

- Electricity and chemical affinity, 126.
 Electricity, theory of, 157.
 Electro-chemical theories, 129.
 Electro-chemistry, 118.
 Electrolysis, 127.
 Elements and compounds, 71.
 Elements, search for the, 70.
 Elimination of races, 475.
 Elimination, theory of natural, 437.
 Elkin, 193.
 Embryology, experimental, 380; generalisations of, 378; physiological, 373; progress of, 365.
 Encke, 186.
 Endoderm or hypoblast, 378.
 Energy, maintenance of solar, 207.
 Energy, transformations of, 116, 133; conservation of, 133; dissipation of, 133, 139.
 Engelmann, 117.
 Epigenesis, defined, 366.
 Epigenesis *versus* Evolution, 368.
 Ether, 163, 169, 174, 176; theories of the, 177.
 Ethnology, 474.
 Evolution, evidences of, 377; factors in, 430; inorganic, 112.
 Evolution-idea, history of, 425; in astronomy, 220.
 Evolution in the old embryological sense, 368.
 Evolution of Sex, 391.
 Evolution of the subject-matter of the sciences, 49.
 Evolution, theory of, 424.
 Evolution theory, present aspect of, 428.
 Evolutionary geology, 225, 234.
 Ewart, Cossar, on breeding, 440;
 Penycuik Experiments, 394, 401, 410.
 Experiment and observation, 22.
 Experimental geology, 233.
 Explanation and interpretation, 322.
 Extinct Types, 346.
 Extinction of races, the problem of the, 347.
- F.
- Fairbanks, on the social organism, 504.
 Fairies, 439.
 Faib, on earthquakes, 255.
 Family, sociological import of the, 514.
 Faraday, 13, 94, 95, 96, 101, 144, 156; discovery of induced currents, 160; discovery of magneto-electricity (1831), 160; dynamical theory of electricity, 161; electrolysis, 129, 161; electrolytes, 118, 119.
 Fatigue of nerve-cells, 306.
 Faye, meteoritic hypothesis, 223.
 Fechner, 300, 455.
 Féré, 361.
 Ferrier, 304; on cerebral localisation, 310.
 Fertilisation, 371.
 Fick, 308.
 Fischer, 81.
 Fiske, on origin of human sociality, 516.
 Fison, quoted, 193, 196, 197, 198, 200, 218.
 Fitzgerald, quoted, 131; electro-magnetic waves, 162.
 Fizeau, 218.
 Fizeau, velocity of light, 155.
 Fizeau, 308.
 Flechsig, 310; on cerebral localisation, 446.
 Flemming, 360.
 Fleurian de Bellevue, 371.
 Flinders-Petrie, quoted, 474.
 Flourens, 304, 445.
 Fluorine, 73.
 Fol, 359, 360, 371.
 Folk-lore, 439.
 Forchhammer, 262.
 Forel, 307.
 Fossils, 344; value of, 234, 248, 250.
 Foster, Sir Michael, 300; on protoplasm, 317; on nervous tissue, 302; on scientific spirit, 7.
 Foucault, 214; velocity of light, 154.
 Fouqué, 275.
 Fourier, 235.
 Frankland, 74, 104.
 Frapolli, 262.
 Fraunhofer, 217; spectroscopy, 212.
 Fraunhofer's lines, 213.
 Fresnel, experiments on light, 151.
 Friedel, 275.
 Fritsch, 304, 310.
 Frommann, 360.
 Fuchs, 274.
 Function, complexity of, 293.
 Functional compensation, 295.
 Function-change, 341.
 Functions of organs, 290.
- G.
- Gadow, quoted, 355.
 Galle, 185.
 Gallium, 112.
 Galton, 399, 402, 412, 417, 435; on filial regression, 408; genetic continuity, 399; law of ancestral inheritance, 411; transilient variations, 433; Natural Inheritance (1889), 401.
 Galvani, 157.
 Games, 491.
 Gaskell, on metabolism, 319.
