New Spring Model Corsets

Canada

Tailored to Order and Ready to Wear

Changes in corset styles are this season decidedly sane. The pre-vailing design of the new corset has just such curves as the human body has. Front is straight, back nearly straight, and a slight curve at waist line towards the front over the hips. The new corset is cut high enough to support the bust, and the skirt is long enough to compress the hips. This mode is healthful and comfortable, yet adheres perfectly to the new dress styles indicated for spring.
