Electric Light, Eyestrain, and the Growing Child

Specialists tell us that most modern ailments are the direct result of eyestrain.

It is a crime to allow a child to read and play under unmitigated electric light.

By the use of MOONSTONE globes and dishes the harsh light is diffused and softened.

It is cheaper, too, than the old way, for less candlepower will produce more illumination, so great is the deflecting and diffusing effect of this chemically perfect glass.

No. 9070. Grecian Lantern.

MOONSTONE BULLETIN No. 1

will prove interesting and instructive reading. Give us your room dimensions and our engineering department will tell you, without cost to you, how to light your whole house with a clear and mellow effulgence that will save eye and nerve strain, and work out a material economy at the same time.

A Glass for Every ill!

THE PITEOUS WEAKNESS
of the fever-convalescent urges quick relief.

Wilson's Invalids' Port

à la Quina du Pérou

will do more to renew sapped vitality and to steady and re-inforce fever weakened nerves than all the drugs and "cure-alls" offered.

Because—the wine used is rich in grape-sugar or pre-digested carbohydrates, the energy maker of the body.

Because—it has a large proportion of albumenoids, which repair tissue waste and create new tissue.

Because—it actually renews the red corpuscles of the blood, increases the "red cell" count.

Because—the pure extract of Cinchona Bark promotes digestion and assimilation, and exercises a directly tonic and restorative effect upon the vital organs.

Dr. J. F. Palling, the Celebrated Physician, says: "I have great pleasure in stating that I have been using Wilson's Invalids' Port for some time, and find it very beneficial as a tonic for Invalids when recovering from any weakening diseases. It rapidly increases the strength and appetite." 223C
