FREDERICTON, Jan. 26.—During the prevalence of smallpox at Fenwick, York Co., last summer Dr. Henry McWally of this city broke the quarantine established by the local board of health. A complaint was laid before the police magistrate by Dr. Fisher, secretary of the provincial board of health. A long trial ensued, McNally contending the case was not smallpox but chickenpox, and therefore the board had no right to establish quarantine. Doctors from all parts of the province were called to testify, and the case aroused much interest. The police magistrate gave judgment today, finding the defendant guilty.

Laurier Gave Away Our Set on Alaska Boundary Matter.

An Irish Paper Puts Vancouver Within Six Days of London—Archbishop Machray Cured By X Ray Treatment.

LONDON, Jan. 26.—General satisfaction is expressed over the news on the Alaska treaty and Canada's action in consenting to arbitration on the United States lines. It is recognized that the concession is in the interest of Anglo-American accord. The Times correspondent at Washington attributes the present agreement to Sir Wilfrid Laurier's personal persistence, he fearing a rush of miners into the disputed territory and consequent disturbances. It is hoped Canada will appoint her strongest possible member on the commission and not merely an ornamental member as in recent years, Lord Alverstone, who, as Richard Webster, kept so tight a grip on Canada's case in the Behring Sea arbitration, will probably be one of the commissioners. The name of Sir Louis Davies is also suggested.

Archbishop Machray proposes to return to Canada in May, accompanied by his nephew, probably Robert Machray, the writer. The growth at the base of his spine has completely withered up under the X-ray treatment. Sir Thomas Barlow describes it as one of the most remarkable recoveries known.

These in the best informed circles here describe as at least premature the announcement in the Irish Times that the Canadian government has decided to a heavily made and piecemeal service, which will make Vancouver eight days from London. The Irish Times' information is probably from Ambrose, M. P. for West Mayo, who is urging the claims of Blackfoot Bay as the port of call.

RUSSIAN COLLEGE FOR WOMEN FARMERS.

News comes from St. Petersburg that the minister of agriculture has decided to establish an agricultural college, to whom there but women should be admitted as students. "Those who know the minister's views in regard to the proposed college say that there will be no institution like it in the world."

His object, it is said, is not to teach women practical farming, but to enable them to acquire a thorough knowledge of agriculture, so that those among them who desire may eventually become either teachers in the numerous agricultural schools in Russia or owners of imperial or private estates.

Only those who have graduated from the ordinary schools will be admitted as students, and at the end of the college course a rigorous examination will be held and diplomas will be awarded to those who deserve them.

Any student who desires to take up a special study at the college, such as poultry keeping or dairy farming, may do so.
