

Is There Any Money in Cheese?

Many a grocer has asked himself this question, well nigh in despair, as he watched his crumbly, chopped-up cheese. Then when he bought a

Dayton Cheese Cutter

the only regret he had was that he hadn't bought one long ago. Think of having a machine that cuts and prices your cheese automatically and with absolute accuracy. Doing for your cheese trade, in fact, just exactly what the famous Dayton Scale does for your weighing trade.

"Made in
Canada"

"It Cuts a Shearing Slice"

The blade begins cutting on its inside point and cuts a shearing slice from the centre, outwards and downwards. Ensures against pushing and crumbling of the cheese. The cut side is guarded against exposure and evaporation. Computing chart is changeable and the Dayton cuts either to weight or to value. Gives you "3/4 of a pound," or "15 cents' worth," either way, any amount, with perfect satisfaction and economy.

Don't give away any more cheese by slap dash methods of cutting, weighing and pricing. Get our Catalogue and see the money you can save on a Dayton Cheese Cutter.
