

## P R E F A C E .

---

In presenting a new volume of the Montreal Directory to the public, the Compiler feels bound to apologise for the delay which has occurred in its issue, a delay which has been mainly caused by a desire to render the work as useful and and correct as possible, to attain which end he considered it imperative that all Government Officers and Offices should be included.

The work contains about a thousand names more in the Alphabetical part than that of last year. When to this it is added that the price of the book remains as before, although its value and cost have been materially enhanced, he is induced to hope that a copy will be purchased by each gentleman in business, who desires the success and permanency of the Directory to be assured.

To those gentlemen who have heretofore sustained the work by advertising or subscribing, the Compiler begs to return his grateful acknowledgments, and to express a confident hope, that the present volume will be found still more worthy of their support than its predecessors.

ROBT. W. S. MACKAY.

Montreal, July, 1844.
