of both
parents and friends Lena began to

improve soon after beginning the use of the pills. Her appetite returned, she became stronger and her general health much improved. The sores have not yet left her back and arm,

but her constitution is being so very much improved under the treatment

with Dr. Williams' Pink Pills that her parents are looking for a complete

cure. Mr. and Mrs. McHardy thank Pink Pills for the present improved condition of their child, as they have

of bottles of doctor's medicine which

Dr. Williams' Pink Pills are a blood

builder and nerve restorer. They sup-ply the blood with its life and health-

life were passed partly in Paris, where she lived with her son and his family. Her eldest grandchild, a girl, was 8 or 10 years old at the time of her he faught many new and sublime doc-trines; that he performed many won-derful works; and that he was finally ness of her grandmother's temper, and tells that she often saw her take from a casket a miniature of Nelson, look put to death under Pontius Pilate, during the reign of Tiberius. at it affectionately, kiss it, and then Josephus, a Jewish historian who lived in the days of the apostles, says: replace it gently, after which would turn to her and say: "When you are older, little Fan, you, too, "Now, there was about this time Jesus, a wise man, if it be lawful to call him a man; for he was a door of of leaves from the surrounding oak and chestnut trees.

As the idler sat on a remnant of the old dam a frog about four inches its mute evidence to the truth of the leaves and many of the Gentlemann of the old dam a frog about four inches its mute evidence to the truth of the leave and many of the Gentlemann of the Ge last two witnesses, that Lady Nelson Pilate, at the suggestion of the prinneither reproached her husband, nor was towards him unforgiving. Nelson's early friend, the Duke of Clarence, who cipal men among us, had condemned him to the cross, those that loved him at the first did not forsake him; for had given her away at the wedding, he appeared to them alive again the third day, as the divine prophets had maintained his kindly relations with her to the end, and continued his inforetold these and ten thousand other terest to her descendants after his aconderful things concerning him.

COOL HOUSES

Ways in Which the Body and the House May Be Kept Comfortable in Warm Weather.

New York Tribune. The sultry days suggest to the prac tical housekeeper the necessity of resorting to various means to reduce the slow, monotonous task. His jaws worked continuously, but with a motion hardly perceptible, and the body morning and kept so until the air has become cooled by sunset. Strict adherence to this rule will perceptibly reduce the temperature of a house, Air the rooms morning and night, and sedulously shut out the hot air of midday. These directions would be to commonplace to repeat if they were not so often ignored and forgotten. Careful housekeepers take advantage of hot weather of the excellent gas and gasoline stoves, which supply all heat necessary for cooking and for laundry work, and do not heat up the house. The cost of cooking by gas has been reduced by practical experiments to so low a figure that it has been proved to be a matter of small moment if ordinary care is exercised. The use of cold meats, iced soups and substantial foods in a chilled state is a mistake. These dishes are more upon the strength or are the vital powers so likely to be depressed as during the heated term. What is needed is more difficult to digest than hot, and less they are served in salads with ries now come into use. Meats served | Distressing Results Following

effervescent drinks. This is a bad habit, and one children are apt to acmore touching than this in Dr. Brown's idyl of "Rab and His quire, as well as older people, if they are allowed to do so. It is a matter a tale of terrible suffering was elicited, suffering that has brought a once expenses." of habit which can be easily overcome. When the summer food is of the proper kind, and a sufficient amount of ject of the sketch, Lena McHardy, is fresh, ripe fruit is used, there will be 14 years of age, and her parents say fresh, ripe fruit is used, there will be less desire to quaff ice water in the abundant qualities with which so many ness began some two years and a half ago. Her terrible suffering dates from the she was vaccinated in June, Americans accompany their meals.

The lights of the house are often a great source of heat, and they also attract night insects. It is always a gone has aroused the deepest symmetric forms. attract night insects. It is always a desirable thing to dispense with powerful burners and lamps as much as possible in summer, and return to the small lamp and the primitive but picturesque candle. Nothing gives a more beautiful light than a candle. Wax candles are now within the reach of persons of moderate purses, and are made so that they do not run, while the dainty little night lamps, which come in the most fascinating porcelains, are sufficient for any bedroom light.

gone has aroused the deepest sympathy of all the friends of the family. In conversation with Mr. McHardy and his wife, the following facts were elicited: "Two years ago last June," said the father, "Lena was vaccinated by a doctor in Fergus. The arm was very sore and swollen all summer, and became so bad that it was a mass of sores from the shoulder to the elbow. In October, 1894 a large lump appeared on her back, over one of her lungs. The doctor who vaccinated her treated her

When the lump broke

A LONG POINT RESIDENT.

His Wonderful Statement.

Entirely to Paine's Celery

Mr. N. Sicard, of Long Point, district of Montreal, P. Q., is continually sounding the praises of Paine's Celery Compound. He has experienced its vitalizing and health-giving virtues; he is well aware of the fact that it plucked him from a terrible condition of weakness and suffering and placed him on the solid rock of health and strength. His brief and truthful statement regarding his failure with physicians in his own home and in hespital is a strong and direct warning to all who are in a critical condition. Health, new life and perfect safety can

the Gospels.

The Mascott is a good steamer, and has an unusually courteous and capable captain. Remenyi, the famous Hungarian violinist, and his concert singers, the latter in showy stage dress came on board. They had just been giving an entertainment in Key West. The violinist is about 70 years en giving an entertainment in Key old, but plays as well as ever. He appears to think that he is the last of the artists of his grade, and walks about with a sheet of incomplete music in his hand, part of an extraordinary oratorio which he is forever com-posing. He speaks eight or nine languages, and his English is expressive. He told me that for sixteen years he had not eaten meat. About nine months ago he fell, from vertigo, and had two or three attacks of the kind. Examinations by experts led them to predict that he had, at the most, but a few months to live. He was very persistent and determined to keep on playing. In St. Louis he met a Ger-man doctor who had just returned from Europe, who told him seven or eight months ago that there was but very little hope for him, but that he might prolong his days if he would adopt a diet of baked apples, bread made of Graham flour, water and salt, and for a drink, skimmed milk. On that he has lived for eight months having the apples baked wherever he goes, eating seven or eight of them at each meal. Now he seems to be well, every trace of his malady, which chemical analysis can show, having disappeared. (Whiston's Josephus, Antiquities, Book XVIII., chapter iii., section 3.)

young ladies to play some of his un-published compositions, and his impatience was grotesque when they did not perform to suit him.
