

THE EVENING TIMES AND STAR, ST. JOHN, N. B., SATURDAY, JULY 27, 1910.

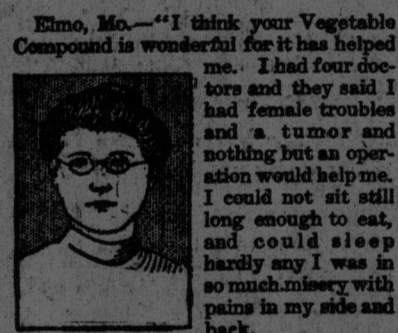

Enjoying the distinction of being the first theatrical company to use automobile instead of railroad in which to tour the country, Paul Gilmore and his company will arrive in St. John on next Thursday. The company is enroute from Halifax, where they played recently. The following is from a Halifax paper:

Paul Gilmore returned to Halifax last night and presented at the Academy of Music for the first time here *The Havoc*, which is a decided novelty, as it is different to any other play ever seen here. It has the same old story of a friend living in the same house as husband and wife, with the friend and lady becoming enamored of each other, but it is treated in a different way than usual, for instead of the husband shooting the lover, when he makes the discovery, he decides to reverse matters, agreeing to a divorce, and occupying the rooms of the former boarder, who has been married to his divorced wife.

DOCTORS GAVE HER UP

Mrs. Stuart Finally Saved By Lydia E. Pinkham's Vegetable Compound—Her Story Interesting.

Elmo, Mo.—"I think your Vegetable Compound is wonderful! It has helped me. I had four doctors and they said I had female troubles and a tumor and nothing but an operation would help me. I could not eat and could not sleep and I was in so much misery with pains in my side and back."

"A year ago last spring my doctor gave me up, and he was surprised to see me this spring and to see my condition. I give Lydia E. Pinkham's Vegetable Compound the praise wherever I go for I know I would not be here today or have our fine baby boy if I had not taken it."

Mrs. SARAH J. STUART, R.F.D. No. 2, Box 16, Elmo, Mo.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, bearing-down, feeling of fullness, indigestion, diarrhoea, or nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

SAW ROSENTHAL SHOT

New York, July 26—Testimony that "Bridge" Webster, in whose gambling house the murder gang which killed Herman Rosenthal is said to have congregated for the assassination, and Jack Sullivan, alleged go-between for certain of the police and gamblers, were in front of the hotel

Mr. Gilmore gives a decidedly clever and artistic portrayal of the husband; he is good at all times, and holds his audience steadfast in the scene in the first act where it begins to dawn on him that there is something wrong in the household. Miss Gertrude Perry gives a superb portrayal of the neglected wife, misled by the friend, and who later sees her mistake. There was a naturalness about her work that gained her much admiration, particularly as she added thereto a charming stage presence and wore handsome gowns. Ernest Band was the so-called friend, the philosopher who did not believe in marriage ties, and met the requirements of the part as defined by the husband, "there is no accounting for tastes."

William DeVore played the small part of Denton most acceptably.

Mr. Gilmore and his company will appear at the Opera House on Thursday, Friday and Saturday of next week.

RASH SO BAD BABY CAME NEAR DYING

Head Broke Out. Spread to Arms, Legs and Entire Body. Itched So He Would Scratch Until Blood Ran. One Box of Cuticura Ointment and Nearly One Cake of Cuticura Soap Cured Him. Has Had No Return.

"When my boy was about three months old, his head broke out with a rash which was very itchy and ran a watery fluid. We tried everything we could but he got worse all the time, till it spread to his arms, legs and then to his entire body. He got so bad that he came near dying. The rash would not stop. He would scratch until blood ran, and a thin yellowish stuff would be all over him. I had to keep him in bed and put him in his cradle in the daytime for a long while. I washed him with Cuticura Soap and put on one application of Cuticura Ointment and he was so soothed that he could sleep. You don't know how glad I was to feel better. I think our boy would have died but for the Cuticura Soap and Ointment. I shall always remain a firm friend of them. He was cured more than twenty years ago and there has been no return of the trouble. I shall be glad to have you publish this true statement of the cure." (Signed) Mrs. E. C. McMillan, Jasper, Ontario, May 27, 1910.

For more than a generation mothers have found a speedy, safe and economical treatment for their sick-tortured little ones in Cuticura Soap and Ointment. Although they are sold by druggists and dealers everywhere, a sample of each may be obtained free from the Potter Drug & Chem. Corp., sole purveyors, 53 Columbia Ave., Boston, U.S.A.

Metropole at the time Rosenthal was slain, was given in the coroner's court today. Following this statement Webster was arrested on a charge of homicide and held without bail for the coroner's inquest on Aug. 18.

Louis Creese, a waiter, testified that he saw the assassination. Two men sat in the "murder car" while four others who stood nearby shot Rosenthal. Creese identified Webster as one he had recognized on the scene and pointed out Sullivan as having been there immediately after the shooting.

John Reider, known in the Tenderloin as "John the Barber," testified that he had seen Webster near the Metropole after the shooting and that "Bridge" was running.

BIG CHANGES EFFECTED AT COURTENAY BAY

Rapidly Removing Hill—Breakwater Foundation Arising—Site of the Dry Dock

For any who might still hold in doubt the tangibility of the Courtenay Bay development and its connection with the future of St. John, a visit to that quarter is prescribed.

Already it has become the objective for those who forgetful once a week for their Sunday constitutional, but a great many have not visited the works. To do so will mean to see the half-hour's exertion necessary to get there.

Very concrete evidence of the gigantic works planned are visible on every hand and yawning cavities in the hillside testify to the enormous quantities of soil and rock that have already been removed.

While the work is yet without much form the visitor can still get some idea of the magnitude of the project, which the present activities of the contractors and engineers are concentrated.

Effective Assaults on the Hill

The hill between the poorhouse and the works of the Provincial Chemical Fertilizer Company forms the base of operations. This faces Courtenay Bay and it shows the most striking evidence of the work so far. As a result of the few weeks of operations the face of it has been blasted away and down the slope towards the sea lies in shattered fragments the once solid rock.

Already a large portion of this debris has been carted away by team work to that part of the shore adjoining where the breakwater starts. A long pile of broken rock, ample evidence of the labor output, stretches from the harbor out to the rocks a couple of hundred yards of more distant from high tide. This broken rock is being utilized by the contractors as ballast for the 4700 foot breakwater which will run far into the bay. The work of removing the hill has been done by team work but this is expensive and slow and it is anticipated that within a fortnight or so a railway line will have been run in round the face of the hill and the broken rock will then be transferred direct by the dump cars to a trestlework railway which runs out along the side of the breakwater, and from which the cars will dump the material which is to be used as ballast.

The Dry Dock

It is the intention to use a certain portion of the hill as a wall for the dry dock and consequently excavating operations are at present confined to the sea front and to that part of the hill lying inland. An immense steam shovel of the most modern type, weighing in the neighborhood of eighty tons is delving away at the heart of the hill inland, which is largely composed of brick clay. This shovel at each mouthful lifts about eight tons and bites and draws and lifts with one of the most human precision. The earth or clay is dumped immediately into one of the waiting cars which are run along another spur line to form a bank on which is laid the line to be used in conveying the rock from the hillside to the breakwater.

By the present method of carting the rock about 600 tons a day are handled, but with the railway line in operation the work will be greatly facilitated.

Much inconvenience is experienced because of the state of the ground, which is saturated with water and is a soft and workable condition, making it a matter of difficulty to lay stiff foundations for the structure of the different apparatus. It was because of this condition that the locomotive was used a few days ago. The rails were laid on the ground and an apparatus is being rigged up and in a day or two it will be hoisted from its ignominious position.

About 175 men are being employed just now. They are of all nationalities and are well set up body of men. No difficulty is experienced in getting labor. Though the number employed appears to be small, it is more than enough to handle the work. A few years ago would have been done by painful and costly manual labor is now performed with economy in all directions by the powerful machinery.

The operations are, of course, not in full blast as a considerable amount of the plant has yet to be assembled.

The first track election held recorded on the coming of the men has been made at Cartial, Pa. William Smith and Harry Gibb, local policemen, have taken the Wilson and Gibb sides respectively. The loss will play a hardy-gurdy in every town between Cartial and Washington, D. C., and the men in the "Medicines" and White House, the trip to last fifteen days.

"Breakfast Ready?"

Kiddies don't have to be coaxed to "eat up all your cereal, now!" when they face a big plateful of these delicious, crisp, flaked hearts of sugar corn; nor do grown-ups. Every morsel delights and nourishes. Give your folks plenty of

Kellogg's TOASTED CORN FLAKES 10c. Per Pkg.

A GENUINE RUPTURE CURE SENT ON TRIAL TO PROVE IT

Don't Wear a Truss Any Longer After Thirty Years' Experience I Have Produced an Appliance for Men Women and Children That Actually Cures Rupture

If you have tried most everything else, come to me. Where others fail is where I have my greatest success. Send attached coupon today and I will send you free my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have tried it and were cured. It is instant relief while all others fail. Remember, I use no knives, no harness, no ties. I send on trial to prove what I say is true. You are the judge and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you will also read. Fill out free coupon below and mail today. It's well worth your time whether you try my Appliance or not.

Pennsylvania Man Thankful

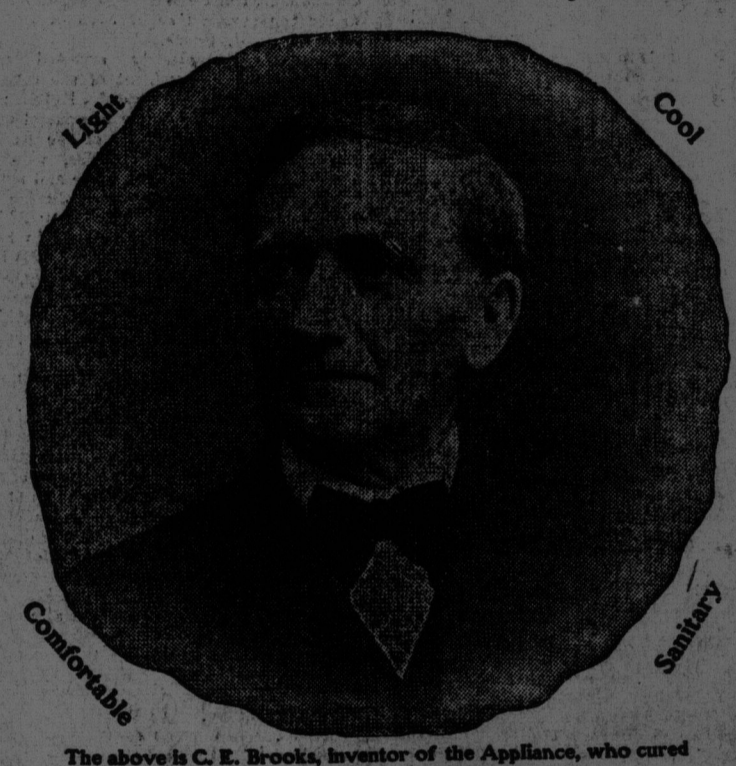

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:— Perhaps it will interest you to know that I have been ruptured six years and have always had trouble with it till I got your Appliance. It is very easy to wear, fits neat and snug, and is not in the way at any time, day or night. In fact, at times I did not know I had it on. It is adapted itself to the shape of the body and seemed to be a part of the body, as it is to the spot, no matter what position I was in.

It would be a veritable God-send to the unfortunate who suffer from rupture and all could procure this Brooks Rupture Appliance and wear it. They would certainly never regret it.

My rupture is now all healed up and nothing ever did it but your Appliance. Whenever the opportunity presents itself I will say a good word for your Appliance, and also the honorable way in which you deal with ruptured people. It is a pleasure to recommend a good thing among your friends or strangers. I am, Yours very sincerely, JAMES A. BRITTON, 80 Spring St., Bethlehem, Pa.

Recommend from Texas Farmer

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:— I feel it my duty to let you, and also all the people, know what your Appliance has done for me. I have been ruptured for many years and have worn many different trusses, but never got any relief until I got your Appliance. I put it on last November, but had very little faith in it, but must say I am now cured. I have laid it away—had it off for two weeks and doing

The above is C. E. Brooks, inventor of the Appliance, who cured himself and who has been curing others for over 30 years. If ruptured, write him today

all kinds of farm work with ease. While I was wearing it, I had it gripped and coughed a great deal but it held all right. Words cannot express my gratitude to you for your Appliance. It is a great blessing to all ruptured people.

Yours sincerely, Bald Prairie, Texas. J. E. LONG.

Others Failed But the Appliance Cured

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:— Your Appliance did all you claim for my little boy and saved for it cured him sound and well. We let him wear it for about a year in all, although it cured him 8 months after he had begun to wear it. We had tried several other remedies and got no relief, and I shall certainly recommend it to friends, for we surely owe it to you. Yours respectfully, WM. PATTERSON, No. 717 S. Main St., Akron, O.

TEN REASONS WHY You Should Send for Brooks' Rupture Appliance

1. It is absolutely the only Appliance of the kind on the market today, and it is embodied the principles that venturers have sought after for years.
2. The Appliance (for retaining the rupture cannot be thrown out of position).
3. Being an air cushion of soft rubber clings closely to the body, yet never bruises or causes irritation.
4. Unlike the ordinary so-called pads used in other trusses, it is not cumbersome or ungainly.
5. It is small, soft and pliable, and positively cannot be detected through the clothing.
6. The soft, pliable bands hold the Appliance do not give one the unpleasant sensation of wearing a harness.
7. There is nothing about it to get foul, and when it becomes soiled it is easily washed without injuring it in the least.
8. There are no metal springs with Appliance to torture one by continually bruising the flesh.
9. All the material of which the Appliance is made is of the very best and money can buy, making it a durable and safe Appliance to wear.
10. My reputation for honesty and my dealing is so thoroughly established by experience of over thirty years of dealing with the public, and my prices are so reasonable, my terms so fair, that there is no possibility of my hesitating in sending free coupon today.

Cured at the Age of 76

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:— I began using your Appliance for the cure of rupture (I had a pretty bad case) I think in May, 1905. On November 20, 1905, I quit using it. Since that time I have not needed or used it. I am well and am now 76 years of age. I was cured by the Brooks Discovery, which, considering my age, 76 years, I regard as remarkable.

Very sincerely yours, High Point, N. C. SAM A. HOOVER.

Child Cured in Four Months

Mr. C. E. Brooks, Marshall, Mich. Dear Sir:— The baby's rupture is also cured, thanks to your Appliance, and we are so thankful to you. If we could only have known of it sooner our little boy would not have had to suffer near as much as he did. He wore your brace a little over four months and has not worn it now for six weeks.

Yours very truly, ANDREW EISENBERGER.

RETURN-VISIT BY BRITISH MINISTERS

London Times Suggests That Premier Asquith and Colleagues Should Visit Canada

London, July 26—An interesting suggestion by the Times in its editorial today.

"It would be unbecoming," it says, "for Mr. Asquith to announce his policy on so large and momentous a matter as the contribution to the navy anywhere but in the Canadian Parliament. There are few things we can suppose which would more surely deepen the effect of his statement, and it is more to his credit to visit more closely the ties which his visit here, and his conference with ministers here, would be to strengthen, than to return to the dominion for two or three statements with whom he has taken counsel in Whitehall to accompany him."

"The prime minister and the first lord have been to see with their own eyes the work of the navy in the Mediterranean, and we doubt not they have learned much by their visit. Could not Mr. Asquith and the Churchill devote part of the coming recess to visit Canada? We are confident that such a step would be taken by all who are marking a new era in the annals of the empire."

The Standard's Paris correspondent, noting the arrival of Mr. Pelletier there, announces that Premier Poincaré will preside at a luncheon given in honor of the Canadians by the Franco-American committee on Tuesday. The correspondent also sends the views published in L'Action.

"England," it says, "cannot do otherwise than foster the Franco-Canadian sympathies, which is an excellent speculation for her. The more love Canada bears towards France the more ironclad England can ask, if she says that British ships will help to defend France, whilst some day the united forces will join in battle against a common foe."

"When that day comes, and British Dreadnoughts, presented by Canada, thunder in the North Sea, it will not only be for the honor and interest of old England but for the glory and safety of our own country. In building battleships for the United Kingdom, Canadians will prove faithful sons of their fatherland, England and of their first mother, France."

The Pall Mall Gazette tonight says: "There probably exists in the mind of many people the idea that to welcome the desire of the dominions to join in the work of naval defence, relieves us from the need to make supreme efforts, which the political situation of the world, and the need of the highest importance, a most delicate way. We warmly appreciate the repeated manifestations of solidarity which naval armaments the past few years have called forth but it is not for us to discuss what the dominions will or will not do, or take their intentions into account in estimating our duty. There is too much to be said and to be done to help to them or agreeable to Canadian people."

ANOTHER INDUSTRY PROBABLY

Leonard Palmer Tells of Plans of British Capitalists For This City—Sheep Men Here

W. Leonard Palmer, who is still in the city and expects to be in the vicinity for some months, will in all likelihood be located at Hampton during his stay. To a Telegraph representative at the Royal Hotel last evening Mr. Palmer said he expected to find a suitable place for his sheep and would settle there for a while.

On Monday, he will start out on his tour of the province, taking in not only the city and towns but also the country districts, in order to get a good lay of the land.

Asked regarding the probable result of the visit the British capitalists, Mr. Palmer said that one of the objects of the trip was to establish here an industry as large as any other already in the city, while another of the party had a vision in view as a possible industrial location. Mr. Palmer would not disclose the nature of the business, as he said matter had not yet been definitely decided upon.

The sheep industry was probably of chief interest to the people on the other side, he said, but they were primarily interested in securing settlers from the old country to develop the valuable lands in the province. "Nobody would go West to settle," said he, "knowing that he could secure better land, at a much cheaper price in this province."

Colonel R. M. McEwen, representing the Dominion Sheep Breeders in the Maritime Provinces; C. M. Macrae, of the Dominion live stock branch, and Colonel H. Montgomerie Campbell, representing the province of New Brunswick, arrived in the city yesterday on a tour of the province, in the interest of the sheep industry.

Colonel McEwen and Mr. Macrae are touring the maritime provinces, and their mission is to investigate carefully the conditions of sheep breeding, exporting and other phases of this important industry, with the hope and expectation of stimulating the farmers and others particularly interested, in this business to pay more attention to this work, and obtain better results by carrying it on more scientifically and in a more business like manner.

Colonel McEwen and Mr. Macrae have already toured Nova Scotia in company with H. W. Corning, M. L. A. of Yarmouth, representative for Nova Scotia, and in touring the island, after completing their tour of this province they will be accompanied by Roy Curtis as a representative of that province.

Already the visiting representatives have visited the various farms, and covered the territory comprised in the southern portion of this province.

In conversation with a Telegraph reporter at the Royal Hotel last evening, Mr. Macrae said that the minister of agriculture had made a grant of \$15,000 to be expended in the development of the sheep raising industry, in British Columbia, and the maritime provinces. Conditions in the western province were now being looked into by Colonel D. M. Macrae and Dr. F. S. Tolmie, the latter representing the live stock branch.

CHEW KING GEORGE'S NAVY PLUG For Sale Everywhere

THE ROCK CITY TOBACCO CO. LTD. QUEBEC

After inspecting and studying conditions there, said Mr. Macrae, they will return to Ottawa, and in the fall after Sept. 1, return to the province. He said, and a trip future was in store for New Brunswick this connection.

The sheep industry, Mr. Macrae added, has been on the decline for some years, and it is expected that the present campaign will effect a big development.

R. H. Harding, of Thorndale, Ont., at present engaged in buying rock for distribution by the government, at T. H. Arkell has been appointed in charge of the sheep department for the dominion. Later he will have many assistants under his control.

90 YEARS OLD—SMART AND IN GOOD HEALTH

Mrs. Elizabeth Von Wormer, 90, that Duffy's Pure Malt Whisky is the medicine that has enabled her to live to such a great age and retain her health and youthful spirits.

"I have been a user of Duffy's Pure Malt Whisky for over 15 years and I can truthfully say that it is more than life to me. I am now an old lady of 90 years, yet smart and in good health, and it is all owing to Duffy's Pure Malt Whisky. I could not live without it. I am sending my photo and you can use it and my name, if you wish."—Mrs. Elizabeth Von Wormer, Grosvenor Corners, N. Y.
