He believes, he says, that he was legally entitled to affirm. The oath, although to him including words of idle, meaningless character, was, and is, regarded by numbers of his tellow countrymen as an appeal to Deity to take cognizance of their swearing. It would have been an act of hyprocrisy to voluntarily take this oath, or to take it without protest, as though it meant in his mouth any such appeal. The committee having decided against him, to appeal to the house against their decision would be ungracious, and would certainly involve great delay of public business. Should the decision be in his favour, it could only be after a bitter Parl unentary debate, in which the Government and the Liberal party would be unfurly sought to be burdened with his anti-theological views, and with his return to Parliament. He will consider himself, in taking the oath, as bound by the spirit which affirmation would have conveyed, had he been permitted to take v. Mr. Bradlaugh is not the only man who has ever offered to take an oath in the terms of which he did not believe, but it does not follow that it is the less discreditable to his manhood and honesty for him -a rabid and ostentatious Atheist to be ready to make a solemn appeal to what, in his own estimation, was nothing at all.
