TORONTO MARKETS.

I TRADE.—Has been rather quiet all week.

BUTTER.—Holders are now offering considerable quantities and seem anxious to find buyers, but this is not to do as all our dealers except hold out most determinedly. The only ones reported are those of 100 lbs. of butter of selected at 13c, and a car of the same sort to-day at 13c at Guelph. Fresh lots there are no buyers at any price. British advices continue to be unfavourable. In London there was nothing doing at latest advices, and at Liverpool quotations stood at figures equal to 15 to 17d per lb.

CHEESE.—The market has been fairly active. There has been a lot of 36 boxes of mixed qualities sold last week at 9c, and two lots of 25 each sold at the same price this week. But a lot of fifty boxes of choice brought 9d outside. Prices of small lots have declined half a cent.

EGGS.—Receipts have been on the increase, and there are now as many to be had as are wanted. Prices have declined about a cent, the range at present being from 14 to 15c.

PORK.—There is very little doing. The enquiry has fallen off, but holders are firm at unchanged quotations.

BAKED.—The market is active. Sales were made of 200 sides of Cumberland at 6c; 100 sides at 7c; lots of one and two tons have sold at 7c to 7½c; a good demand exists for these and still smaller lots.

HAMS.—Stocks are very light. The demand continues to be active and prices firm. [For a lot of 100 canvassed 13c has been paid and none could be had at a lower figure.

LAND.—Seems to be rather more active. There have been sales this week of lots of 40 and 50 timbers at 9c. Small lots are steady at 10 to 10½c.

HOGS.—There is very little doing, almost all sales are by contract; prices are unchanged.

DRIED APPLES.—Are quiet but hold firmly.

HOPS.—Some few bags of old have been sold at 15c and some more shipped. Last year are enquired for and if of choice quality would probably command 60c, and scarcely any can be had.

Special Notice.

Any organ of the human structure unduly exercised is taxed at the expense of the rest.

The brain burdened with care, grief or hard study, will withdraw a portion of the nervous element, which may be required to promote healthy muscular action, from the heart, lungs, stomach, &c., and thus cause them to degenerate and become incompetent to perform their duties, so that disease follows.

Consequently, although Fellow's Compound Syrup of Hypophosphite will surely cure many diseases of those organs, patients must abstain from excessive indulgence or such habits as cause or proportionately the malady, if they would remain healthy after discontinuing its use.

NEW YORK AND ERIE RAILWAY

We met with a paragraph the other day which is very descriptive of this grand thoroughfare of the world, and now give it for the benefit of the Canadian public:

"The railroads here, that is in England, are not better than our own. Either the English roads have deteriorated, or else our own have appreciated. I assume that the fastest train on the direct line between Liverpool and London may be considered a fair sample, and compared with similar trains on the New York and Erie, railway at home—vita which I am most familiar. From Liverpool to London, two hundred and twenty miles, through nearly three thousand thirty-five shillings—say nine dollars. On the New York and Erie, from New York to the west end of Suspension Bridge, in Canada, distance upwards of four hundred and fifty miles, in drawing room coach, the fare is nine dollars and twenty-five cents. We ride in by far the most elegant coaches on the Erie than here in England, and at only one half the cost. We ride as fast, too, on the Erie as in England, about thirty-nine miles in either case. In smoothness there is no comparison. Motion on the New York and Erie is like rolling on oil; but here we ride in our seats like tin pails on a wheelbarrow. Here there are four wheels under a car, and on the New York and Erie twelve! How one wheel falling necessitates disaster; if judiciously selected, the coach is still mobile and not a wreck. How it is difficult to talk, and impossible to write, on the Erie I do both intelligently. I am proudly surprised, after an absence of some years, to find an English railway no longer superior to others in the world in any particular that effects a traveller—no, not even in the matter of dust and ashes."
