It will be remembered that in '39 an '40 the rebellion occurred, and for two or three years the classes were closed. Only eight or nine years ago the university had almost reached the limit of its accommodation; the class rooms and laboratories were overcrowded and students unable to obtain admission were forced to go elsewhere. Then it was that the Chancellor came to their aid (cheers), and enabled them to further extend their usefulness. The Campbell Memorial fund had also enabled them to extend their class rooms, laboratories and equipments. They had accordingly endeavored to increase the useful working of the institution. He felt that their efforts had been fully appreciated by the class from which their students are drawn. But while congratulating themselves they must face a feeling of anxiety. They had seen one period of stagnation owing to overcrowding; that must not occur again; they could not afford it. They must keep constantly advancing. Medical teaching is not a remunerative employment; advanced methods have to be employed with the forward move of the times. The Dean felt sure that their wants only require to be made known to friends in Montreal to gain the help necessary to carry on their work as it should be carried on.

Continuing, he said:—The following gentlemen, 56 in number, have fulfilled all the requirements to entitle them to the degree of M.D., C.M., from the University. In addition to the Primary subjects mentioned, they have passed a satisfactory examination, both written and oral, on the following subjects:—Principles and Practice of Surgery, Theory and Practice of Medicine, Obstetrics and Diseases of Infancy, Gynecology, Pharmacology and Therapeutics, Medical Jurisprudence, Pathology and Hygiene —and Clinical Examinations in Medicine, Surgery, Ophthalmology, Obstetrics and Gynecology conducted in the wards of the General Hospital and Maternity:—
