Toronto 2

January 25th, 1934.

The Rt. Hon. Arthur Meighen,
National Building,
347 Bay Street,
Toronto, Ontario.

Dear Mr. Meighen:-

Referring to the documents which you recently handed me regarding the construction of the Quebec section of the Temiskaming Dam; we are very pleased to receive the copies of this memorandum, as it gives us additional information which will be of value to the Commission in connection with this project. After looking over this I have no comment to make in regard to any interest which the Commission might have in the works, as the same seems to be, with the information available, satisfactory for the work in hand.

The material received dealing only with the physical conditions and the reconstruction of the present Temiskaming Dam, the general policy of and the relation of the Commission in regard to the construction of such works and the operation of the same, are not up for consideration in such memorandum. This is a matter which will require the full attention of the Commission should the Government desire to assess or in any way ask the participation of the Commission financially in connection with such works.

Yours very truly,

CHIEF ENGINEER.
