To Properly Treat Obstinate Wrinkles

Particularly where wrinkles are long and deep, the massage devotee is apt to rub too hard and too frequently. This

loosens the skin, causes muscles to sag, aggravates the wrinkled condition—just the opposite result from that sought. Better than massaging, or anything else, for the most obstinate wrinkles, as well as the finest lines, is a formula well known in England, which you may readily avail yourselves of, as you will have no difficulty procuring the inexpensive constituents from druggists in this coun-try. It is thus: One ounce powdered saxolite, dissolved in one-half pint witch

hazel. Bathe face, neck or hands in this.

The effect is really marvelous, not only as to wrinkles, but also in cases of baggy cheeks and chin. Marked im-provement is noticed after the very first application. The lotion is cooling and soothing, tending to relieve fatigue and remove "that tired look."—advt.
