N. W. TERRITORIES name Qu'Appelle district and other towns west to Mooseday but I have An Interesting Letter from Senator W. Dell Perley The Country Where a Poor Man Can Make a Good Home for Himself. Some Figures Showing Its Marvel-

lous Growth of Wheat - Stock Raising Far Easier and More Profitable Than in New Brunswick,

To the Editor of the Sun: WOLSELEY, N. W. T., Feb. 1.-It has been quite a while since I wrote

anything for the Sun. Now that I have a spare moment, it might be interest ing to some to read a line or two about this part of our great dominion of

I have not been an extensive travel ler: but here in this part of Canada you meet immigrants from almost every part of the globe. By coming in contact with them, in business and otherwise, you are able to form, in my judgment, a fair opinion of the country from whence they came. That be ing so, then I am of the opinion that the Northwest Territories of Canada is the best, or at least one of the best portions of this earth, for a person to make a good and comfortable home in. This is the country where a poor man can soon make for himself a home of plenty and comfort, and the beauty of it is that it makes no difference from

By reasonable industry and persever ance he soon acquires a knowledge aid immigration from one province of that enables him to become efficient and make a success of the work he engages in. If it so happens that he sued as would tend to keep our own has no means, only his hands and a young people at home in Canada. family, he is nevertheless successful at once, from the fact that his own labor will command good pay, and foreigners and our own Canadian every member of his family, from the herd boy to a servant girl, can get ready employment at a proper wage; thus in a few years he becomes the owner of a free homestead of 160 acres of the very best of land, with team, stocks and implements sufficient to enable him to carry on farming on his own account, which evidently he was not able to do in the land of his birth. Hence I am of the opinion this section of our great Canada is one of the best if not the best place for a person to make for himself a hone of plenty and comfort.

It is quite true we suffered, or were not as successful at the start as we

of all kinds of grain, as well as other farm products, including vegetables, dairy, beef and pork, that ever was November, we take the halters off and marketed by any country. To give you an idea of what has been produced, and not one-tenth of the land tributary to the several stations named except Indian Head has yet been touched with the plough, you will be able to form an opinion of our future possibilities when the country is properly settled, and more of the land under cul- then to realize illiterate foreigners are tivation as can be. Starting at Greenfell station, about 278 miles west the ocean and getting 160 acres of the of Winnipeg, you find two large grain land for ten dollars. To our maritime elevators, with a capacity of fifty province boys I say come west. If thousand bushels, which have been filled and emptied, and re-filled again, the start you will get down to business ever since the threshing season commenced in September. Today they are and you will soon get to be hoss of full, and the grain in bags is piled in yourself and boss of the job. heans in sileways and byways like cordwood. Beside several farmers have granaries holding 1,000 bushels built on vacant lots, filled, awaiting sale. Eight miles farther west is Summerbury station, where the elevators are all full, and a like condition of things exist. Another eight miles brings you to the town of Wolseley, my own home. Here we have three elevators holding 75,000 bushels. All have been filled and re-filled, and are now full again. Last week one of the elevator men estimated there were in bags piled on the market plot 17,000 bushels of wheat, besides 60-granaries all full, with a holding capacity of at least 1,000 bushels each, "a Corloss," besides a fourth elevator being built with a capacity of 35,000 bushels by miles to marchy—that prob
(Frank S. Arnett in Ainslee's.)

"The complete splendor of such jewels as tone from the Burdens is revealed only on the rare occasions of fancy dress balls. These occur; once in a decade or so; indeed, there have been but two that will hold for all time a place in New York's so-cal history—that given in 1883, at her residence at Fitty-second street and Fifth avenue, by Mrs. William K. Vanderbilt, now Mrs. O. H. Bellmont, and the one given by Mrs. Bradley-Martin fourteen years later at the waldorf. The latter gorgeous and spectator function was so denounced from the pulpit for its display of riches and extravagene—saveral clerical gentlemen even terming it an incentive to anarchy—that probthings exist. Another eight miles

towns west to Moosejaw, but I have named sufficient to give you an idea of the productiveness of this district, which is only on a par with other parts. I have no desire to boom any one section over another, because there is but little difference. One section may be more adapted to mixed farming, while another is more a grain growing section. Every bushel of this wheat means fifty cents cash to the farmer who has it to sell. My opinion of this country has not changed since the first day I put my foot in Wolseley. There is only this difference, the conclusions I arrived at then are verified now. While in the past I have been a bit diffident in advising my fellow New Brunswickers to come here, I Mrs. David Hennen Morris...
have no besitancy in now saying to Mrs. Edwin Gould....
them to come here rather than go to Mrs. Cornelius Vanderbilt, ir
the United States, as I see they are Mrs. John D. Rockefeller, jr. the United States, as I see they are still doing notwithstanding the statements made by the grits when in op-

I know New Brunswickers very well, and I am confident they would make a success in this country. No man is a better all around man than a New Brunswicker, and such a man will make the best settler here. I say to New Brunswickers it is a pity to see foreigners coming in here and getting the best parts of this great country, even the Americans from the western states, the "corn land," are coming here by the thousands and getting the goodly land whilst our maritime province people of both sexes are going to the United States to be only laborers. This is a great country. No part of this globe can excel it. I am not opposed to immigration, but I am free to confess that I am not so anxious as some to see this country given away to foreigners and our own people from the east going to the United States.

Although it is not the policy of our

federal government of either party to

Canada to another, nevertheless I would like to see such a policy pur-Soon we will realize this country has been given away and taken up by boys will have to find a home under a foreign flag. This should not be so. Before closing this letter I must tell you something about the stock of this section of the west. As great as our capabilities are for growing wheat, stock raising can be carried on with even a greater and more certain success. We never have to feed turnips here, even to fatten an old cow. All animals get fat on grass alone and fatter than ever I was able to make them or my neighbors after feeding turnips and grain for three or four months in New Brunswick. Our naday from in October until the last Here in the Territories we have pro- days of March. They came in fat and duced this last season the greatest crop stand the summer's work the best of any. After we get through with the work of the season, in October or 1st let them go until we want them next spring to start the seeder. Snow and cold is no obstacle. The grass has

cured into good hay on the Otack, and that is the best of feed. May I not properly add, where can you find such a country as this? and coming from thousands of miles across you can raise some money to help in the sooner; but in any case come west,

W. D. PERLEY.

JEWELS. Five Hundred Millions of Diamonds in the United States.

(Frank S. Arnett in Ainslee's.) least 1,000 bushels each, "a Corloss," besides a fourth elevator being built with a capacity of 35,000 bushels by the farmers. The three sections just named comprise what we term a mixed farming district. The farmers do not depend on wheat only. The next 13 miles is more a wheat growing district. The first station in this district is Sintillida, eight miles west of Wolseley. There they have five huge elevators holding 140,000 bushels of wheat, all of which have been filled and refilled and at least 80 granaries holding as many thousands of bushels all full. It is a great sight to see so much grain stored and stacked away, as is the casp in this town. Ten miles farther west is the Wheat City of the farm district." Here they have nine large elevators, in and out of which there has been going a continual stream of wheat since the first of last October. They are all filled today.

This will give a slight idea of the producing capacity of this district, especially when there is yet so much more to market. It is estimated that at this one point, Indian Head, over (1,400,000) one million four hundred thousand bushels of wheat will be marketed this season. That being the case you will not wonder at there being two chartered banks established here, viz., Union Bank of Canada and the Hamilton Bank, and in this connection I might add there is a bank at both Wolseley and Grenfell, the farmer is the solution of the solution of the connection I might add there is many former in the solution of the solution of the choose. Let me tabulate the value of the jewelry some bonk at both Wolseley and Grenfell, the connection I might add there is son hank at both Wolseley and Grenfell, the connection I might add there is son hank at both Wolseley and Grenfell, the connection of the connection of the solution of the

"Here are the names of only thirty-four women, chosen almost at random, whose precious stones and jewelry are valued at \$22,250,000. It can easily be shown that the figures are not unreasonable. The average annual importation of precious stones into the United States has for a long time been about \$15,000,000. Thus during only the past ten years we have received \$150,000,000 in gems. Leopold Stern, the diamond importer, informed me that of this amount one-half is held by dealers throughout the country, and that of the remainder fully two-thirds have been sold to families and individuals in New York. This means that in the past ten years New Yorkers have bought \$50,000,000 worth of precious stones, this sum not including the cost of their setting. George F. Kunz, the gem expert of the Tiffany Company, says that in the entire country the diamonds alone are valued at \$500,000,000, and that of this amount \$170,000,000 worth are owned in New York. \$22,250,000

"OIL OF GLADNESS"

South American Nervine has proved itself the "oil of gladness" to many a nerve-sick sufferer. It starts to work at the fountain-head of the trouble—the digestion. It tones the stomach, helps to assimilate the food, promotes healthy circulation, stimulates the flow of pich, red blood, accelerates the action of the

The natives of New Brunswick who have figured in past congresses, have been effaced entirely. ncluding the Hon. Jeremiah Simpson of Medicine Lodge, Kansas. All seven are republicans. The city of Hamilton is the birthplace of two senators. Congressman Wm. Connell of Scranton, Pa., was born in Cape Breton, and for many years worked in the coal mines. He began life as driver boy, humble berth worked himself into the United States congress. The list of Canadians born in the present senate and house follows: Senator James McMillan, republican of Michigan, born in Hamilton, Ont.: Senator Jacob H. Gallinger, republican of Nebraska, born in Hamilton: Senator

The annual reunion and ball of the and vicinity was held in Paul Revere large and there was a general renewal of affairs, with D. A. McDonald, vice formed several years ago, largely

through Mr. Doyle's efforts. The agricultural bureau of the state has compiled statistics showing that the farmers of Massachusetts are turning from general farming, and from cereal production in particular, to dairying, poultry raising, market gardening and fruit growing. This movement is due largely to competition in the west, the development of transportation facilities and unsuitable land. Since 1880 in this state, as in other North Atlantic states, there has been a very marked decrease in the acreage of improved farm land. The average gross income per acre last year was computed as follows: Farms under three acres (mostly near large cities), \$508.48; farms, three to nine acres, \$80.83; 10 to 19 acres, \$38.72; 20 to 49 acres, \$20.40; 50 to 99 acres, \$12.71; 100 to 174 acres, \$9.27; 175 to 259 acres, \$7.03; 260 to 499 acres, \$5.76; 500 to 999 acres, \$4.26; 1,000 acres and over, \$2.25. The farms of the state number 37,715 and have an estimated value of \$158,-019,290. The chief product is that of the dairy, valued last year at \$12,885 .-744. The next is hay, worth \$9,056,854. Vegetables, exclusive of potatoes and onions, yielded \$3,412,955; eggs, \$2,571,-341; fruit, orchard, \$1170,868; small fruits, \$1,403,714; potatoes, \$1,800,937; flowers and plants, \$1,639,760.

Among recent deaths of former provincialists were the following: In Biddeford, Me., Jan. 30, Mrs. Bridge Dougher, formerly of St. John; in Cliftondale, Feb. 2, Mrs. Lillian E. Norris (nee Messinger) wife of Alvah M. Norris, aged 35 years, formerly of Bridgetown, N. S.; in East Boston, Feb. 2, Inex Whitton, young daughte of William I. and Minnie L. Whitton latter formerly of Halifax; in Dorchester, Jan. 29, Margaret S. Talbot widow of Mark Talbot, aged 8 years, formerly of Pictou, N. S.; in this city, Mrs. Lydia Dunn (nee Hennigan) wife of Robert Dunn, Nova Scotian; East Boston, Feb. 3, Franklin J. Coffin, aged 36 years, native of P. E. I.; in this city, Mrs. Fannie Russell, widow of Andrew Russell of Halffax; in Wal- Marshall, Mich.

tham, Jan. 30, Miss Effic Crowe, aged 24 years, former Nova Scotian (drowned while skating); in Lowell, Feb. 1, George Burgess, aged 27 years, Nova Scotian (killed in Lowell machine shop while painting shafting; in Dorchester, Feb. 5, John G. Allbright, aged 85, native of Westport, N. S.

Rousing Meetings Addressed by the Opposition Candidate.

A public meeting in the interests of Fred M. Sproul was held at the Public Hall, Titusville, on Wednesday even Notwithstanding bad roads and ing. vorse weather, a large number attend

Alex. S. Campbell, who was chosen

chairman, in a few carefully selected words introduced the candidate. Mr. Sproul was received with heart applause, and for an hour and three quarters continued to delight his hear ers. As point after point was scored against the government and its candidate, the audience showed its hearty approval by most liberal applause. Many prominent men who have be fore been sturdy supporters of the local administration, openly expressed their

determination to give Mr. Sproul a helping hand in the present contest. This part of the county will give "the ecople's Fred" a rousing majority. A meeting in the interests of Mr. Sproul was held at Barnesville on Thursday evening. Dr. Allen, who was elected chairman, in a graceful and dignified manner presided over the meeting. The candidate in a lengthy and exhaustive speech, presented his claims upon the people for support His style was trenchant and incisiv as he scored point after point against his political opponent, whose wol were most unmercifully depicted. The financial record of the present government was thoroughly gone into and the recklessness of expenditure expos ed. Special reference was made to the expenditure of the \$275,000 received and the fact of its being swallowed up

in the year. The reception accorded Mr. Sprot was all that his most enthusiasti friends could desire, and at the conclu sion of an able address the entire audience rose and gave him three hearty

cheers. It is the intention of Mr. Sproul to hold meetings every night till election day.

Bicyclists and all athletes depend on BENTLEY'S Liniment to keep their joints limber and muscles in trim.

LETTERS FROM THE PEOPLE

[To Correspondents—Write on one side of the paper only. Send your name, not neces-sarily for publication, with your communi-cation. The Sun does not undertake to re-turn rejected manuscripts. All unsigned communications are promptly consigned to the waste basket.]

To the Editor of the Sun:

Sir-Your editorial this morning in reference to the senatorship and Col-onel Domville was timely and pertinent. There can be no misunderstanding the attitude of the liberals of Kings on this question. They have with 14 smallpox patients on board strongly represented their wishes to Woonsocket, R. I., has some 70 cases, the minister of railways and been treated with contempt; in fact, some many more. A nest of smallpox was of the replies sent by the minister to recommendations in Colonel Domville's favor were of an insulting character. Apart from the fact that Kings has never had senate representation, while member and sometimes two in the upper house, there should have been no question about Colonel Domville's right to the position. But for him there would be no liberal party worthy of the name in Kings today. He has upheld the liberal banner in adversity and prosperity for the past fifteen years, and his non-appointment to the vacancy in the senate is a piece of political turpitude and ingratitude of the profitable business, due largely to low basest possible deception. Mr. Thompson, who has been appointed, has no claim. nearly equal to Colonel Domville. He is a family connection and a mere hanger on of the minister of railways, who has, from from making any ation is very firm, particularly as a sacrifice, made money out of politics. scarcity of spruce is reported in some He has never taken part in the discussion of public questions in the house of assembly, and is incapable of any independent action in the senate. In view of the way in which Kings county and merchantable boards, \$15 to 16. Laths its liberal champion have been treated, are quiet at \$2.90 for 15-8 in. and \$2.50 is it any wonder that liberals every-They are selling for forward delivery and in opposition to the "lightning change artist" from Sussex and the corrupt opportunist combination at Fredericton.

A KINGS COUNTY LIBERAL Sussex, N. B.

When horses have Fever, the hair and hoofs are dry and the legs frequently swell. Give GRANGER'S CONDITION POWDERS, a genuine Condition Powder. If fed occasionally during the winter and spring will keep your horses and cattle in health. See that you get the Granger.

A LITTLE WONDER.

(Machias Republican.) It is not a very common occurrence for a child to come into the world with a tooth cut, yet Mr. and Mrs. W. A. Petersen of Calais have the proud distinction of being the parents of such a child. Their son, when born on January 21st, had a full sized lower front

"GEN. MITE" IS DEAD.

LONDON, Feb. 4.- "General Mite," the midget, who first appeared in Eng-"Policy" to carry. They prevent and cure, land with "Tom Thumb," is dead at Cardiff. "Mite." whose real name was Flynn, was an American. He was born in 1864 in Chenango county, New York, and at the time of his birth weighed two and a half pounds. When a year and a half old he stopped growing. His first public appearance was in New York in 1877 with Minnie Oborn, a Swedish dwarf. He was then 22 inches high and weighed nine pounds. "Mite" was perfectly formed physically and possessed of much in-

FIRE AT ST. MARTINS. At noon on Friday fire was disovered in the large two story house owned by J. M. Fowler of Sidney, C. B., and occupied by John C. Boyer. The fire originated from a defective flue in the upper flat of the large ell and rapidly spread. Willing hands carried the ousehold effects to places of safety; and the cattle and carriages and other implements for farming were taken from the stables. All the time strenuous efforts were being made to save the house, which was at last accomplished by tearing away the adjoining ell. Very much damage was done in the hurried moving of Mr. Boyer's furniture, and his loss will be quite heavy.

RECORD BREAKING WEATHER.

LONDON, Feb. 8 .- Snow storms and fogs envelope practically the entire United Kingdom. The weather is the most severe known in 20 years. For a time this morning London was plunged in darkness, traffic was interrupted and navigation on the Thames and Mersey was very dangerous. The unpre-cedented snow fall necessitated the suspension of out-door work in, many districts, and vehicular and train traffic was carried on with the greatest difficulty. In parts of Scotland and Wales communications were entirely blocked.

WHAT HE WANTED.

He-My people are bothering me to She-You'd be very lucky if you did. She is very clever and beautifulexpenditure of the \$275,000 received He—Oh, I don't want to marry from an unusual source the past year, brains and beauty. I want to marry and the foot of the beauty gradient control of the past year, brains and beauty. VOU.
