Death Roll of Floods Increased to Eight-Kentucky Towns Are Heavy Sufferers—Farm Lands Inundated

LOUISVILLE, Ky., April 3.—The area fected by the flood caused by an almost unprecedented volume of water in the Mississippi was not extended a great deal yesterday, but the situation at the deluged centres became more menacing. Two more levees breaks were reported near Chester, where 7000 acres of farming land is inundated.

Twelve hours of sunshine and a slight check in the rise of the river have com-bined to give the situation a more op-timistic outlook in the opinion of the government engineers, who said last night that if the stage at Memphis does legislation of last session were filled at the cabinet council today. No trains have run in or out of the town for several days, and food and tents en

route there are held up by washouts.

At Columbus, Ky., which was the first town inundated, the situation is grave. Residents are leaving rapidly and there is much suffering in outlying districts. The damage in that vicinity is estimated at \$200,000. The damage at Memphis is estimated at \$250,000 About 1,200 persone have been driven

Reports from New Madrid, Mo., are neagre. The town is flooded but no

loss of life is reported.

The situation of the flood is not limited to the river towns. Small tributaries have overflowed their banks and it is estimated that fully 300,000 acres of farm lands in Kentucky, Tennessee and Missouri are flooded, and probably 900,000 more are untilled because of fear that the levees may break.
