## THE PAGANTRY OF DEATH.

Mr. Goldwin Smith on Sir John Thompson's Funeral.

Editor London. Advertiser: Etiquette killed Sir John Thompson by making a stand in a respectful attitude near an hour and a half at a Privy Council, when he was in a critical state of health instead of letting him sit down. It owed him the only compensation it could give, a state funeral, but after reading the account of the pomp one could not help thinking of the lines of the poet, who, after describing a pageant of the same kind as:

Yet surely when the level ray  
Of some mild eve descending  
Digs on the village grave, gray  
In years are ours had well begun.

As there is a simple vestment clad,  
He speaks beneath the churchyard tree,  
In solemn tones—but yet not sad—  
Of what man is—that man that he!

And clustering 'round the grave, half hid  
By that same quiet churchyard row,  
The rustle murmurs bend, to bid  
The dust that they loved a last adieu.

That ray, methinks, that rests so shewn  
Upon a tranquil, as serene,  
Gives to the eye a fairer scene,  
Speaks to the heart with holier breath  
Than all the pageantry of death.

You would hardly find a single case in which a great man had given instructions for his own funeral without directing that it should be simple and that death, in his case, should be unobscured by pageantry. The three men who have perhaps done most for the English people in this century, Peel, Bright and Cobden, were all buried without any other pageant than the movements of the millions to whom they have given bread.

Peel would have been buried in Westminster Abbey, but his will expressly enjoined that he should be laid among his household at Brayton, Bright at Rochdale, and his funeral, according to his last wish, was a strictly private, though spontaneous affection added a vast multitude to the procession. The Duke of Wellington's funeral, in the case, yet there were those who regarded his apotheosis as Paganism. His obsequies would have been a magnificent display in accordance with a life devoted to duty, if, instead of a funeral car dragged by 12 horses and decorated with heraldic achievements, the hero had been borne to the grave on a gun-carriage. A spectacle so magnificent of taste told me that the only thing that impressed him in the ceremony was the descent of the coffin into the vault, which seemed to close an era.

We are told that all across the Atlantic fond of the distinguished persons who were aboard the Blenheim watched the corpse all night. Was this genuine sympathy, or was it a desire to see from robbers or from evil spirits? If from robbers it was a relic of barbarism, if from evil spirits it was a relic of superstition, in either case it was a mockery of death.

If political motives or personal aims mingled, as there seems reason for believing, with the ostentation of woe, this adds to the repulsiveness of the display.

Now comes the question of public processions for the family. It is a serious question, because what is done in one case must be done in other cases of the same kind. Yet Sir John Thompson's family have a fair claim, not only on our sympathy, but on our justice. Sir John had been compelled, in conformity with the social requirements and the present scale of living at Ottawa, to expend on ministerial hospitalities more than with his salary he could afford. The minister of Ottawa inevitably leads to expensive habits. Years after the departure of Lord Dufferin, who was the predecessor of this court, it was said that the narrow purses of clerks in Government departments were still feeling the effects of his reign.

What is now going on will aggravate the evil. A Montreal paper gives a picture of the State "Drawing-room." It is a ludicrous imitation of the ceremony at Rockingham Palace. Her Excellency has her train led up by a page dressed in a French court dress of Francis I. of dark blue plush, lined with white satin, edged with beaver, lace ruffles, and with buckles, ribbons of the king, large plumed hats with long white plumes, and sword. There is a corresponding catalog of ladies' dresses all in the same style. A Montreal journal announces that "Mr. Macdonald is teaching deportment, conversation and the use of the fan to the members of his Excellency's drawing-room next week."

It is wonderful that self-respecting people can take part in such a performance, at which they may be sure to generate except vanity and funkiness, together with the habits of expenditure, which have left the family of a Prime Minister in want of public assistance.

Yours faithfully, GOLDWIN SMITH.

## RELIEF OF THE DISTRESS.

Work of the House of Industry—Men Who Refuse Work.

Two facts were brought out at the meeting of the Board of Managers at the House of Industry yesterday: That there is not as much acute suffering amongst the poor as there was 12 months ago; and that nearly one-half of the men who applied for relief declined to do the small amount of labor required.

During the past month 266 males and 13 females had been admitted to the special ward, some of them almost every night. Eighty were registered as Roman Catholics, 226 as Protestants. Their nationality was: English 99, Irish 76, Scotch 21, Canadian 103, United States 4, foreigners 5.

During the past four weeks 856 families, among whom were 1925 children, were relieved. The distribution amongst them consisted of 216 tons coal, 10,168 4-lb. loaves, 560 lbs. rice, 560 lbs. oatmeal, 280 lbs. sugar, 70 lbs. tea. Daily there had been distributed 150 gallons of soup. The English headed the list, Irish came next, then Canadian, Scotch, American and foreigners.

Since Dec. 6 665 orders to cut wood in the city and the English were issued. 346 did the work for the sake of the relief the House affords; 317 took their orders and never did any work.

There are at present 103 inmates, 73 males, 30 females. Three inmates, aged respectively, 75, 78 and 79, were released. A legacy of \$1000 had been received from Alexander Lawrie's estate and \$5700 from the City Treasurer.

Henry A. King & Co.'s special wire from London, Thaiman & Co., New York: While the general list showed a moderate degree of strength in the morning, to-day Chicago Gas had a sharp decline. By noon, however, Gas had steadied, and the latter part of the day because of a general list showed a renewed sagging tendency. The present performance in Chicago Gas is in keeping with the past history of the property and the manipulation of the market.

Sanction is generally construed as having the effect of approval of influence, though the street is still impressed with the belief that the control has passed into strong hands and that the present market will be smoothed over just as well as those who are specialists in the market. A dividend on the stock is to be declared. In the latter part of the day the disturbing influences were the strength of exchange, the market of \$500,000 gold from the Treasury, and the probability of large exports of wheat, together with the fact that the Senate Committee has postponed a report on the Pooling Bill for another week.

The market is dull, with a slight advance at 8 to 8.25, according to quality, and steady at 8.75 to 8.80. Timothy, \$2.25 to \$2.75.
