Toronto, December 16th, 1909.

Ice and snow are lessening the activity of building in both city and country, and for the same reason the movement of many materials for exterior use has declined. Pitch and tar, roofing felt and paper, sewer pipe, and bricks are less active except for repairing purposes, but structural steel, iron pipe, rails and sheets, continue in fair request, and lumber is still moving. Pig-iron shows good activity and holders are firm as to price, the like may be said of boiler plates and tubes. In fact the metals trades, shelf goods included, are more active than is usual at this time of the year.

It is not easy to obtain at this point a clean-cut quotation for cement. The close of navigation makes it hopeless to expect as low prices as have prevailed for recent months, while it is too early to obtain quotations for next spring. Apparently the managers of the Canada Cement Company have not resolved upon any serious or immediate advance, while those mills outside the combine are in no hurry to quote prices.

The following are wholesale prices for Toronto, where not otherwise explained, although for broken quantities higher prices are quoted:—

Antimony.—Demand active and price higher at \$9.25 per 100 lbs.

Axes.—Standard makes, double bitted, \$8 to \$10; single bitted, per dozen, \$7 to \$9

Bar Iron.—\$1.95 to \$2, base, per 100 lbs., from stock to wholesale dealer Market well supplied.

Boiler Plates.—¼-inch and heavier, \$2.20. Boiler heads 25c. per 100 pounds advance on plate. Tank plate, 3-16-inch, \$2.40 per 100 lbs.
