ACIDS IN STOMACH CAUSE INDIGESTION

Create Gas, Sourness and Pain-How To Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestents are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few nunces of Bisurated Magnesia and take a teaspoonful in a quarter slass of water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas, or pain. Bisurated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. How To Avoid The Pitfalls of Prosperity

There is universal agreement that America is out of the slough of industrial depression and is again climbing the heights toward prosperty. Admitting this condition, it is of the utmost importance to every merchant, manufacturer, and, in fact, to every man and woman to know if the United States, as a nation, is standing on firm, level, high ground or is making a perilous ascent, from which business must almost inevitably fall headlong, perhaps, with another "buyers' strike," and plunge downward again into the depths of depression, unemployment and epidemics of bankruptcy.

As one financial writer sees it, American business is at a "cross-roads," where it may choose between a safe path to continued prosperity or the more tempting climb to the dizzy heights of inflation and the inevitable downward crash.

That LITERARY DIGEST readers may know just where the country stands and that they may know how to choose the safer path, the leading article in that magazine this week presents expert opinion upon present and future business conditions. This news-feature, coming at this time, and because of its comprehensive scope, will be read carefully.
