fessional life. This is, we believe, the first time in the history of the Dominion that the Medical Profession of Montreal has been thus honored, but we trust that it will not be the last. The Medical profession of the Canadian metropolis has always stood high. It has always had among its number some who have stood prominently forward in advancing interests which are beneficial to the city and country. They have doubtless had their reward in the consciousness of work well done; but elevation to a sphere where larger opportunites may be seized is a reward which we think might be legitimately looked forward to by them. To the Local Legislature, Montreal has recently sent one of its popular Medical men, by a majority so large as to prove the popularity of the profession. Have we not some who would adorn the Upper Chamber?

## THE ELECTRICAL WORLD.

Published by the W. J. Johnston Co., 253 Broadway, New York.

The first issue of this illustrated weekly for 1896 is a huge number, having 136 pages ; it is the 27th vol. ; has the largest circulation of any electrical journal, and is an able exponent of the progress of every department of electrical science.

## CLEVELAND JOURNAL OF MEDICINE,

The official organ of the Cleveland Medical Society, is the title of a new medical journal, edited by Henry S. Upson, M.D., and P. Maxwell Foshay, M.D., with six associate editors. It is the successor of the *Western Reserve Medical Journal*. In the editorial bow there is a reference to the prosperity and growth of Cleveland, in regard to its population, business, shipbuilding and steel manufacturing interests and educational matters, showing that a new era of progress and enterprise has begun in this hitherto somewhat slow city.

This journal will represent the work of the Cleveland Medical Society founded in 1893, and having now a membership of 300, and which claims to be the most progressive medical organization in the United States, having adopted methods and features novel to such organizations, one of which is said to be of signal benefit in arousing an interest in the society, and greatly extending its membership, viz., the bringing of medical teachers and investigators of national renown several times during the year to address its mem-
