30	Easter Eve. <i>and</i>	8 55	A 25	11 55	1 25
F	EASTER SUNDAY. <i>squalls.</i>	9 32	1 2	A 32	2 2

yarding of the stock. As the winter advances recourse should be had, as occasion requires, to the straw stack, that a clean bedding may be provided for the stock; and then if suitable sheds are connected with the barn, sufficient protection is afforded during the inclemency of winter. The advantage arising from this mode is, all is saved, and this mixing up of straw with the manure of animals, makes an excellent compost for hoed crops the ensuing spring.—We very much doubt the propriety on the score of economy, of those who heap up the manure in the yard to rot, or of others who draw and stack it in the fields for the same purpose, and are subjected to the additional expense of shoveling and carting it twice—let it remain until just previous to ploughing, which may best be done about the time of planting, and then haul, and spread, and plough it under.
