

which several members took part, and Mr. Craig answered many questions put to him with regard to the varied difficulties and doubts that the members had experienced. At the afternoon session Mr. A. M. Smith, of St. Catharines, addressed the meeting on the subject of "The Culture of Small Fruits," and this as well was followed by an interesting and useful discussion.

Mr. Gilbert, of the Central Experimental Farm, gave an address on the question of raising poultry in connection with fruit growing, pointing out the advantage to be derived from the manure and the removal of the insect enemies.

Mr. Craig delivered a further address on the subject of "Producing Fruit of the Finest Quality," pointing out amongst other things the necessity of thinning apples and of careful grading.
