# CLINTON

## ELECTRICALLY WELDED

# WIRE

Note the permanent weld of this ideal reinforcing material. It is every bit as strong as the wire itself—every joint welded into one piece. Clinton Electrically Welded Wire is used very extensively for the reinforcing of cement roads, bridge floors and a great variety of other reinforced concrete work. Don't decide on another reinforced concrete job until you have read our special booklet on concrete reinforcements. A copy will be mailed free on request. Ask for booklet "M.J."
