

CHAPTER VII

The Summer Fallow	99
Do Not Plow Late—Restore Fertility to the Soil— Summer Fallow Requirements—Encourage Weed Germination—First Plowing Should be Shallow— Plow Deeper Than Usual—Pack the Plowing—Use a Cultivator—Ideal Soil Condition—Summary.	

CHAPTER VIII

Conserving Soil Fertility	113
Factors Causing Loss of Humus—The Causes of Soil Drifting—Prevention of Loss of Humus—Deep Plowing Provides Seed and Root Bed—Corrigate Land in the Fall—Shallow vs. Deep Plowing—Plow Deeper Gradually—Value of the Packer Attachment Harrow Grain for Weeds.	

CHAPTER IX

Fall Plowing	133
Leave Land Ready for the Seed—Depth to Plow in the Fall.	

CHAPTER X

Spring Plowing	138
Spring Plowing Generally Too Shallow—Prepara- tion for a Grain Crop on Spring Plowing—Cultiva- tion After Seeding.	

CHAPTER XI

Fall Cultivation of Stubble Land	147
Plow Shallow to Start the Weeds.	

CHAPTER XII

Grain Rust and Smut	151
Black Stem Rust—Stinking Smut of Wheat—Treat- ment for Smut—Methods of Treatment.	

CHAPTER XIII

Harvesting	160
Lessons from Our 1916 Experience—Late Maturing Crops Most Affected—Cutting Sometimes Delayed too Long—Conditions During August, 1916—When to Cut in a Normal Season—Determining When to
