

In China, we're the resident pros.

For fifty years, **AGRA** has been involved with major engineering and construction projects throughout China. From our Beijing office, we provide comprehensive and specialized services in the areas of power, process plants, transportation, soil stabilization, environmental engineering and information management systems.

AGRA's activities in China include:

- Management information and project management system for the 18,200-Megawatt *Three Gorges* water resource development project
- The 5400-Megawatt *Longtan* hydroelectric power project
- The Ministry of Energy's strategic energy program for South China
- China's Civil Aviation Training Project
- Liaoning Province's strategic grain storage project and modernization of China's grain distribution system
- China's first High Voltage converter station and Direct Current transmission line from Gezhouba to Shanghai
- Jinshanzhi container port for Hangzhou Bay, Shanghai
- Oils and fats chemical factories in Nantong and Sheyang counties
- South China Electric Power Joint Venture Corporation's 930-kilometre HVDC system, from Tianshengqiao to Guangzhou
- A joint venture with Bridge Machinery Works, Wuhan, to execute foundation construction projects.

Find out how your company can engineer new growth opportunities in China. Call the resident pros. Call **AGRA**.
