### IF IT IS A MOWER

on which you want to feel you can rely under all conditions, and at all times, then buy a FROST & WOOD No. 8. We know from experience that it cannot be surpassed by ANY other make of Mower. That will be your verdict too when you have tried one.

Cuts 4 1/2 ft., 5 ft. and 6 ft. wide.

The INTERNAL GEAR as used on the No. 8 has many advantages over the old EXTERNAL way. The cogs are kept constantly in mesh—no possible chance of jolting, or any necessity of a running start. The first forward motion of the horse MUST and DOES start the knives.

The PITMAN connections on the No. 8 are forged steel.

The connection is simple and common-sense.

The FOOT-LIFT on the No. 8 raises the WHOLE bar clear of the ground, and is conveniently situated—no stretching to get at it.

Our Catalogue "F" explains our full line. Send for it.
