

- 3—2481 Chronic inflammation of the kidney, large purulent collections.
 2484 Serous cyst in the supra-renal capsule, many cysts in the kidney.
 2485 Kidney with an agglomeration of cysts.
 2487 Kidney with agglomeration of hydatid cysts.
 2488 Voluminous calcareous concretions on the surface of the kidney in a case of gouty nephritis.
 2490 Calculus in the kidney; considerable dilatation and inflammation of the organ.
 2494 Atrophy with granulation of the kidney; the two portions form a homogeneous mass.
 2495 Hypertrophy of the kidney, with discoloration of the organ.
 2499 Hypertrophy and yellowish alteration of the kidney, "Bright's Disease."
 2503 Sanguineous congestion and tubercles of the kidney.
 2505 Hypertrophy of the kidney, with formation of cerebriform substance.

SEVENTH SERIES.—GLANDERS.

Anatomical Lesions of Glanders Observed in Man.

- 3—2509 Interior of the nasal fossæ and of the pharynx; ulceration of the mucous membrane.
 2511 Pustules and ulcerations agglomerated under the epiglottis and in the larynx.
 2512 Ulceration of the pituitary membrane on the separating wall of the nasal fossæ.
 2513 Cartilage separating the nasal fossæ, with profound alteration of the pituitary membrane.
 2514 Agglomeration of pustules on the skin of a man attacked with glanders.
 2515 Face with an eruption on the forehead and gangrenous patches.
 2516 Interior of the nasal fossæ, with vesiculo-pustular eruption and ulcerations.
 2517 Nasal fossæ, with ulceration and erosion of the pituitary membrane.
 2518 Metastatic abscess in the bend of the arm of an individual attacked with glanders.
 2519 Portion of the liver, with lobular abscesses and partial congestion.
 2520 Portion of the lung, with lobular abscesses.
 2521 Portion of the kidney, with lobular abscesses and partial congestion.
 2522 Portion of the spleen, with lobular abscesses and partial congestion.

Anatomical Lesion of Glanders, Observed in the Horse.

- 2523 Half of the head of a horse; pituitary membrane furrowed with ulcerations.
 2524 Half of the head of a horse; inferior turbinated bone; deep ulcerations disseminated upon it.
 2525 Vomer, with complete destruction of the mucous membrane, and erosion of the cartilages.
 2526 Portion of the liver, with lobular abscesses and partial congestion.
 2527 Portion of the spleen, do. do. do.
