the helpe of suche a one is most requisite : And so ist of  
effecte for the dispersing of your owne commodities in ex-  
change into the inlandes.

Nothing is more to be indenuored with the Iland peo-  
ple then familiaritie. For so may you best discouer al the na-  
turall commodities of their countrey , and also all their  
wances, all their strengthes, all their weakenesse, and with  
whome they are in warre, and with whome confederate in  
peace and amitie, &c. whiche knownen, you may woork  
many great effectes of greatest consequence.

And in your planting the consideration of the climate and  
of the soyle bee matters that are to bee respected . For if  
it be so that you may let in the salt sea water, not mixed with  
the fresh into flattes , where the sunne is of the heate that it  
is at Rochell, in the Bay of portingall, or in Spaine , then  
may you procure a man of skill, and so you haue wonne  
one noble commodicie for the fishing , and for trade of mar-  
chandise by making of Salt.

Or if the soyle and clymate bee such as may yeelde you  
the Grapre as good as that at Burdeus, as that in Portu-  
gale, or as that about Siui in Spaine, or that in the Ilands  
of the Canaries, then there resteth but a woorkeman to put  
in execution to make wines, and to yessle Resslings of the  
sunne and other, &c.

Or if you finde a soyle of the temperature of the South  
part of Spaine or Barbarie, in whiche you finde the Oile  
tree to growe: Then you may be assured of a noble mar-  
chandise for this realme, considering that our great trade  
of cloathing doth require oyle , and weyng howe deere of-  
late it is become by the bent they haue of that commodicie in  
the West Indies, and if you finde the wilde oile there it may  
be grased.

Or if you can finde the herrie of Cochenille with whiche  
wee colour Stammelles , or any Rootz, Berrie, Fruite,  
wood or earth like for dying, you winne a notable thing for
