Crop damage reports from both coasts for the week were very large, at 4,220,000 bu; they having considerable of a strengthening effect. The question of a cheese standard, arising out of the difficulty between Mr. Hodgins and Mr. Hibbert, was lan S. Leys, John S. Leys, and Thos. brought up and discussed. Notice was Gerry, given two weeks ago of a motion Appli making the standard for this market the same as that of Montreal, but this did not suit the salesmen, who thought that possibly the Montreal standard might be changed.

Mr. Leitch thought the question should be brought up at the cheese men's convention at Brantford, when arrangements could be made for the adoption of a standard for the western district. Mr. Duncan McMillan could not see the advisability of the organization of a western district, because in the nor-

thern and western cheese centers the farming community were blessed with spring water, which ran through their farms, and from which their cattle drank. It was not so in this immediate district, which had very few spring water creeks. Pure water was an important element in the making of good cheese and butter, and if a standard were adopted for a western district, the cheese would often in some districts be below that standard. On motion of Messrs. McMillan and Gilmour, a committee was appointed, consisting of three buyers and three salesmen, to take into consideration the fixing of a standard for cheese bought and sold between the members of the London market and report at next meeting.
