

The Fly with spongy feet collects the invisible germs of disease—spreads them over our food and poisons us with typhoid.

The Mosquito with its bill injects into our veins **MALARIA**.

WE ARE all exposed to such dangers—our only armor is **good red blood!** Let your stomach be of good digestion, your liver active and your lungs full of good pure air and you don't surrender to any of the disease-bearing germs. The best known tonic and alternative, that corrects a torpid liver, and helps digestion so that good blood is manufactured and the system nourished, is

Dr. Pierce's Golden Medical Discovery

This famous medicine has been sold by medicine dealers in its liquid form for over forty years, giving great satisfaction. If you prefer you can now obtain Dr. Pierce's Golden Medical Discovery tablets of your druggist at \$1.00, also in 50c size or by mail—send 50 one-cent stamps, R.V. Pierce, M. D., Buffalo, N.Y., for trial box.

THINK THIS OVER!

One ton of butter contains 50 cents worth of fertilizer constituents.

One ton of milk contains \$2.00 worth of fertilizer constituents.

One ton of wheat contains \$7.75 worth of fertilizer constituents.

One ton of oats contains \$7.25 worth of fertilizer constituents.

One ton of corn contains \$3.75 worth of fertilizer constituents.

One ton of clover hay contains \$9.07 worth of fertilizer constituents.

One ton of alfalfa contains \$9.50 worth of fertilizer constituents.—Kansas Industrialist.

HERE'S A USEFUL RAG DOLL.

Tests Corn Just as Well as Any Expensive Contrivance.

With an expenditure of half a dollar or even less and an hour's time a seed corn tester may be made at home that will answer every purpose.

This simple device for selecting good seed ears is known as the "rag doll tester," probably because it resembles nothing more than a rag doll when it is rolled up and put to soak in a pail of water. Its efficiency was proved in several years' test of it at the Iowa agricultural experiment station, which says that it will select good ears as satisfactorily as the best expensive manufactured testers.

Buy a few yards of sheeting of good quality and tear it into strips eight inches wide and from three to five inches long. If it is planned to use the strips a number of times when the edges, as otherwise the ravellings sometimes disarrange the kernels in unrolling.

Down the middle of each cloth strip lengthwise draw a line with a heavy pencil. Then draw squares about three inches wide and number the squares.

Wet one of the strips thoroughly and stretch it out in front of the ears to be tested. Take six kernels from ear No. 1 and place in square No. 1; take six kernels from ear No. 2 and place in square No. 2, and so on.

When the cloth has been filled begin at either end and roll the cloth up. If the cloth is well moistened the kernels will not push out of place. When the cloth has been rolled tie a string around each end rather loosely or, better still, use a rubber band. Number this roll No. 1. Then proceed with No. 2 in the same way. As many rolls may be used as are necessary to contain the corn which one has to test. From thirty to fifty ears can be tested in each roll, depending upon the length of the strip of cloth.

After the rolls have been filled they should be placed in a bucket or tub of water, where they may remain from two to eighteen hours, depending upon the preference of the operator. At the end of this time pour off the water and turn the bucket or tub upside down over the rolls or use a common dry goods box for this purpose. A couple of small pieces of wood should be laid under the rolls and one edge of the pail should be lifted from one-half to one inch in order to give ventilation. At the end of five days the kernels should be ready to read.

Depending upon the arrangement of ears, select first either roll No. 1 or the last roll filled. This cloth will be unrolled in front of the ears represented. Examine all kernels carefully. In all cases in which all six kernels are not strong in germination the ear should be thrown away.—Farm Press.

THE COURSE DINNER.

How This Meal May Be Well Served With One Maid.

Many of our housewives who want the elegance of a course dinner, yet who are limited to the services of one maid, would be much amazed at the ease with which they can both cook and serve if a little forethought be used in the menu.

A preliminary cocktail, prepared beforehand from a bottled sauce or ketchup and oysters or clams, makes a good beginning and can be made ready in the early morning and placed on ice to good advantage.

A clear soup with vermicelli or noodles can be cooked the day before and may simmer quietly for half an hour before serving time without further care.

Fish is well represented by deviled crabs, seasoned and turned into little mounds in the center of scallop shells. This may be done any time several hours previous to the feast, and all they need at mealtime is a simple broiling in the oven.

Large and substantial roasts are not only hard to prepare and serve, but also fill the oven to the exclusion of everything else, so it is advisable to have delicious little steaks, fillet of beef, with canned peas and pomme de terre au gratin, and prepared early in the day from mashed potatoes and a sprinkling of grated cheese.

Most salads may without serious injury be mixed several hours before using and placed in a large bowl in the refrigerator, placing it on the lettuce leaves at serving time. Cheese balls are better made early and iced.

Certainly for dessert nothing could be more delicious, more appetizing or more decorative than individual Charlotte russe, more popular than ice cream, with hot maple or chocolate sauce.

A Bowl Shower.

A very practical shower for a bride who is to keep house is one to which the guests are asked to bring bowls. There are wooden chopping bowls, brass and copper bowls, finger bowls of glass and of metal, mayonnaise bowls and even a punch bowl. To make fun part of the refreshments could be served in bowls and the tea in small handless cups, which are lovely to use for individual gelatins and jellies.

will last a lifetime—American Agriculturist.

Heavy Fertilization is Best.
In wheat fertilization experiments at the Indiana experiment station on clay and loam soils the complete fertilizer gave the largest average increase and the greatest average profit per acre. The use of 200 pounds of fertilizer per acre on wheat proved more profitable than the use of 100 pounds per acre.

Trees Are Worth Saving.
A tree can be bridge grafted in less than half an hour, and it is better to take this time to do it than to let a valuable tree die.

An Actor's Emergency Shirt.
As for paper fasteners a touring actor writes to point out another of their utilities: "There is, at times, in a small company especially, a scarcity of starched linen. And shirts, like King John's treasure, get lost or mislaid in the wash. You are playing a dude part, say, with naught but a flannel shirt to go with your dress coat. Take a sheet of note paper or foolscap, prod it under your vest, and where the central stud should be insert a round headed brass paper fastener! Necessity mothers invention.—London Standard.

No Chance.
"And what is your occupation?" asked the accident insurance agent.
"I'm a woodman. During the hunting season I act as a guide."
"Oh, I'm sorry, but my company won't write a policy on your class."
"Why not? Surely I'm a good risk."
"My dear sir, you're not a risk; you're a certainty."—Detroit Free Press.

Well Put In.
"Excuse me, sir, but will you repeat that part of your terms? I lost myself for a second."
"I was just saying that with what I paid you you would be expected to find yourself."—Baltimore American.

Breed Your Mares to the Leading Horse of the Day
JARDINIER
NO. 47,511, IMPORTED.

JARDINIER is pronounced by first-class judges to be the best Percheron horse ever brought to Canada. Color—black, with star on forehead, 17 hands high, weighs 1900 lbs.
