## Candidates of the Liberal Party in Western Ridings

Lieut.-Col. James Munro, V. M., Liberal candidate for the Ontario riding of North

1846. He was educated at the Embro public school, and has since followed the occupations of a farmer and banker, respectively. He was elected to the wardenship of his native county and filled that position with credit. At the time of the Trent affair, he took a first-class certificate at the military school and entered the militia service. Subsequently, during the Fenian raids, he raised a company at Lakeside, which afterwards became absorbed in the Oxford Rifles. The colonel was adjutant of this regiment for some time prior to being raised to field rank. He has commanded the Oxford Rifles with credit to himself and the regiment since February, 1885, and the corps is known as one of the best rural regiments in Canada. In 1897, Col. Munro accompanied the military contingent that represented Canada at the diamond jubilee in London, Eng., in the capacity of paymaster. In 1878 Col. Munro married Miss Agnes Orr Holmes.

## ollar's Worth Free

## To Any Rheumatic Sufferer

no deposit—no reference—no return—nothing to risk—nothing to pay. Cure now of any rheumatic sufferer who has a full dollar's worth of money to spare.

Crystallized Poison!  
Your blood is always full of poison—poison you eat and drink and breathe. It is the purpose of your system, it is the purpose of your blood, to absorb and carry off this poison. And the kidneys, which are the great excretory organs, are expected to cleanse the blood, to get rid of the poison, to get rid of the crystallized poison.

Certain Relief  
I spent twenty years in experimenting before I felt satisfied that I had a certain remedy for this dread disease, a remedy which would not only clean out the blood, but one which would stop its formation.

The secret lay in a wonderful chemical I found in Germany. When I found this I found a cure for this dread disease, a cure that would be practically certain, not even then, before I made an announcement to the world, I made a promise to put my name on it—I made more than 2,000 tests. And my failures were but 2 per cent.

This German chemical is not the only ingredient in use in Dr. Shoop's Rheumatic Cure—but it makes the remedy possible, it makes possible an achievement which, I do not think, could have been made in no other way.

The duty, too, was high, in all it cost me \$400,000 per pound, but what is \$400,000 per pound for a REAL remedy for the world's most painful disease—for a REAL relief from the greatest torture human beings know?

I don't mean that Dr. Shoop's Rheumatic Cure is a cure in the sense that it is again—that is impossible. But it will drive from the blood the poison which causes pain and swelling, and then that is the end of the suffering—the end of the suffering. That is why I can afford to make this liberal offer—that is why I can afford to spend the FIRST dollar that I receive from the suffering—the end of the suffering, the world over, may learn of my remedy.

Simply Write Me  
The offer is open to everyone, everywhere, who has not tried my remedy. But you must write me, for the free dollar package order. I will send you an order on your druggist, which he will redempt as gladly as he would accept a dollar bill. He will hand you from his shelves a standard sized package and he will send the bill to me. There are no conditions—no requirements. All that I ask you to do is to write—write today. I will send my book on Rheumatism beside it. It is free. It will help you to understand your case. Address Dr. Shoop, Box 4, Racine, Wis.

## BILLY MACLEAN AND HIS BUGABOO

Blair Resignation Under Discussion in House—Estimates Down Today.

Ottawa, Ont., Jan. 17.—The Hon. A. G. Blair's resignation from the railway commission came up for a brief discussion in the House today. Apart from that there was little doing. Hon. Mr. Fisher's measure respecting census and statistics was given its first reading. The House went into committee on Mr. Fisher's seed grain inspection bill, a measure designed to regulate the sale of seed, thus insuring to the farmer the purest and best article.

Referring to Mr. Blair's resignation, the Premier explained the delay in appointing a successor. The position had been offered a member of the commission, but as the latter was engaged at the time in deciding certain election appeals he could not consider the offer until the second week in February. The Government had decided to wait until that time, and hoped it would be accepted, the gentleman in question being eminently fitted for the position.

This brought Mr. MacLean to his feet with the statement that it was not his intention to make any explanation of Mr. Blair's resignation. He declared the Government organs in Montreal and Toronto were manufacturing an explanation, and he hoped that before the close of the session it would be forthcoming.

Sir Wilfrid expressed regret that he could not gratify Mr. MacLean's fastidious curiosity with regard to the manner of Mr. Blair's resignation. "I may say to my honorable friend, and perhaps it is notorious to him, that I was not cognate with his resignation, and I am at a loss to give him any explanation of it," continued Sir Wilfrid. "But since we are in the way of making confessions, I rather expected that my honorable friend himself would be in a position to give us some information, because I have read a great lot of what I supposed to be information in a certain paper with which he is connected. But if he is only speaking from hearsay, that is another thing. If he has any information he can give it to us, for my part, I have none."

This brought Mr. MacLean to his feet a second time, and in a great hurry, with the remark that the friends of the Premier were in possession of considerable information in the matter. He said the names of cabinet ministers had been connected with the matter, serious charges being made.

"I have only to say that I have never heard any charges made against any member, against any minister," Sir Wilfrid replied.

In reply to Mr. Foster Sir Wilfrid said the estimates would be brought down tomorrow.

## THE DAIRY INDUSTRY

Opening of an Important Department at the O. A. C.

Guelph, Jan. 18.—The annual opening exercises in connection with the dairy department of the O. A. C. took place at 2:30 yesterday afternoon in the lecture-room, which was filled.

Prof. Dean opened the meeting, and Mr. P. for North Perth, regretting his absence, he was pleased to hear that the meeting was so well attended. Mr. P. and Prof. G. L. MacKay, of Ames, Iowa, President Creelman would also speak.

Mr. Derbyshire is president of the Ontario Dairywomen's Association. He showed his interest in the work that he came all the way from Brockville to address the class, and he was some forty miles from home.

Mr. Derbyshire gave a very pleasant and interesting talk to the students, emphasizing the importance of this line of instruction, and the need for the educational interests of the farming community, and the influence that such education had in bettering the condition of the farmer and spreading abroad the knowledge obtained.

The good results from the college were twice as much now as ten years ago. He paid a tribute to Commissioner Mills, the late president, for his yeoman service in building up this magnificent institution. He was proud to see a young Canadian had been appointed to take his place, and from what he knew of him he would fill the position with credit to the Province.

He felt proud of the record of the college. Today there was more demand than supply for good men who could take the special lines. They could command their price. The young men should push themselves forward, and show that they were worthy of the name of Canadians, and lived in the best Province under the sun and among the most highly-educated people.

President Creelman stated that there were billions of dollars in the agricultural industry in this Province, and that they should be encouraged to the men and women who were making the cheese and butter. On leaving the college students should keep up their study. He would say to the students that Mr. Mills had done a great deal towards raising the standard of farming in the Province. At present there are 600. When they all came in he expected 1,200. The college had a reputation in South America, Britain, Europe, Australia, and even the Congo River Colony. On leaving students should keep up their studies.

Prof. MacKay was pleased with all the departments and the excellence of the work, the manner in which the institution was run, and gave the students a few words of encouragement on the task they were engaged in. Good men were desired. It was only by persistent, hard work and close application that they could carry out such a task. He gave a very interesting account of butter-making in Denmark, and saw no reason why Canadian butter should not be as marketable as the facilities were as good.

A short musical programme was given, when the meeting closed. Thanks to the speakers, Prof. Dean, Miss Rose and the musicians, and singing God Save the King.

Hit by Flyer.  
Toronto, Jan. 17.—W. J. Hammill, a G. T. R. freight conductor, of Lindsay, while checking the train on which he was about to leave the yards at East Toronto tonight was struck by the Peterboro Flyer and killed. Hammill had just stepped on the main line when the Flyer dashed through and he was hurled some distance. Death was instantaneous. Hammill was about 35 years of age, leaving a widow and one

## THE HUB KEEN FOR RECIPROCITY

Boston Chamber of Commerce Regrets No Arrangement Has Been Reached.

Boston, Jan. 17.—The feature of the opening of the annual meeting of the Boston Chamber of Commerce today was the reading of the annual report. The directors' report considered at length a decline which has taken place in the foreign commerce of the port of Boston since 1903. Chief among the causes of the decline was placed the alleged discrimination practiced by the trunk line railroads in accordance to the ports of Philadelphia, Baltimore and Newport News, lower rates than the rates for the port of Boston and New York. On grain exports and reciprocity with Canada the report said:

"So severe was the decline in the volume of grain coming to this port for export during the first half of the year, that the rates for local inspection were increased from 30 cents to 50 cents per car, and for inspection into elevators, from 10 cents to 50 cents per 1,000 bushels. For many years this organization was a strong advocate of more liberal trade relations with Canada and Newfoundland. We regret to say that no definite progress has yet been made so far as the matter of the tariff is concerned. In our last report, however, the settlement of the Alaskan boundary dispute in 1893 removed the chief obstacle to a satisfactory adjustment of this question."

Sir Wilfrid expressed regret that he could not gratify Mr. MacLean's fastidious curiosity with regard to the manner of Mr. Blair's resignation. "I may say to my honorable friend, and perhaps it is notorious to him, that I was not cognate with his resignation, and I am at a loss to give him any explanation of it," continued Sir Wilfrid. "But since we are in the way of making confessions, I rather expected that my honorable friend himself would be in a position to give us some information, because I have read a great lot of what I supposed to be information in a certain paper with which he is connected. But if he is only speaking from hearsay, that is another thing. If he has any information he can give it to us, for my part, I have none."

This brought Mr. MacLean to his feet a second time, and in a great hurry, with the remark that the friends of the Premier were in possession of considerable information in the matter. He said the names of cabinet ministers had been connected with the matter, serious charges being made.

"I have only to say that I have never heard any charges made against any member, against any minister," Sir Wilfrid replied.

In reply to Mr. Foster Sir Wilfrid said the estimates would be brought down tomorrow.

FATAL TO THE CHURCH  
Primate of Normandy on Common Idea of Temporal Power.

Paris, Jan. 17.—The Archbishop of Rouen, Primate of Normandy, in a letter addressed to the clergy of his arch-diocese on the intervention of priests in politics, says:

"The interference of the priesthood in political affairs has always been fatal to the church. We have often said this, and we now repeat it—that which has been the cause of death cannot bring back to life. Politics cannot restore the church, and we have caused us to lose. There is only one way in which the priest can improve the political atmosphere, and that is by working with apostolic zeal and by apostolic means for the sanctification of souls. The social effects which transform a people are the result of the sanctification of souls. Everything else is but sterile agitation which does not go beyond the heart, in which is the root of all disorder and source of all regeneration. In order to weed out this root and to cause this source to draw what we need is rather saintly pastors that political priests."

REMEMBERED MR. WOOLATT  
Pere Marquette Employees Make Him a Presentation.

Walkerville, Ont., Jan. 18.—The employees of the Buffalo division of the Pere Marquette Railway Monday presented Mr. William Woollett, until recently superintendent of the division with a fine silver cabinet. Mr. Woollett leaves today for the Northwest Territories, where he will remain for several months for the benefit of his health. He was superintendent of the Lake Erie and Detroit River Railway for fifteen years, previous to that road being taken over by the Pere Marquette Company.

TO CURE A COLD IN ONE DAY  
Take Laxative Bromine Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

THE NEVER-FAILING medicine, Holloway's Corn Cure, removes all kinds of corns, warts, etc., even the most difficult to remove cannot withstand this wonderful remedy.

Water Purity  
Pure, hard water is the most important ingredient in ale.

Water used in Carling's Ale is taken from a series of springs with solid rock bottoms at depths of more than 1000 feet, and is conducted to a stone-paved reservoir.

Is entirely free from acid or alkaline and any kind of impurity.

Ask for Carling's Ale—accept no other, because no other is quite so good.

## HUNDREDS BURIED BY EARTHQUAKE

Terrible Disaster Overtakes a Russian Town North of Baku.

London, Jan. 18.—A dispatch from St. Petersburg to a news agency reports that an earthquake at Shekma, 75 miles north-northeast of Baku, buried hundreds of persons in the ruins of buildings in the lower part of the town, which was densely populated, despite the decision after the earthquake of three years ago, that no more houses should be built there.

PEACEMAKER MURDERED  
Winnipeg Negro Believed to Have Been Killed by Galicians.

Winnipeg, Jan. 17.—The north end of the city has again been the scene of a murder. The victim is a colored man named Geo. King. His body was discovered this morning between the tracks in the C. P. R. yard.

From the meager details that can be gathered from the police it is believed that the victim was a young man, and that he was killed by one of the men. Then, with fiendish cunning, that suspicion might be diverted from himself, he was killed by one of the men. Then, with fiendish cunning, that suspicion might be diverted from himself, he was killed by one of the men.

It is clear to the minds of the police that King had been most foully murdered. The police have made it their duty to find the man who killed him, and they are now working with apostolic zeal and by apostolic means for the sanctification of souls. The social effects which transform a people are the result of the sanctification of souls. Everything else is but sterile agitation which does not go beyond the heart, in which is the root of all disorder and source of all regeneration. In order to weed out this root and to cause this source to draw what we need is rather saintly pastors that political priests."
