WINCHESTER

Repeating Shotguns

USED IN THE U. S. ARMY.

The U. S. Army authorities know a gun; that is why, when they decided to equip some troops with repeating shotguns, they selected the Winchester in preference to all other makes. The experts of the U. S. Ordnance Board also know a gun; that's why, after submitting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it *safe, sure, strong and simple*. If you want a shotgun—buy the one whose strength and reliability led the U. S. Army authorities to select it and the U. S. Ordnance Board to enforce it—that's the Winchester.

Henry George's Works

The questions of land monopoly, land value taxation and the "single tax" are arousing great interest in Western Canada. A number of the readers of The Guide have asked where they can secure the works of Henry George, the great economist and humanitarian who fought so valiantly in the interests of the common people. "PROGRESS AND POVERTY" is recognized as being George's greatest book, and also as one of the greatest books published by any author during the past century.

"THE LAND QUESTION" contains "Property in land: a Passage of Arms Between the Duke of Argyle and Henry George," as well as an open letter to Pope Leo XIII. on the "Condition of Labor." We have twelve paper bound copies of both "Progress and Poverty" and "The Land Question," which will be sent postpaid upon receipt of 35 cents.

Direct Legislation

If you are interested in improving the system of government in Canada you should study Professor Frank Parsons' book entitled "The City for the People." He devotes a great deal of attention to Direct Legislation, and this is considered the best book published on the subject. He also deals in the same book with Public Ownership, Home Rule for Cities, and the Merit System for Civil Service, and the best means of Overcoming Corruption. Professor Parsons in his book shows how reforms have been accomplished in Switzerland and in some of the American cities by means of the Initiative, the Referendum and the Recall. Paper covers, 50 cents, postpaid.

Dry Farming: Its Principles and Practice

By William McDonald, M.S., Agr., Sc.D., Ph. D.

The author of this book, in addition to his experience in the Transvaal, has visited all the important experiment stations in the United States where dry land investigations are being conducted. On this account the book is replete with the very latest information that is drawn from Utah and Montana, where dry farming has been conducted very successfully. Professor W. J. Elliott, who is in charge of the C. P. R. Farm at Strathmore, Alta., says: "I could certainly recommend 'Dry Farming' to all those who are considering this work in any one of its phases, and in fact for any man who is farming under more humid conditions there are many points that will aid him very much in the handling and treatment of his soil." The book is written in a simple style that may be understood by every man who reads, and in fact, so well has the author prepared this work that it reads like an interesting novel. It contains 290 pages and is well illustrated; \$1.31, postpaid.

Sixty Years of Protection in Canada, 1846-1907

By Edward Porritt

Western farmers at the present time are intensely interested in the tariff, and are anxious to secure information upon tariff matters. The above mentioned book by Edward Porritt is the best work on the subject. Mr. Porritt is a British Free Trader and was for two years a lecturer in Harvard University on political economy and Canadian constitutional history. In 1905-6 he travelled with the Canadian tariff commission and devoted a great deal of study to the Canadian tariff and the abuses which have followed protection. Mr. Porritt's book is entirely non-political and is a study of the tariff history of Canada for the last sixty years. It is written in a most interesting manner and at the same time contains exact information on trade and manufacturers and the methods by which tariffs are made. Every farmer who is interested in tariff reduction will find Mr. Porritt's book the most valuable one that he can secure. He will also learn how the manufacturers lay aside politics in their efforts to have the tariff burden increased. If every farmer in Canada would read Mr. Porritt's book, the "system of legalized robbery" would come to an end inside of one year. The book contains 478 pages and is fully indexed. It will be sent to any reader for \$1.50 postpaid.

Audel's Gas Engine Manual

By Th. Audel

The great need of the West is men to sow, till and gather, and these are the functions that the internal combustion engine furnishes the agriculturist to quadruple the labor that man furnishes. With the Gas Tractor the sod is broken, the land cultivated and the crop threshed with the minimum amount of manual labor, and with an ease and convenience that steam power was never able to furnish. Then the various details of the farm work are taken care of by the stationary gas engine and furnishes the power for sawing and chopping, pumping, churning, washing machine and separator, in fact all the chore work is taken care of by the gas engine. It is natural then that every farmer wants education in the operation of the Gas Engine, and no better book can be found that takes up the various details of construction and operation and in easily understood language, than Audel's Gas Engine Manual furnishes. It takes up the care and management of Gas, Gasoline and Oil Engines, Marine and Automobile Engines. The book contains 512 pages and is well illustrated by diagrams and printed in large, clear type on good paper. Postpaid, \$2.00.
